ble My Proof that there is God

There are good and evil forces in the universe which control the destiny of man; in evil there is death. and in good there is life or immortality. Therefore, in every person there is a soul. in every soul there is a mind. in every mind there is intelligence; in every intelligence there is thought. in every thought there is knowledge. in every knowledge there is wisdom. in wisdom there is love. in love there is faith. in faith there is truth. in truth there is justice. in justice there is liberty; in liberty there is hope. in hope there is courage; in courage there is strength; in strength there is unity. in unity there is loyalty; in loyalty there is obedience. in obedience there is cooperation. in cooperation there is protection; in protection there is security; in security there is safety; in safety there is understanding; in understanding there is harmony; in harmony there is tranquility. in tranquility there is peace. in peace there is good. in good there is life or creation; in creation or in life there is God.

Mrs. Eleanor Roosevelt
Hyde Park
New York

Honored Madam:-

In my letter of March 12th, 1946, I outlined to you my profound admiration and esteem of that great Genius - your illustrious husband the great President, Franklin Delano Roosevelt, and today, I am again prompted by that great inner feeling to express my sincere devotion and appreciation of his unselfish efforts of creating a system to make life worthwhile living. His sincerity, integrity, wisdom, and fair play to all peoples of the Universe inspired respect and confidence in every land. Hence, his absence at the Helm of our glorious Country at this critical time is very much missed, as otherwise were he here now, confusion and misunderstanding would have been eliminated.

In view thereof, I again take the liberty to submit to your kind consideration a "Thesis" as an additional tribute to one of the greatest Presidents of the United States, the late Franklin Delano Roosevelt, whose memory I shall forever and ever cherish.

In conclusion, I wish to thank you most profoundly for your kind acknowledgment of my letter of March 12th, which reached me on March 19th, 1946.

Most humbly and respectfully submitted -

Joseph B. Rosberg

WHAT IS LIFE;
WHAT MAKES LIFE A MYSTERY?

"LIFE IS A MUST, LIVE WE MUST AND LEAVE WE MUST".

So why must we not leave our lifeless way, and for all of us to live life's way of life; that will do us the world of good; and none of us will have to torture or to kill themselves nor to torture or to kill others, and there will be no history that makes life a mystery. Life's way of life consists of peace and harmony, with an abundance of life's natural materials of anything and everything, for anybody and everybody that will make all of us secure to stay secure, and that will enable all of us to live, to know how to live and to know what we were living for. That is true but not new, what's new but not true is, our way of life with its construction, production, over production, obstruction, destruction of life's materials, human life as well while the Atomic Bomb, they say, may send all of us where we belong -----.

The Atomic Bomb, however, cannot destroy God's World nor the human race, as a matter of fact, the rich want to live, and because they want to live that's why they don't want to be killed by Atomic Bombs. There is a sound reason, this is, however, for you Ladies and Gentlemen to figure that out. And so must we remember the past and present great geniuses, scientists, philosophers, great learned men and women, as well as our ex-presidents, Thomas Jefferson, Abraham Lincoln, Franklin Delano Roosevelt. All of these great geniuses gave their life for all of us to be happy and for us to live, and live we must. And what about that great woman, Mrs. Eleanor Roosevelt, for she too did her share.

It is true that we cannot change God's life, but we can
change our lifeless way, for life's real, normal, secured life's
way of life and change we must-so why don't we? LIVE WE MUST
AND LEAVE WE MUST.

J. R.
