Dear Mrs. Rossett,

John and I are back at our schools after the most enlightening and wonderful experience either of us has ever had. We are already working on our next College Congress with an eye toward making it bigger and greater than ever before.

I've been asked to talk to several local groups - and I'm sure John has in his area too - to tell them what I saw and thought of the U.N. It is going to be a pleasure to enlighten some of these people who have a very depressed and fatalistic attitude toward the structure we saw - just as you told us at Hyde Park - many times of progress and cooperation never mentioned in the papers to counteract their soap bubbles of desecration.

I want to thank you for your wonderful hospitality at Hyde Park and the time and help you gave to us and our College Congress. You are a great inspiration to us.

Sincerely,

Phyllis Garrison
