British Boeing B-17 Bombers

The British Purchasing Commission tells me that delivery on the Boeing B-17 bombers which were promised them cannot now be promised before March 17th because of an inability to obtain leak-proof gasoline tanks. They say further that if the United States Army would release tanks of this type over which it has control, the bombers could be delivered by February 10th. However, I understand that General Arnold has not considered it advisable to release these tanks.
January 9, 1941

My dear Mr. President:

Attached herewith is the file which you transmitted to me a few days ago concerning the findings of the Administrator of Export Control with respect to the value of certain Republic planes requisitioned at the request of the United States Army Air Corps.

It is my understanding that practically all of these planes have been delivered to the Air Corps and that the recommendation of the Administrator of Export Control needs your approval before the manufacturer can receive payment.

Faithfully yours,

The President,

The White House.

MEMORANDUM FOR SECRETARY MORGENTHAU:

What do we do next on this?

F.D.R.
The President.

The White House.

Mr. President:

Pursuant to Section Two of the regulations prescribed by the President October 15, 1940, entitled "Regulations Governing the Requisitioning and Taking over for the Use or Operation by the United States or in its Interest of Certain Articles and Materials Issued Pursuant to the Provisions of the Act of Congress Approved October 10, 1940", hearings have been held in connection with the requisition under the act of October 10, 1940, Public No. 329, 76th Congress, 3d Session, of the following-described property:

Requisitioned from the Republic Aviation Corporation, Farmingdale, Long Island, New York:

13 Type 2PA Two Seater Bombers complete with engines, accessories and equipment

15 Type KPI Single Seater Pursuit Planes complete with engines, accessories and equipment.

Submitted herewith are reports of those hearings and of my findings and recommendations thereon. In these reports it is recommended that the following determination of fair and just value be made:

28 Airplanes as described above . . . . $1,071,457.60

This recommendation is concurred in by the Secretary of War,

R. L. Marwell,
R. L. MARVELL,
Administrator of Export Control

Recommendation approved and fair and just value determined accordingly.
PARAPHRASE OF TELEGRAM RECEIVED

FROM: American Legation, Stockholm, Sweden

DATE: January 9, 1941, 4 p.m.

NO.: 18

It is my understanding that on the third and fourth of this month there was large scale selling of dollars through banks in Stockholm by Swedish nominees for dollar accounts of Germans in the United States as well as by Germans who reside in Sweden. Germans who held dollars converted them into marks, and they transferred these marks to Germany.

The reason for carrying out these transactions, it is believed, was the fear that the United States might freeze German funds held there, the recent strong public utterances of the President accelerating this fear.

STERLING.

MEMORANDUM

TO: The Secretary

FROM: Mr. Young

Re: Further Developments on Proposal to Eliminate Export Licenses on Goods Going to Canada

You will remember that the proposed proclamation to eliminate exports to Canada from the export control system was tabled at Colonel Maxwell's Advisory Committee meeting on January 6 for further investigation. At Colonel Maxwell's request, Mr. Buckley has since been designated a member of the sub-committee which prepares these proclamations. He attended a meeting of this sub-committee on January 8 at which the Canadian situation was considered. The following points are of interest:

1. At the request of the Chairman, Mr. Buckley pointed out that if the proclamation were issued in its present form there were the following dangers:

   a. The situation with respect to critical materials is steadily growing worse, and as a matter of principal this is ipso facto a bad time to release any of our controls.

   b. In the absence of information as to exports prior to shipment, substantial quantities of critical materials might go to Canada and into the hands of speculators there without the knowledge of either this Government or the Canadian Government.

   c. Exports to Canada might well be re-exported to other British dominions, since Canada apparently has a less rigid control on exports to other British dominions than we have.

   d. In the absence of a thorough study by the Defense Commission of our exports to Canada, it seems unwise to have a blanket elimination of control over exports since there are obviously items such as machine tools, aluminum, plans and specifications, etc., over which control must be continued regardless of this proclamation.
e. From the standpoint of national policy it would seem desirable that approval of the heads of the interested United States departments be secured for such a drastic step before the proclamation be presented to the President.

2. Concurrence with the points brought up by Mr. Buckley was expressed by Mr. Alex Henderson, of the Defense Commission, Mr. Henry Chalmers, Chief of the Division of Foreign Tariffs of the Department of Commerce, and Commander Shaffer, of the Army and Navy Munitions Board, representing the Army and Navy.

3. Mr. Yost, of the State Department, was quite insistent that something had to be done immediately, although no particular case was made for urgent action. Apparently this entire proposal has been worked up between the State Department and Colonel Maxwell's office without previous reference to this working sub-committee. Mr. Yost did state that the proposal had been discussed with and was approved by Secretary Hull.

4. In the course of a rather extended discussion it was brought out that the real need in the export picture at the present time was authority for the Administrator to issue general licenses. Apparently his present powers do not extend this far. If they did, then the Canadian situation could probably be taken care of quite simply without a complete elimination of export control as is proposed.

5. As a result of this, the Committee opinion was divided between a group who felt the answer was to have a proclamation issued giving the Export Administrator power to issue general licenses and abandon the Canadian proclamation and those who felt that the Canadian proclamation should be issued. All the latter group apparently felt that a general licensing power was a desirable thing but appeared to feel that it would take longer to accomplish, and they were apparently influenced by the State Department's arguments for urgent treatment.

continued on next page
6. It was finally agreed that they would make substantially the following recommendation to the main committee:

a. That the main committee abandon the Canadian proclamation and forward to the President instead a proclamation giving the Administrator of Export Control power to issue general licenses.

b. That if the main committee found this proposal unacceptable they recommended the issuance of the Canadian proposal with modifications which would require that exporters furnish information in advance of shipment on critical items to be exported to Canada, even though an actual license be not required.

7. The main committee will consider this report on Friday, January 10, at 3:00 P.M.
January 9, 1942

Supplemental Memorandum on Planes for Greece

Since the memorandum dated January 6th was compiled, it has developed that the President advised Secretary Morgenthau that the Greek Minister had been promised sixty planes.

At a conference between Secretary Morgenthau and Mr. Sumner Welles on January 8th, Mr. Welles stated that he was not aware that the number of planes promised had been increased from thirty to sixty. Mr. Welles also stated with respect to the offer made by Mr. Butler of the British Embassy on December 31st concerning the delivery of American planes on an American steamer to Greece that the State Department was not in favor of an American ship undertaking to make that delivery.

Mr. Murray of the State Department advised Mr. Philip Young this morning that Secretary Hall feels that the original promise of thirty planes to the Greeks should be fulfilled before any American planes are diverted to any other foreign purchaser.

Mr. Piment reported sales of non-vested securities for the week ended December 28 totaled $455,000.
American securities taken over by the British Government under its vesting order of December 15 (see list attached) included 42 common stocks, 17 preferred stocks, and 6 bonds. The attached chart shows the price trends for these three groups since the first week of October, in comparison with price trends for representative groups in the general market. The prices are Friday quotations, shown as indexes with October 4 taken as 100.

Two general conclusions may be drawn from this chart:

(1) As to the securities selected by the British Government for this vesting order, it is apparent in all three groups that securities were selected which had recently shown greater strength than the general market. This is particularly true of the selected common stocks (upper section of chart), the average prices of which were about the same at the time of the vesting order as they had been early in October, whereas the Dow-Jones composite stock index had appreciably declined during that period.

(2) As to the reaction of prices of the vested stocks to the announcement of the vesting order, it will be noted (a) that the vested common stocks declined in the week following announcement of the order by practically the same percentage as the decline in the Dow-Jones composite index, and later gained somewhat more than the Dow-Jones index; (b) that the vested preferred stocks sagged slightly in the two weeks following the order while a selected group of closely similar preferreds held about unchanged, but that the vested stocks later regained practically all of the previous loss; and (c) that the 6 vested bonds, in the week following the announcement, were somewhat weaker than the Dow-Jones composite index of 40 bonds, but fully regained their previous position during the next two weeks.

(In these calculations, 2 of the 42 common stocks and 1 of the 17 preferred stocks included in the vesting order are omitted, owing to a lack of adequate quotations. Also, two bonds of one issue which differ only in negotiability are here treated as one bond.)

Dear Mr. Secretary:

I inclose a summary statement of cash payments required against contracts:

(a) during next week
(b) during the balance of January
(c) during the month of February

on the assumption that this would probably cover the period of the Congressional debates.

None but vital contracts are covered in the statement. Priorities are expressed by the periods in which financial payments are necessary.

Yours sincerely,

[Signature]

Engines, June 9, 1940 - January 4, 1941;
Unfilled Orders and Estimated Deliveries on
January 4, 1941.

Faithfully yours,

[Signature]

Chief of Staff.
PARAPHRASE OF TELEGRAM RECEIVED

FROM: American Embassy, (Paris) Vichy

DATE: January 9, 1941, 3 p.m.

No.: 30

FOR THE TREASURY DEPARTMENT FROM MATTHEWS.

Reference is made to telegram of December 16, 5 p.m., No. 1144 from the Embassy, and telegram of January 8, No. 38 from Paris.

A circular has just been issued by the Union Syndicale des Banquiers to its members. In it they are informed that the date on which the German authorities will begin opening safe deposit boxes by force has been postponed until the thirty-first of this month.

In addition the circular states that since people desiring to return to the occupied territory in order to be present when their boxes are opened and examined are unable to get permits from the Germans to return, those banks which have branches in the unoccupied territory should ask their customers to give the branch bank the keys and combinations of their boxes and powers of attorney for opening the boxes. In case there are no branches in the unoccupied territory, the customer is asked to forward to the Vichy office of the Union Syndicale des Banquiers the keys, combinations, and powers of attorney "in blank".

LEARY.

TREASURY DEPARTMENT
INTER-OFFICE COMMUNICATION

DATE: January 9, 1940

TO: Secretary Morgenthau

FROM: Mr. Baine

The attached chart, prepared in response to your request, shows the trend of prices for a selected bank stocks before and after publication of the monetary-control statement by the Federal Reserve Board on New Year’s Day, in comparison with the market trend of the Dow-Jones industrial stock index. The three largest banks in New York and the largest bank in Chicago have been selected for this comparison. All prices are expressed as Indexes, with December 2, 1940 taken as 100.

You will note that all 6 of the bank stocks showed greater strength than the general market on the day following the Federal Reserve Board announcement. This strength, however, was not confined to the period following the release of the statement. During the week preceding that date, the stocks of certain banks advanced sharply. In the 5 market days preceding New Year’s Day, for example, while the Dow-Jones average was advancing 1.7 per cent, stock of the National City Bank rose 2.7 per cent, stock of the Continental Illinois Bank 3.9 per cent, and stock of the Chase National Bank 2.3 per cent. In over-all price trends, the Guaranty Trust and Bankers Trust stocks have been noticeably weaker than those of the other four banks.

January 9, 1941

Secretary Morgenthau

From Mr. Klaus

The report:

January 4. Further on Rückwanderer Marks. Agent's report contains a complete list of the names and addresses, dates, and amounts of Rückwanderer Mark withdrawals covering approximately 2,500 individuals; records found at the Chase covered the period between September 1, 1938, and November 30, 1940, and reveal approximately $5,181,997.07 in American dollars was made available in this way for the use of the German government, being deposited in the German Gold Reserve Bank account at the Chase. Applicants show addresses not only throughout the United States but also in Canada, Germany, Guatemala, Mexico, Panama, and elsewhere. The report suggests that all the individuals made what is "tantamount to an act of allegiance to Germany" in stating intention to take up permanent residence in Germany after approval of the application. The report further states with reference to the 36 German Reichsmark Funding Bonds sold in the United States in issue in payment of dividends due subsidiaries of American corporations that Series 8 of the Neutrality Act is thereby violated. Investigation is continuing.

January 4. Officials of the German Consulate in Chicago are trying to arrange for shipments of metals (tungsten, nickel, sodium, tin, columbium, tantalum, molybdenum, zirconium, zinc, copper, and magnesium) through South American and Central American points for transshipment to Germany, probably via Japan; they are attempting to interest Americans in the organization of an export corporation for this purpose.

January 6. It appears that FBI has known about Veritas Press (the organization which imports, prints, and distributes Nazi propaganda material and to whom 1,000 bills have been traced) at least since January 1939 but has begun intensive investigation since hearing from us; we will be informed of developments.

January 7. "A source close to the German Embassy" has stated that the Embassy accurately advised the German Foreign Office a year ago that the United States would not be prepared for war at this time; that the reports concerning German troops in Romania are silly since there are not available barracks to house the soldiers (400,000 to 500,000); that Germany would not go to war with the United States even if the United States took over 35 Danish merchant ships now in the United States. He further said that in a recent conversation with Henry Luce he had learned that Luce is convinced now that a Nazi invasion of the United States via South America is a great illusion and Luce "appears to be leaning more and more toward isolationist tendencies."

FBI reports:

January 9. On December 21, 1940, the Royal Norwegian Legation presented to the Dupont Circle Branch of the Riggs National Bank a check in the amount of $105,000 of the Government of the Commonwealth of Australia drawn on the Chase National Bank, Rockefeller Center Branch, New York; they received $105,000 in 5,000 bills and the balance in miscellaneous currency; FBI has the serial numbers of these bills.

January 9. Newspaper reports to the contrary notwithstanding, Princess Stephanie is still in California and not in Mexico City.
Secretary of State,
Washington.

7, January 9, 3 p.m.
"Central Reserve Bank".

The local Chinese press this morning carried an item to the effect that the highest authorities of a certain American bank in Shanghai had stated their willingness to accept the new notes if they are supported by the Chinese people; that a certain large department store the same city had agreed to accept them and that, since the French Concession authorities are on good terms with the Nanking "Government", their readiness to accept the new issue is beyond doubt.

Sent to the Department. Repeated to Chungking, Peiping and Shanghai. By mail to Tokyo.

PAXTON

re: copy
TREASURY DEPARTMENT
INTER OFFICE COMMUNICATION

DATE January 9, 1941

TO Secretary Morgenthau
FROM Mr. Cochran

CONFIDENTIAL

Registered sterling transactions of the reporting banks were as follows:

- Sold to commercial concerns: £265,000
- Purchased from commercial concerns: £3,000

Open market sterling was steady at 4.03 3/4. Transactions of the reporting banks were as follows:

- Sold to commercial concerns: £3,000
- Purchased from commercial concerns: £5,000

Only minor changes took place in the other currencies, and closing quotations were:

- Canadian dollar: 14% discount
- Swiss franc: .2321
- Swedish krona: .2385
- Reichsmark: .4405
- Lira: .0905
- Argentine peso (free): .2355
- Brazilian milreis (free): .0905
- Mexican peso: .2066
- Cuban peso: 7-11/16% discount
- Chinese yuan: .05-5/8

There were no gold transactions consummated by us today.

No new gold engagements were reported.

No gold or silver prices were received from Bombay today. The New York banks, however, received quotations late yesterday afternoon, wherein gold was priced at $33.96, off 3¢ from Tuesday's level. Silver was unchanged at the equivalent of 43.97¢.

The prices fixed in London for spot and forward silver were both 1/16d higher, at 23-3/5d and 23-5/16d respectively. The dollar equivalents were 42.44¢ and 42.33¢.

Handy and Harman's settlement price for foreign silver was unchanged at 34-5/4¢. The Treasury's purchase price for foreign silver was also unchanged at 35¢.

Regraded Unclassified
We made three purchases of silver totaling 350,000 ounces under the Silver Purchase Act. Of this amount, 150,000 ounces represented a sale from inventory, and the other 200,000 ounces consisted of new production from foreign countries, for forward delivery.
January 9th, 1941

Personal and Secret

Dear Mr. Secretary,

I enclose herein for your
personal and secret information a copy
of the latest report received from
London on the military situation.

Believe me,

Dear Mr. Secretary,

Very sincerely yours,

The Honourable

Henry Morgenthau, Jr.,

United States Treasury,

Washington, D. C.
TELEGRAM FROM LONDON DATED JANUARY 7, 1941.

Naval.
Two destroyers were in collision when leaving Fos (some words indescribable) yesterday morning. Considerable damage occurred to both ships.

2. During the Libyan operations besides covering the passage and unloading of supply ships running from Alexandria to Sicilian naval units have supplied 250 tons of water to the army. 13,136 Italian prisoners have been evacuated from Marsa Matruh.

3. A convoy of 13 ships has arrived in home waters from Merra Leone without loss.

4. **Royal Air Force.** January 6th a Blenheim sent on a task to North West Germany was obliged to abandon it but instead attacked a 5,000 ton tanker off the Dutch coast and obtained a direct hit with a 250 lb. bomb.

5. Night of 6th/7th. All operations were cancelled owing to weather.

6. **Libya.** On 4th and 5th January our Hurricanes shot down 7 enemy bombers and 7 fighters. One Hurricane failed to return. During the same period heavy and medium bombers dropped 17 tons of bombs on military objectives and shipping at Tobruk and at Tripoli where they also dropped 9,000 copies of the Prime Minister's speech.

7. **Home Security.** All railway services in the London area are now practically normal again and at Cardiff normal traffic has been resumed.

8. **Italy.** There still is not sufficient
2

Evidence to say whether there are any German combatant troops in Italy. There seems no doubt however that a large military mission consisting of specialists and technicians is in Italy and that the Gestapo is extending its influence.
SITUATION REPORT
January 9, 1941
12:00 M.

This military situation report is issued by the Military Intelligence Division, General Staff. In view of the occasional inclusion of political information and of opinion it is classified as Restricted.

I. Western Theater of War.

The German Air Force made numerous small scattered raids during daylight of the 8th. It was inactive last night, probably because of local weather conditions in its base areas.

Last night the R.A.F. operated normally against the northwest coastal area of Germany. Wilhelmshaven, Bremen and Borkum Island were attacked.

II. Greek Theater of War.

1. Local ground actions reported. Success in these actions claimed by both the Italians and Greeks.

2. Italian air offensive activity increased, both along the front and in the back areas. Salonika was bombed. This may be the forerunner of an Italian attempt to revert to the offensive on the ground.

III. Mediterranean and African Theaters of War.

1. The British report the concentration of their forces in the Tobruk area is continuing.

Active patrolling is reported on the Sudan and Kenya frontiers.

2. The Italians claim to be attacking actively the British ground forces in Libya.

R.A.F. pressure on Tobruk evidently continues. Tripoli and Bengazi, in Libya, and Naples and Palermo, in Italy, were also bombed.
Athena, filed 10:00, January 6, 1943.

Major Crew of the Air Corps has made the following reports:

I went out with three Wellingtons - individual planes - making night raids over Brindisi on the night of December 30.

These planes were stick-bombing over the city. In view of weather conditions, they flew at only 2000 feet. I also flew with nine Mosklow formations without escort, on day raids over the city and airstrip at Lentini in clear weather on the same date.

The pilots, who averaged a thousand hours, were excellent in all respects. They faced heavy and accurate night antiaircraft and day fighter opposition from fifteen planes. They confirmed to American tactical school doctrines exactly, except that they had to waste useless time over their targets to get accurate bombing results. This was due to their obsolete bomb sights. No planes were lost. They were using nothing but 250 pound bombs and light incendiaries.

The methods of operation used by the British-Greek air force have not changed materially since I reported last. Neither has their strength.

The British will send 30 Greek pilots to operational training units in Iraq on January 10. This confirms the idea that they intend to give the Greek air force assistance.

The Italians have a certain degree (not calculated) of air superiority. They are operating from advance bases in Albania. Their operations are both continuous and effective and are directed against attack objectives of a typical sort in the rear areas. They operate
particularly against areas in rear of the central and southern sectors.

There have been no attacks on Athens or on the sea airfields there, though they are only weakly defended. These airfields have contained all three of the British bomber squadrons since the war began.

Recently, air operations against Salonika have been resumed. By using a route through Yugoslavia, the Italians have escaped interception by the six obsolete Greek aircraft, all that can be spared to operate from the airfields there. The British air commander, an able officer, is openly worried about the unsolved problem how to employ his present small force properly from airfields with limited facilities against the present enemy air superiority, the handicap of water aircraft range, and with a weather handicap added. Improved strengthening of Bulgarian air forces by the Germans threatens him with an increase of these hostile efforts.

At sea, the night action of the British fleet off Salonica on December 17 is the only effort to raise superiority in the Adriatic and Italian zone, of which I have information. Italian warships are still carrying on independent day operations against road and villages along the coast, so that the results of the British effort cannot be considered decisive.

The Italian fleet, cooperating with their artillery and air, has conducted heavy combined operations against the unfortified village of Edreia and adjoining towns during the afternoon of December 20. This was an effort to halt the Greek advance which had started at dawn that day at a distance of two miles. The Italian attempt was a failure because the Greeks had no reserves and the villages shelled were prev-
From December 25 to January 2, I visited the front in the
Alexandria and Tripoli areas. They were occupied by one corps of
three divisions—one fourth of the Greek fighting force. I was able
personally to observe all the air, land, and sea operations mentioned
above.

It was learned that deep snow has compelled curtailment of
operations in the north. In the hope of forcing evacuation of Albania,
the Greeks are making desperate efforts to roll up the Italian right
and seize Valona. The Italians are being slowly forced back by the
Greeks, though they are resisting stubbornly from prepared positions
with preponderance of all arms. The Greeks are出色ly, badly equip-
ped, and badly clothed and their communications as well as their fronts
are stretched to the breaking point. The commander of the British in-
dependent mission, General Repond, said today that the purpose of his
mission is merely to advise the Greek army and to supply it. He is
seriously concerned over the Greek capacity to continue unless they
are kept in motion. The Greeks have made tremendous requests for
arms, which he is trying to supply. No supplies have been received as
yet, since the shipping problem is very difficult. Immediate critical
needs are 3,000 light trucks, pack animals by the thousands, and ammuni-
tion for the 75 and 100 mm. guns. Less priority to other needs, which
are, nevertheless, real.

Paraphrase of Code Cablegram Received at the
War Department at 12:24, January 9, 1941

London, filed 15:00, January 9, 1941.

1. On January 8, thirteen British convoys were escorted by
planes of the Coastal Command which engaged in one photo-reconnaissance mission and three special and five routine patrols. On that
day raids by bomber planes on targets in Holland had to be cancelled.
During the preceding and following nights adverse weather conditions
caused the cancellation of all flights.

2. There were no German planes over Britain on the nights of
January 7-8 and 8-9 because of unfavorable weather.

3. Details will be cabled later on the movement of two ad-
ditional British divisions from England to the Middle East which
is now being carried out. During the night of January 8-9 British
planes based in Malta were sent on bombing missions to Naples. The
results of this mission are unknown. During the night of January
6-7 one large merchant vessel was hit in the British bombing attack
on Tripoli.

4. Ice has caused the closing of ports on fiords in Denmark
and in the northern part of the Gulf of Bothnia.

CONFIDENTIAL
Belgrade, filed January 9, 1941.

The Yugoslav Intelligence Chief says that probably eight (and at least six) German divisions have already entered Russia. Numerous pontoon detachments are on the Danube between Corabia and Gitanite, according to reports. German troop movements into Russia have been almost uninterrupted since December 30, coming mostly from .......... German strength in Russia is now estimated at 120,000. The Yugoslav Intelligence Chief is now inclined to take the theory that the Germans would move troops into Bulgaria, more seriously than hitherto. On the other hand, he thinks that so far as major operations are concerned, invasion of Britain remains as the most likely idea.

CONFIDENTIAL
Stockholm, IIIrd 17th, January 3, 1942.

In reply to your No. 43 and No. 46, the figures below have been furnished by an authoritative source which it is believed is absolutely reliable and sympathetic. On May 10, 1940, [January had] 12,000 first line and 10,000 reserve combat planes. Since that time 18,000 [planes] have been produced. Information as to losses is not available. Both the Naval and Military Attaches are continuing this investigation with the cooperation of the Minister. The Naval Attaché has no information other than that given above. It is estimated that the maximum monthly manufacturing capacity is 3,000 [planes].

Yours,

[Signature]

[Signatures of: Secretary of War, Secretary of Navy, Secretary of Treasury, Chief of Staff, Air Force Division, Office of Naval Intelligence.]

GROUP MEETING

Present:
Mr. Young
Mr. Pehle
Mr. Wiley
Mr. Cochran
Mr. Sullivan
Mr. Graves
Mr. Gaston
Mr. Haas
Mr. Thompson
Mr. Bell
Mr. Kuhn
Mr. White
Mr. Foley
Mrs. Klotz

E.W. Jr: Glad to get reacquainted with everybody. Mr. Foley and I have been busy. I didn't see you (Foley) come in. Harry has a message for you.

White: It is about your bacon and coffee.

E.W. Jr: Herbert?

Gaston: I haven't anything.

E.W. Jr: Foley?

Foley: Here is a memorandum for your diary about the meeting yesterday.
H.M. Jr.: What do you mean?

Foley: At the White House.

H.M. Jr.: For Irey?

Foley: Diary. There is a press release.

H.M. Jr.: What a man.

Foley: Ferdie Kuhn and I got that up last night.

H.M. Jr.: Wonderful. I will read it with much interest. Did you make Ferdie work last night?

Foley: Sure, he was here until after twelve. He says he likes it. (Laughter)

Kuhn: It is habit.

H.M. Jr.: Good.

Foley: It was funny. When I got back to the office, Rayburn called and said that he wanted to hold a press conference too, and I said, "Well, McCormick said that Barkley was going to do the whole thing." He says, "I know, but I don't want the House press gallery to have to go way over to the Senate side. That would be inconvenient."

H.M. Jr.: You gave him the same thing?

Foley: Said he wanted the same thing at a quarter past eleven. He is going to hold one at twelve and so is Barkley.

H.M. Jr.: It will be like when the President talks you hear these three or four radio announcers all in the same room, each one talking into the mike before he talks, so it sounds like bedlam.
That looks good. Did Kuhn know what it was about?

Foley: Sure.

H.M. Jr: He will learn to have an answer. He will have to take a few lessons from Harry White.

Kuhn: On having answers?

H.M. Jr: I got off something at your expense, and I got no answer back. I said you would have to take a few lessons from Harry White.

John, I am accepting an invitation to go down to Mobile, Alabama, from Mayor LaGuardia, on the 21st of February. Kuhn is writing a speech and I wrote him that in case something happened that I couldn’t go, you would be delighted to...

Sullivan: Are you going?

H.M. Jr: Yes, I am going to try to. (Laughter)

Foley: If he can’t go, I will go.

H.M. Jr: Try to keep Sullivan away. I just wanted you to know, I am completely relaxed until ten o’clock when the British come. Then I have got to go to work, so go ahead.

Sullivan: Do you want us to keep you relaxed, or do you want to go to work?

H.M. Jr: Relaxed.

Sullivan: The Bureau has recommended that we not have non-application reports in section 102 in cases of corporations with an income under $25,000. It will save a great deal of non-productive work. I think it is quite all right, but I
wanted to mention it to you before approving it. I think there was up to you once before a Treasury decision revising our treatment of insurance policies. There have been a number of different decisions by the courts and I think it came up to you before and you disapproved it. Do you recall whether or not insurance policies that were non-assessable were to be included as part of the gross estate for estate tax purposes?

E.M. Jr.: I refuse to commit myself.

Sullivan: Well, is it all right for us to go ahead with what they think is right or not?

E.M. Jr.: If you think it is right, it is all right with me. I don't know what it is all about.

Sullivan: The only reason I brought it up is because I understood it had been up before you.

E.M. Jr.: If you think it is all right, it is all right with me.

Sullivan: A company in Philadelphia is anxious to bring isopropyl alcohol into its industrial alcohol and convert. The Alcohol Tax Unit doesn't think that should be allowed. We have had trouble with them before. They have gotten away with things up there. Mr. Reeves disapproves it and we disapprove it. The only reason I mention it is that they wanted to do that for the Navy Department, and I was afraid that Secretary Knox might speak to you about it and it is just one of those things we can't permit to be done.

E.M. Jr.: If he talks to me, I will refer him to you.
Sullivan: Right. That is all I have, sir.

E.W. Jr: Yesterday in Cabinet, Bob Jackson went into a long talk. He had a list of various American companies where the patent situation was more or less controlled by the Germans, and through that they controlled production. He got approval of the President to go ahead and draft a bill that not only which would have patents, but which would list investments in this country; and he called me up later on last night and asked who should go on what seemed to be a legal matter, and I said Foley.

Foley: We got a draft of that. Leon left one over here, too. There are two drafts around, ours and Leon's.

E.W. Jr: All right. Anyway, I am telling you about it. You are on a new committee. And while I am on that, Dan, I wish that you personally would talk to Preston Delano and I expect him to have about ten times as much material as I could use on the bank holding situation, and I am looking to him, you see. I want good cases. I expect him to feed the stuff to me.

Foley: In what form? Do you mean for a hearing?

E.W. Jr: Yes, when I go up --

Foley: To read before a hearing?

E.W. Jr: Yes, in testimony. They can just pump the stuff into me but I expect - and I think he ought to be thinking about - he ought to follow all the newspapers, any comments, and the possibility of answering the thing. I mean, the battle is on and I am looking to Preston Delano to watch it. He hasn't got much to do, and he might just
as well watch this. He says he hasn't got much to do there. I see in the bill according to the Wall Street Journal that it is also going to control dividends, which I didn't know before. Give him the right to control the dividend policy of all insured banks.

Foley: That is right.

H.M.Jr: I didn't know that, but that is swell.

Foley: We put that in to take care of Bank of America between now and the time Trans-America has to get rid of the bank stock.

H.M.Jr: I thought it was swell. Tell Preston I am going to look to him. I expect him to watch all the newspapers and watch this whole situation, and it is up to him to run to see me if he needs any help.

Foley: He has already started it.

H.M.Jr: I would just like Bell to tell him that I am counting on him.

Bell: No indication as to when this thing might break on the Hill?

H.M.Jr: I think it will be introduced today.

Bell: I mean the hearings.

H.M.Jr: I don't know, but I want Delano to watch the papers and the various things. He should be proud to do something to get the bill through.

Foley: Glass was supposed to do it yesterday.

H.M.Jr: That column in the Wall Street Journal on Friday morning is pretty good. I was interested in it.
What they do is, they all get together on Thursday night and pool all their gossip, and they write it once a week, Friday morning.

Cochran: Alphand and Lacour-Gayet have talked to Peble and also to Atherton over in the State Department about using the gold which they have down in Martinique. They wanted to have a certain amount of that transported to Puerto Rico and that part came to me and I told them we would accept it in New York if they wanted to sell it or earmark it there. Then before a committee which Peble might describe --

H.W. Jr: A little louder, please.

Cochran: The Committee of Control has the question as to how we should handle this. They would like to either earmark it and have the facility for selling it and getting free dollars, which they could use to finance shipments from this hemisphere, via Martinique, to northern Africa. They particularly want to send petroleum products. They say they need this for their harvesting and so on.

So the State Department seems to like the idea of their using part of that gold and, but the State Department would like an answer from us as to whether we favor it. They don't anticipate moving the big bunch, but only ten million dollar lots; but they would like the proceeds to be free; or if they leave it earmarked, then an equivalent amount from their dollar account be free.

H.W. Jr: Well, I think it is - I would like to see the whole thing down on one piece of paper.

Cochran: I have a memorandum on it.
E.W.Jr: And Mr. Bull is approving this.

Cochran: Well, they want our idea on the technical side and it was our idea here to say we would buy the gold or hold it under earmark.

E.W.Jr: If you give it to me and I feel better than I do now, I may read it.

Cochran: I have had it two or three days.

E.W.Jr: Well, a couple of days more won't make any difference.

Gaston: So far, on the advice of the State Department, we haven't been permitting any shipments at all to Casa Blanca, France, by way of Martinique or any other way.

Cochran: This would be conditional upon the British giving them navicerts, of course.

E.W.Jr: Put it on the pile. All right. Anything else?

Cochran: No.

E.W.Jr: I was very glad that you (Wiley) were able to help Mr. Bullitt. I didn't answer him.

Wiley: I saw Mr. Schubert yesterday, Vice-President of the Bank of Manhattan, and he says in recent months cash withdrawals have been five times anything in the past, and that foreigners who have large holdings of cash keep them in hotel vaults instead of safety deposit boxes in the banks.

E.W.Jr: I thought I had the thing licked. I thought Mr. Bull and Mr. Welles were satisfied, but they now aren't. I sent you (Kuhn) a memo.
Fuhm: I got your message.

E.M. Jr: That is wonderful service on that machine. I mean, the State Department - I don't think they reversed themselves. I just think it has come to the surface. They saw it was imminent and was going to be signed yesterday. So I don't know. Pehle?

Pehle: If that freezing matter is coming to a head, we have been working on the thing, the committee, and the committee feels that before anything is done there are a number of very large policy questions that have to be settled, and we have to have your time on it.

E.M. Jr: Well, you will have plenty of time, don't worry.

Pehle: Mr. Pickett came in again about additional release of French funds, $50,000 to buy milk in Switzerland.

E.M. Jr: Tell him to get the 70 tons out of Switzerland he has already bought.

Pehle: I think that is right. You notice that in the State Department's memorandum on the Hoover proposal, they thought that the Hoover proposal would involve a very unfortunate precedent. Of course, this is exactly the same type of thing and we didn't consult State about it before we did it.

E.M. Jr: Well, I wouldn't move until they get the 70 tons of milk out. Somebody was to ask the Swiss Minister.

Dochran: I asked about that and --

Pehle: We got a report from Matthews and Matthews said
they haven't gotten it out and they agree they haven't gotten it out. They say they hope to get it out.

E.W. Jr: I am going to sit tight until they get it out.

Fehle: And on the Hoover proposal, as far as I know he hasn't come back since State referred him to you and done anything about it.

E.W. Jr: Herbert Hoover was referred to me?

Fehle: Yes, sir. You remember that is the letter that Cordell Hull sent over here after Hoover had written him, and the State Department attached a memorandum that apparently Feis' office had prepared which was against the proposal. I should think it would be one of the worst of the Hoover proposals.

E.W. Jr: Anything I should do about it?

Fehle: No, sir.

E.W. Jr: I am going to skip to the people that I haven't seen and give them a chance.

Thompson: I have that Albany closing matter which Mr. Gaston has cleared with the politicians. The Albany Emergency Relief Accounting Office.

Thompson: We probably will get lots of kicks.

Thompson: Mr. White would like you to appoint Professor Southard. He has a leave of absence from Cornell University. He was here with us in the summer of 1938.
Assistant Secretary Tracy of the Labor Department was asking if we could loan him a car for three or four days during the inauguration period. He is going to be very active in that parade and running up and down the Avenue and wants something with tags. I gave Frazier cards for your car yesterday.

H.M. Jr.: Tracy, what is he?
Thompson: Assistant Secretary of Labor.
H.M. Jr.: Isn't that an unusual request?
Thompson: It is a little unusual, but I don't see any difficulty about it.
H.M. Jr.: Got anything we want from them in return?
Thompson: Nothing I can think of.
H.M. Jr.: O.K. We can kind of rub the car in the palm of his hand.
Thompson: You wanted me to tell you about the retirement case of this Internal Revenue man. He is one of Ira's men who reached the age of 70. He is in the Washington District.
H.M. Jr.: How did that get to the President without going over my desk.
Thompson: These cases don't go over your desk, and we have about 50 of them a month and 49 of them are retired and one retained. There is no letter to the President. It goes right to the Civil Service Commission.
H.M. Jr.: What else?
Thompson: That is about all I have.
H.W. Jr: Dan?
Bell: Do you want an open market meeting for this financing?
H.W. Jr: Yes, and just --
Bell: You don't need it, I don't think.
H.W. Jr: Yes, I don't want them to say - there are two things. I will give you an answer in a minute. I want to do this first, and I want to tell you something very interesting. How about the 15th at eleven o'clock?
Bell: That is all right.
H.W. Jr: Will you take care of it?
Bell: Yes.
H.W. Jr: George Haas made a study for me of bank stocks before the first of January when that announcement came out, and there is no question about it, that they were counting on it, and I wish you would see the way National City and Chase Bank stock acted for two days before this announcement.
Haas: The two Morgan banks didn't do anything.
H.W. Jr: But the Chase and the National City?
Haas: The Bankers and the Guaranty didn't show up.
H.W. Jr: Do you remember how nervous Eccles was about getting that out? Not that I am implying anything, but it is interesting.

Now, what I want you to do, I want you to watch those and if these fellows are convinced there isn't going to be any legislation, let's see
what happens to those stocks, but there is no question in the world that the banking fraternity knew about these, that they were going to go through, and did they go in and buy those stocks? The old bunch was right. We will just watch them. And then you continue to watch the English for me. Have you any doubt at all that it must have been - that they went in and bought those just before the statement came out?

Haas: I have got the chart of the general market and the chart of those stocks and it shows right before it that it went sharply up.

E.W. Jr: You are just basing it as I did yesterday in my argument on a pure matter of statistics.

White: Facts don’t lie, do they? (Laughter)

E.W. Jr: Harry took opposition to my statement to the press yesterday where I said Congress wasn’t going to take the Eccles statement seriously. He thought I was too flippant.

Hill: I thought you said if they did, you would have something to say.

E.W. Jr: Harry liked it.

Hill: What became of the chart?

E.W. Jr: The chart was there.

Hill: And they never saw it, did they?

E.W. Jr: No, I had it over, but I listened, and sometimes a little grumpy, but I listened. Nobody asked me anything, nobody asked me whether I thought Jones was right or wrong, nobody asked me
whether I thought we were having inflation and nobody asked me about the President's budget except did I agree with him that there was no such thing as a debt limit. That was the only question that was asked.

Bell: It was a pretty good press.

H.M. Jr: Well, I had a pretty good - you have got, "The Secretary of the Treasury is just clay in the hands of his associates."

White: Baked clay. (Laughter)

H.M. Jr: As long as it isn't a crackpot. (Laughter)

White: In line with that you will be amused at the British press stating that the F.R.B's request for more extensive monetary powers to control inflation is an economic anachronism.

Haas: Go on. (Laughter)

White: All right. On the ground that it is more than monetary powers that is needed to prevent inflation.

Bell: Well, I awaited the press with eagerness, but it came out very dull. I wondered what happened.

H.M. Jr: That is just what happened. Harold?

Graves: Nothing.

H.M. Jr: I am still waiting for you and Norman to ask to see me about that personnel director.

Klotz: They know better.

Thompson: We have been on McKay's list, but we can't get to you.
White: Jerry Frank called up yesterday to say that they had had this meeting and he had something that he wanted to communicate --

H.M.Jr: I talked to him last night.

White: All right.

H.M.Jr: Ferdie?

Kuhn: Would you like to reconsider that American Institute of Banking invitation for the first of February?

H.M.Jr: I won't be here.

Kuhn: You won't be here?

H.M.Jr: No. Everybody will please note.

White: They have.

H.M.Jr: I plan to be gone from the 31st of January until February 10, the night of the 31st.

White: Do you think that is long enough for a good rest, Mr. Secretary?

H.M.Jr: No, I don't, but if I get away I will consider myself extremely lucky.

Kuhn: I have nothing else except that I hope to see the Herald Tribune's leading editorial this morning, apropos of the press yesterday.

H.M.Jr: About Jones and me?

Kuhn: Yes, also a piece in the Times about the behavior of the bonds following your statement and how the brokers are all blessing what you said,
because anyway it gave them increased turnover and that is what they wanted.

Bell: Increased business.

H.M.Jr: I don't want to embarrass you, but when you read some of that stuff, it is - well, I won't say it.

Kuhn: Come on, come on.

H.M.Jr: Well, I just don't - that is why - when I read that stuff, that is why I read PM every night. I like to get something that is really original.

White: He doesn't mind that. He has been writing for --

H.M.Jr: Oh, PM.

White: No.

H.M.Jr: If anybody doesn't, it is refreshing to read PM at night. The job they are doing on the public schools in New York is really amazing. They really go out and get fresh stuff. They have got this campaign on retail sales. They are doing a marvelous job on that, comparing New York retail prices with Vermont. I mean, they have got this campaign on Mexico, this fellow Boyer taking the thing, and we are imperial in our attitude, they think we are and he doesn't believe it, and they gave him a chance last night to write a full editorial answer to Ingersoll contradicting him. It is an interesting paper.

Gaston: I hope they can get some circulation.

H.M.Jr: Well, they have got enough money to keep going for awhile, but it is refreshing to read it.
Bell: It is Marshall Field's paper, isn't it?
H.M.Jr: Yes.
Gaston: By the way, George Field was in town this week. He has been in Mexico. He came in here to get some figures.
H.M.Jr: All right. Does he use - before I see him again, does he use Listerine?
Gaston: He had his teeth fixed.
H.M.Jr: He needed something. (Laughter)
Sullivan: There is an appointment in the wind.
Kuhn: Mr. Secretary, I just wanted to tell you that Odegarde was here and worked hard all yesterday. He is going to be back Tuesday.
H.M.Jr: Grand.
Kuhn: With some stuff written and some more work to do here in the building, seeing people and getting information.
H.M.Jr: He is a breath of fresh air. I like that man.
Kuhn: Very good.
H.M.Jr: I want you all to meet him after he gets started. Have you had a chance to meet him, Bell, Odegarde?
Bell: No, I haven't seen him.
H.M.Jr: He has been working with Kuhn. You will like him.
Thompson: He declined a salary.
H.M. Jr: That is up to him. I told him to talk to Viner and find out what other professors are doing. But he doesn't want any salary?

Thompson: No.

Sullivan: Have you had any talk with either Doughton or Harrison about getting together on the tax program?

H.M. Jr: No, because there was nothing left for me. You can't imagine what Foley and I have been through. Foley is a young man. He can take it. He can't run from here to the White House.

Sullivan: He puffs, doesn't he.

H.M. Jr: That is a polite word for it. (Laughter)

Well now, let me see; at this meeting with the English, I want Mr. Bell and Mr. White and Mr. Cochran and Mr. Foley.
January 10, 1941
10:00 a.m.

BE AID TO BRITAIN

Present:  Mr. Bell  
          Mr. Cochran  
          Mr. Frank  
          Mr. Schenker  
          Mr. Purcell  
          Mr. Foley  
          Mr. Cochran  
          Mr. White  
          Sir Frederick Phillips  
          Mr. Gifford  
          Mr. Pinsent  
          Mr. Young

H.M. Jr.: The reason I asked you gentlemen to come down is this. The SEC, Chairman Frank and his associates, have been talking with this group of investment people. Before you came in, they informed me that they hadn't given out any publicity; and the investment trust people hadn't. Where it came from, I don't know.

Schenker: I know where it came from. Mike Flynn called me and said he had gotten the story from Pat Harrison. First he had it wrong, and then Jimmie Byrnes set him straight. Where he got it from, I don't know.

H.M. Jr.: You know where the best leaks come from in Washington?

Schenker: No. I have been here seven years and don't know.
E.M. Jr.: Well, some time I will tell you. So, if Mr. Frank would tell us - I haven't heard yet either - just what the situation is. We are talking now about this group, the idea of their being in a position to buy some of your direct investments if you want to sell.

Frank: At the Secretary's request, we got in touch with Mr. Quinn, of Tri-Continental. Mr. Schenker went over to New York and conferred with a group of investment trust representatives, and with an exception which I will presently indicate, they will be delighted to negotiate on any direct investments that you care to sell. They have quite a fund of capital, and the virtue of their dealing - Mr. Gifford would know much better than the rest of us - would be that you would have real underwriting. That is, they would be able to put the money right on the table, whereas the investment bankers would have to do a selling job.

The securities they sold would have to be registered with the SEC. Their price would depend upon the market conditions at the time. They can't give you a very long commitment, whereas the investment trusts wouldn't have to bother about that.

Now, of course, they can't - if the job gets to any terrific magnitude, they couldn't handle it alone. Moreover, they are not suggesting and we certainly wouldn't that they - you should limit your negotiations to them because you might get a much better price by dealing with a variety of persons, and they are not suggesting it. They would just like the usual method of dealing, opportunity to investigate, and the like. Mr. Schenker can tell you more adequately than I the approximate
amount of funds that they would have at their disposal.

Schenker: Depending upon the group that we wanted to include in these negotiations, I think it would range from 15 million to a hundred million in that group. However, Mr. Quinn has already told me that certain insurance companies have called them and said, "We will be willing to participate in your group."

Gifford: May I just ask one question to clear my mind? My impression is that the investment trust companies themselves would not have resources of that magnitude in their own coffers, but they can get them by, as you say, bringing in the insurance companies, borrowing on the securities and so on.

Schenker: That is not strictly accurate, Mr. Gifford. They have available in that small group about 50 million dollars in cash.

Frank: That is without any disinvestment of what they have now. Of course, they could disinvest.

Now, to make clear what we mean about the small group, there is among the investment trusts three that are affiliated with investment bankers. They do not want to go along with this plan, and if they went along - if they did, it would be a still larger sum, but those three would prefer to - I think they will conclude - they spent some time with us yesterday - that they would rather go it alone. That is the Lehman Corporation, the Dillon Read affiliate, Lazard Feres, and Dominick & Dominick. They would prefer to do it as an investment banker's job and nobody would dream of suggesting that they shouldn't have the chance; but the
fact is that by grouping these investment trusts you don't reduce competition but you increase it, because they have not heretofore done that sort of work with the exception of a recent job done by Quinlan of Tri-Continental in Newport News.

Gifford: That is right.

Frank: You know the situation has not been as it is in England. Investment trusts have not done real underwriting and I think you will get more competition out of it.

Schenker: And I think it is only fair to state, Mr. Gifford, the objection of these investment banker sponsored investment companies is that if any group gets together, it cuts down the competitive element and that therefore you may not be getting the best price. However, they do say that they have been harassing the British Government to get a look at these things, and they will say there are 20 or 30 or 40 groups —

(Mr. Young entered the conference.)

Frank: That is, the investment bankers said that they had - Lehman has been to you about some mining property and others.

Gifford: Mr. Cochran at least will have seen the effect on our work since I was here three or four weeks ago. There has been a marked change, hasn't there?

Cochran: Yes.

Frank: Well, that is about the story. I am sure the Secretary - he wouldn't dream of suggesting to you that you should limit your negotiations to any group, but this will add to your bargaining
cerenity rather than otherwise, and to the extent of the funds they would enable you to have a firm over whereas the investment bankers couldn't do that for you.

Hill: They have got a hundred million capital, you say, as a maximum. Can they borrow?

Trask: Oh, what is their capital? It is considerably greater than that.

Schenkert: The group that we looked at, and we haven't included companies like United Corporation and others who would go along, see, of total assets of approximately 600 million dollars and there are about 10 to 15 per cent in cash.

Hilliard: There is a big sum available.

Schenkert: They are making provision for a reservoir of 10 per cent to take care of the little companies ranging from 2 to 4 million, who could get a participation in this too if they so desired to make it an equitable distribution.

Hilliard: Then just to get the thing further cleared, who would be the person representing them, Tri-Continental?

Schenkert: Mr. Salam of Tri-Continental. He will also have on a committee of three, one of the Boston group, which are the so-called open end companies. Marshall Griswold, probably.

Hilliard: Cahot, somebody like that.

Schenkert: Cahot and probably one other. He wanted Mr. Bunker to come along; but since Mr. Bunker has fundamental difficulties with the plan, he will not go along.
Gifford: But it is where Earl Bailey used to be. I knew Earl Bailey very intimately, and I knew the people.

E.M.Jr: As I understand it, it isn’t just Quinn, it is a whole group.

Gifford: But he will be the person to speak to.

Frank: He will speak for that group.

E.M.Jr: He and two others.

Schenker: Have you got a list of who is on that group?

Schenker: Yes, I have got a list here. People who have indicated an intention to manifest an interest is State Street, with 35 million of assets, Incorporated Investors, that is the former Governor of Maine, Massachusetts Investors, Dividend Shares, that is Hugh Bullitt, Calvin Bullitt, Equity Corporation, that is Dave Milton, who is John D. Rockefeller’s son-in-law, Tri-Continental Corporation, Chicago Corporation, that is Field, Gore & Dick, Blue Ridge Corporation, American International Corporation, Pacific Southern Investors. We want to get some people from the Coast. That is John Lovelace.

Gifford: Who is that?

Schenker: Lovelace. The Atlas Corporation is Floyd Odlum and the Phoenix Securities Corporation. We have got Railway and Light, that is Jim Orr of Boston, and we have got the Amherst Express Company, and there will be a few others, but this is the people who --
Schenker: Excluding United, and a great many other corporations. I think --

Gifford: But that is quite enough. Certainly the Tri-Continental have got a group behind them.

H.M. Jr: And I say that they have the blessing of the Securities and Exchange Commission.

Frank: There would be one minor problem which we will clear which would be a possible objection by the Anti-Trust Division of the Department of Justice. I am sure they wouldn't, because apart from restricting competition, this would really create more competition.

H.V. Jr: But you can take care of that.

Frank: Yes.

Schenker: If I may make this observation to the Secretary, when you say it has got the Commission's blessing, we don't even want to remotely infer that the British Government should confine its negotiations to this group.

Gifford: I quite realize that. You made that very plain.

Frank: They are under our jurisdiction in certain respects under a certain statute, and I am sure these fellows will be very easy to deal with.

H.M. Jr: Before I get on the next thing, I want to say to Sir Frederick, is there any question you want to ask about this setup.

Phillips: Mr. Frank cleared the main point at once when he said there was no question of restricting
competition but of extending it. As you know very well yourself, in Democratic countries you have got to prove to your Parliament that there was competition. That is the most important thing, that we should have that.

E.M. Jr: Well, you have got the group and you have got the group that doesn't want to come in represented by three or four houses, so you have got competition there and then you have got anybody else that wants to talk to you, but at least —

Gifford: We have got one solid one ready to act.

E.M. Jr: Solid one that wants to act and if the other people want to come in —

Frank: Well, they have been —

E.M. Jr: You have got at least two groups.

Schenker: Two groups, and there was some intimation once, Mr. Secretary — we had knowledge of the fact that at least 10 to 20 banking houses had been contacting the British, manifesting an interest in those securities. I think the only thing we would like to say is that here is a group that may be an additional purchaser —

Gifford: I quite understand. I understand absolutely.

E.M. Jr: They have never been in this thing before.

Schenker: That is right, never done that type of thing.

E.M. Jr: What we have done is, we have really created an additional buying source. Is that right?

Frank: And Mr. Gifford knows the character of them because it is like the ones he has at home.
E.W.Jr: Well, I think the SRC has done a good job, and I want to thank them for getting this lined up for you. Now, what are you going to do about it?

Phillips: Well, I have already suggested that pending any alteration of the character you know about, sir, that Mr. Clifford should be in power to get on with this list of these particular securities.

E.W.Jr: Do you think that possibly by Monday that - by Monday maybe you could get word from the Treasury?

Phillips: Surely.

E.W.Jr: Because the last time I pointed this out, I don’t know when it was, but I have been from Thursday to Saturday just running around this town like nobody’s business getting this bill ready for the President. It is ready. Now, I have got to go up there and testify, and I am not in very good shape because the people in the administration in very high places and certainly people on the Hill who think that you have sensitive securities — and one of the things I am going to have to talk to you about before I go up there is just how much I can divulge.

Phillips: Yes, but was it you who suggested Monday, sir, you said I could be as late as that.

E.W.Jr: You mean today? You mean — have I said Monday before this morning?

Phillips: No, sir, but you said this morning, could I let you know before Monday. I can certainly do much better than that.

E.W.Jr: Oh, good. Because as I said, I don’t know
when I did say this last, that even if you would sell one thing - I don't know when that was.

Gifford: That was when I was here.

H.M.Jr: That was at least three weeks ago. And from the standpoint of getting this legislation through, if for no other reason, I mean that this thing could be started. It would help a great deal, aside from everything else the cash would provide.

Now, I would like to also, while these gentlemen are here, bring up another one, and that is the possibility - whether you could get the authority to talk on these 600 million dollars worth of American securities - I think you call them listed securities, don't you?

Gifford: Marketable securities, we call them.

H.M.Jr: We are working on another plan which has nothing to do with this, but we would like you to have the authority so that you could talk, that we take those over en bloc, at a price. Now, there are several ways that we can do that, we think. We are working on it. If you could get that authority so that you could talk to me about selling those en bloc to us --

Phillips: Yes. You are talking about a Government organization now.

H.M.Jr: Government or private group. I am going to ask the SEC to think about that. Now, that is No. 2.

No. 3, the suggestion also has been made - this, I think, came to me from Mr. Lovett, who is now with Mr. Stimson, formerly of Brown & Harriman
but he resigned. He severed all connections. The possibility of forming a private corporation or a Government corporation - maybe you know about this - to buy things like wool and tin for cash while they are in transit, or you can buy them in Australia, Malay Straits, wherever they are. Wasn't that the other suggestion?

White: That was the one he made, and then pay in advance.

H.M. Jr: Yes, pay in advance.

White: For subsequent deliveries.

H.M. Jr: I mean to buy the stuff, the wool in Australia or the tin in the Malay. I don't mean to buy what is underground --

Gifford: That is in shipment.

H.M. Jr: Well, to buy --

White: For future delivery over a period undetermined.

H.M. Jr: Now, weren't those the two principal things on that list?

White: I think you have mentioned them.

H.M. Jr: Now, we are working very hard on those, but you gentlemen haven't, I take it, got the authority to talk to us about it, but we will be ready in a couple of days.

Phillips: Yes, I will undertake to be ready in a couple of days.

H.M. Jr: With the possibility of buying commodities at
the source and paying you cash, the possibility of taking over your marketable securities en bloc, and then while I give you the whole thing, I want to say again that I sent word to you two days ago that Mr. Hull has— he is even more sure of this than ever, although his own people, like Mr. Feis—I wanted to find out where he was— don't agree with Mr. Hull that we are to ask you to put up two or three billion dollars worth of securities as collateral against the loan of this material.

Now, I am passing it along to you. I have told Mr. Hull— asked whether I could do it here. I have tried my best. I don't want to be critical, but I am just giving you the facts so that you will be prepared. He repeated it again yesterday, that he thought it would help very much on the Hill if you could put up that two or three billion. I am not recommending it, but I am passing it along as something that he seems to feel very keenly about; and as I am sitting here, the thing that occurs to me is that it might be worthwhile if Sir Frederick could see Mr. Hull this week-end.

Phillips: Yes, I will.

E.W.Jr.: Because he has also—I told Herbert Feis—Mr. Hull has the figure which he also gave the President and left me in a very embarrassing position, that you have got 18 billion dollars worth of securities and therefore what is two or three billion as collateral. I mean, we are talking very much here in this room, but I want to give them the chance—if he goes up on the Hill and says, "They have got 18 billion dollars worth of securities, there is no reason why they couldn't put up a couple of billion—" you see. So I really think, as I sit here, if you could ask to see Mr. Hull and get to him, the sooner the better for your sake.
Phillips: I will.

E.W. Jr: But I had Mr. Welles here, and Mr. Feis here when we had everything on the blackboard for them, and gave them all the figures you had given us, and I thought we had gotten across the information.

Phillips: Well, I will do that.

E.W. Jr: Evidently I have done a very bad job. Certainly Mr. Welles and Mr. Feis know what it is.

Phillips: Yes.

E.W. Jr: But Mr. Hull doesn't. Then the other thing, I want to congratulate you (Gifford) on the acceleration of your sales.

Gifford: I am afraid that you must still think that my words were unreliable.

Phillips: Was this yesterday?

Gifford: No, it was the figure I gave you rather casually in conversation, not knowing it was going to be used to give information to the Secretary, of three and a half million. At least I can claim that my deeds were better than my words, once I knew where I was.

E.W. Jr: It is a nice position to be in. We don't all find ourselves in that position. But what I have read in the press and I have heard since the way you did it - in fact, it encouraged the market, because nobody in the market had any idea that --

Gifford: The market was --

E.W. Jr: That they could absorb as much and it has cheered
everybody up, and I have been running a graph on the stocks that you sold, going back a month before and since in relation to the market, and, of course, it is very interesting to watch, but it has been very good for the market, plus the thing I kept saying would give underpinning to the market. I said that. It is nice to be right once in awhile.

Schenker: May I ask a question, Mr. Gifford? When you talk about your marketable securities, do you include situations like Lever Brothers?

Gifford: Oh no.

Schenker: Those are in the categories of unmarketable.

Gifford: Those are fixed.

Phillips: What about Lever Brothers?

Gifford: It doesn't belong to us at all.

Phillips: My belief is that it is under Dutch control.

Frank: It certainly is a misconception.

Schenker: Is Brown & Williamson marketable or unmarketable?

E.M. Jr: What they do, they divide the thing as those which are listed.

Gifford: Those which we can sell are confined in the marketable securities to things that could be sold on the New York Stock Exchange or through the distribution houses without any more ado, just in the case of a couple of days.

E.M. Jr: The investment trust thing, where some individual owns a factory --
Gifford: We had a situation like that just yesterday, a transaction, with one of the investment trusts.

Frank: Of listed securities?

Gifford: Of listed securities.

H.M. Jr: But the thing the investment trust does is where an individual or a partnership owns a factory or a business --

Gifford: The best example is Viscose. That is the one you all know. We all know that and it does belong to a British company. Lever Brothers has led to a great misconception. It is absolutely not owned by Great Britain, but in Amsterdam.

Vincent: The Shell Union has also been mentioned in the press. There it is again. Although we have a participation, it is the Dutch that have control, I think.

Frank: Does that mean that the Germans today control it?

Phillips: No, I think the Dutch Government controls it. It ought to be so anyhow.

H.M. Jr: Jerome, can you think of anything?

Frank: No, I don’t think of anything.

H.M. Jr: How about my gang? Have I covered the thing we were working on?

White: Those were the major points.

H.M. Jr: Dam!

Bell: I think it is all right.
Anybody?

You don't have authority to recommend an immediate vesting of the whole balance --

One thing I ought to say on that, gentlemen, with regard to vesting, we must not omit the physical difficulty. I had a letter from Mr. Bernard of the Bank of England, in July last, that has nothing to do with what is going on today, saying that he did not feel that they could tackle under the circumstances now existing more than individual vestings of roughly 85 securities involving a value of roughly 85 millions at one time, just because of the physical difficulty in getting it down, and that, of course, with the bombings in London and the difficulty of stock getting in and out, it must have been increased rather than decreased, and you see the physical labor in the vesting of a small holding is just about as great as if you have got one fellow holding five millions. It takes as much work to do 50,000 held in 3 or 4 hands and then another thing that we are noting very much this time, we had a vesting beginning in December, and the stuff has come forward very slowly, which I think is undoubtedly due to the fact that both the Clippers and the sea mail are taking so very much longer. The Clipper service has been awfully unsatisfactory this last month.

We have got one man who left London on the 20th of December and got to Lisbon the same day. There he is now, urgently wanting to go to Washington.

These are physical difficulties.

The mails aren't quite as bad as that, but they are pretty bad.
(Mr. Frank and Mr. Purcell left the conference.)

White: Could the physical delivery of stocks be strung out over another month or two?

Schenker: Yes. As I understand it, one of the advantages of an investment trust is that on a preliminary negotiation, they will conclude the price, make the contract at that price, and make it subject to an investigation.

White: No, I am speaking of the marketable securities and there is a difficulty that has been --

Schenker: Oh, if they dealt with the investment trusts.

White: No, you are making two things.

White: No matter whom they dealt with, supposing a contract for purchases was made and the securities were not physically all available, owing to the difficulties of transport and the difficulties of vesting so that they might not be forthcoming for even several months in toto after the contract has been completed. Is that something which is feasible.

Schenker: Yes. The fact of the matter is, you can do that under New York Stock Exchange's code of delayed delivery, and it is reflected in the price. It usually sells a little cheaper because the fellow hasn't got the physical possession of the securities to sell immediately.

White: So the fact that there are difficulties in the vesting need not if they so desire delay any arrangement.

Schenker: That is right. A delayed delivery sale is not unusual on the New York Stock Exchange.
Look what we authorized the people to do in Holland. My God, tell them what we authorized the Central Bank - Bank of Holland, or whatever you call it, to do before the Germans came in, what we were willing to do.

To have them burn their securities?

But tell them how we were willing to have them list them and the Consul simply take a whole list and simply sign.

And have them therefore regard --

I think we are really mixing two things.

But it is a question, if you took your securities, you couldn't get them over here physically - in the case of Holland, we told Tripp, the President of the Government Bank there, "You can take these securities and just take a whole batch of them and get some Consular office and whatever the local legal authority should be, the judge, and simply burn these things and sign and we will give you new securities on this side." If we did it for Holland, why wouldn't we do it for you?

I think there has been a little misunderstanding. I was really answering Mr. Cochran's question.

They never did it though. The Germans got there first.

I was answering Mr. Cochran's question about vesting, you see. I wasn't really suggesting that an arrangement of that kind couldn't be made. Of course, it could be made, particularly getting the United States Government, as you were suggesting. I think that these gentlemen here were a little at cross purposes, because
you have been discussing for the investment trusts, the direct investments.

Schenker: No, the marketable securities. There is no reason why they can't make a contract, pay for it, and you delay delivery for securities.

Gifford: No, no. They divided it into three, there is the direct investment trusts, with the arrangement the Secretary was speaking of, possibly some government department taking over the whole on block, and then thirdly, the keeping to the direct investments which the investment companies may be interested in, I can't imagine there would be any difficulty there, because a contract with Courtauld to sell its Viscose holding, you obviously wouldn't worry about the delivery of the title deeds as long as you had a proper and good contract.

Bell: Do you know the names of these securities now?

Gifford: I don't, personally.

Bell: Are they available? That might be some difficulty.

White: There is a list.

Pinsent: We have a list, but I don't think it coincides with yours.

Gifford: That doesn't come within my purview.

H.V.Jr: Mr. Schenker asked how I felt if Lehman Brothers wanted to form their own group and I said fine.

Schenker: I am authorized to tell these people like Punker, 'If you don't want to go along with Cy Quinn's group, you can organize your own' and 'Mr. Dillon, you can organize yours,' and
you can have competitive bidding from these people or anybody.

Gifford: Well, don't just commit one too deeply as to what the method would be, but I am certainly seized of the point that you want to make that the investment trusts are available as competitors to buy the direct investments. That is the important thing.

E.W. Jr: And we don't want to keep any group out.

Gifford: No, clearly.

E.W. Jr: If there are four or five that have a little hit different setup and they want to group themselves together and bid on this thing, that is to your interest also.

Gifford: Of course.

E.W. Jr: Well then, I will wait until I hear from you. (Phillips) I am leaving town when the President leaves at three, and will be back Sunday night or Monday morning.

Phillips: Yes, sir. Could we go on a little with the point you have mentioned? I think we might — if you could give me the time.

E.W. Jr: Surely.

(Mr. Schenker left the conference.)

E.W. Jr: I am at your service.

Phillips: When you mentioned that third point, it carried my mind back to July. There was a scheme of that kind then, something resembling it, whereby the United States would buy certain quantities of tin and rubber and give credits on it, which
only broke down, if my recollection is right, because it appeared to the legal powers that the responsible department was limited to spending that money on commodities.

H.V. Jr: You are talking about your people?

Phillips: No, your people.

White: That was the bill in its original form, and it may be at that point it was discussed with you. As the bill finally emerged, that was not an essential requirement, although it was one of the things they hoped to accomplish by the bill, and a compromise was reached between the various groups that were interested in the bill, so that I think as it stands now, that is not an essential condition.

Phillips: Well, I understand that might have gone through much earlier this year if we hadn't been held up by the stipulation about buying agricultural commodities.

White: I see. I didn't know that they had had those discussions, but that definitely was the intent of the bill when it was first presented.

Pinsent: I took some part in those discussions and we realized the bill did not require that particular proceeding. In fact, we found that your departments did require it.

White: Well, it must have been before the bill passed.

Pinsent: No, it was after.

H.V. Jr: What bill is this, Harry?

White: That is a bill, you remember, in which there was some discussion of the Department of
Agriculture, State, Commerce, and so on, Jesse Jones, in which it enabled the RFC or some special corporation to purchase materials, pay for them in advance --

Particularly for the English?

White: No, it wasn't specified, and I don't-I imagine the English were one of those they had in mind, but they also had China in mind and others, and the Department of Agriculture had hoped to make credit available to England and other countries with which to purchase agricultural commodities through that device, a credit which would not be available in any other way, and then, unless I am grossly mistaken, the way it was finally worded it was so worded that they didn't necessarily have to buy agricultural products.

W. Jr: Well, you will have to start all over again, whatever it is.

White: The bill is there, and I think it permits --

W. Jr: Start all over again fresh.

Pimentel: I think Mr. White is right, Mr. Secretary. The bill does not make that requirement. It is at the discretion of the United States Government departments concerned either to make that requirement or not to make it, but we found when we discussed that they did wish to make it.

White: That might be very true. That is a matter of policy.

Bell: That was true. Grady headed the committee, you may recall, and he tried to get them to purchase agricultural materials with the indians made
available.

E.M. Jr: Foley, get into this thing and dig it all up.

Foley: This whole thing about buying wheat futures and buying against future delivery of tin bothers me a little bit, because it runs across the Neutrality Act, and it is in the nature of an extension of credit, which we can't do. We can buy and pay in cash.

E.M. Jr: But that wasn't Lovett's suggestion. Lovett's suggestion was to do it through a private corporation.

Foley: Well, it is the same thing.

E.M. Jr: But they could do it.

Foley: If it is a normal commercial transaction and they are paying for something in cash so that it is a sale rather than an extension of credit, it is all right; but the line is a narrow line and we have to be terribly careful that we are not extending credit against something that will be delivered a year or two years from now, which is out of the realm of the ordinary commercial transaction.

E.M. Jr: Well, Ed, nothing is easy these days. That is why I am asking you to do it. Get into it, will you?

Foley: Yes.

E.M. Jr: If anything is easy we - it would have been done before this, but explore the thing. If Agriculture is interested, if State is interested, and so forth and so on. Harry has got some
ideas he will give you.

Pinsent: We understood that that act of July overrode to that extent.

E.W. Jr: I am not familiar with it. I don't know about it.

Phillips: We will get right down to it.

E.W. Jr: Well, the first thing to find out is what have you got, where is it and who owns it, and is it for sale, you see.

Pinsent: There are running contracts in existence for tin and rubber.

E.W. Jr: I see.

White: Wool also might be a possibility.

Pinsent: Yes. I am not so sure about that.

Phillips: Tin and rubber. Have you got any other commodities?

White: Wool was the one that might run into something, but there might be something there.

Phillips: Jute.

E.W. Jr: Jute, burlap. As I say, where is it, who owns it, and is it for sale.

Now, what else do you want to ask?

Phillips: Well, about the other proposition, sir, about the marketable securities, I wasn't following your thought quite clearly, I am afraid.
Well, the thought is simply this, that we are thinking in terms of ruling some of the uncertainty of your financial situation and relieving you of some of the worry, that through some device which we haven't yet been able to work out that we simply, as I say, buy these on block.

Now, on what terms and basis I haven't thought, but the boys are thinking about it and I have got both Forrestal and Lovett thinking about it and their previous connections - the fact that they are in the Army and Navy - there is more and more military matter, so I am asking you to think about it, what do you think about it; if you could find a device, would you be prepared and what would you think a fair way to do it, you see.

Phillips: How is this linked up so with the finances of the interim period.

E.M. Jr: Well, it is all part of the same thing.

Phillips: Well, there was certain expenditure, was there not, for existing commitments in this interim period, certain other expenditure for new orders which we strongly hoped we should be able to place. Was it your thought that any money obtained by selling these securities on block should be used up in paying during the interim period for those?

H.M. Jr: I haven't thought it through.

Phillips: That seems to be the vital point.

H.M. Jr: Well, I don't know --

Foley: Well, it can or can't be. I mean, it seems to me if you have got orders and you need cash
to pay for the orders, this is a means of meeting those commitments. In so far as new commitments are concerned, it would be possible to meet your existing orders, pay for them, and then set this aside and hold it until such time as the legislation is obtained and the Army has material that you want to sell, or the Navy has material that you want to sell. You have got to have cash.

Phillips: That is absolutely true if that is the only source of cash, but not necessarily if we have other sources of cash. This way the whole of our cash is used up in the interim period. That was the point.

Foley: Well, I think he wants to know whether you want him to hold this money for purchase here or --

H.M. Jr: I can't answer that. Here is the situation.

Foley: For purchase here or for other purposes.

H.M. Jr: I can't get anybody outside of the Treasury to believe that your financial situation is what it is. Certainly the Navy doesn't believe it, Forrestal doesn't believe it, Hull doesn't believe it, and now they have got the President on it, and I have got a very, very difficult situation.

Now, I have just completely burned myself out to get this legislation ready in one week, and if we hadn't done it in the Treasury, God knows when it would have gone up on the Hill. We did absolutely the impossible. It has never been done before, the speed with which this thing was done. And I can't do but one thing at a time, and I hope to rest the brain - I am taking Harry White along on the train with me to keep me from sleeping, and I hope to come
back Monday a little bit refreshed, but here are certain devices of getting you some cash.

You asked me what the first thing was. In these many memoranda that come in from the British, somebody has written me several times that it would be a tragedy if you could not meet your daily bills. Now, I agree with you. Now certainly this would provide the cash for your daily bills. If you pressed me as to whether this cash was to be used for new orders, I would say, "Well, the first thing it will be used for is to pay your day to day bills."

Now, if there is enough to do something else with, I don't know. Now, my own position is — and I want you to know this, and I haven't changed one iota — there is nobody here in the Treasury that wants to strip the British Government, so that when this war is over and you people win it that you will be in a position to carry on.

Now, there is that thing and I am as strong an advocate to see that that position — that Britain will have that position when the war is over. In the meantime, there are some very difficult cross currents which I am trying to overcome, and that is why I think it is terribly important that you see Mr. Hull. He is going to be the first person. And somehow or other, he has got this entirely erroneous idea in his mind as to what your position is. So don't press me too much other than I want you for your own sake to have the necessary authority so that we can continue making the money available for you to pay your daily bills.

The President said to me yesterday, "Henry,
what about the first of March?" I gave him
the figures you gave me, showing him you would
be short 250 million dollars. I said,
"Mr. President, I don't know. I just don't
know." So I said, "The billion and a half
that they have got of direct investments and
listed securities is the figure that I have
kept in mind," is the money to be used to pay
for what you now have on order. Then to show
you how the thing was, what I am up against,
there were some people there that suggested
that if you were going to place - the first
suggestion was - you check me, because Foley
was there - that if you placed two billion
dollars worth of orders, that you could pay for
half of them, under the new plan, under this
new legislation, then we would go fifty-fifty.
Got 18 billion dollars worth of securities.
If you are going to place two billion dollars
worth of orders here - if we placed two billion
for you, there is no reason why you can't pay
for half. They are just pulling the wool over
my eyes. Isn't that the way it was first?

Foley: That is right.

H.M. Jr: Then after dragging me through that knothole,
then the next thing was well, if you place an
order for 5 billion, there is no reason why
they can't put up two or three billion as
security. Is that right?

Foley: That is right.

H.M. Jr: And then poor old Bill Knudsen, who sat here
when the others did and knows the figures, he
kept saying to me, 'No, no, no,' and I said,
"Yes, you are right, but I can't get it over."
So finally I got over to them that the billion
and a half, the total of the 6 and the 9, 9
direct investments and 6 - I had that memorandum
before me, was the billion and a half which I had in mind for the orders that you already had placed.

Now, you might say well, you want to save that, but I just want to let you know the steps that I was dragged through yesterday, from fifty-fifty, a couple of billion dollar securities, and then as a final thing I said we will—but Knudsen said, "Well now," he kept—because I have told him this, "that you have enough money for the orders that you have on hand," so there is an awful lot of educating to do. I can't do it all alone, and you fellows have got to keep up my morale too.

Phillips: We will do our very best.

H.M.Jr: It hasn't weakened yet, but I don't know anything that you can do to help your own selves, your own Government better, other than to ask for an hour with Mr. Hull; and then I think after you have done that and got to him, I think you had better ask to see Secretary Knox. I mean, I think you had better see Secretary Stimson. I mean, I would go right down the line and tell each one of them the story. I have done it until I am hoarse.

Now, I don't know what is the matter, but I certainly would ask for appointments to see Hull, Stimson, and Knox in their order, and then just deliver this thing home and help me do what I am doing single-handed; but it isn't that they don't want to understand, it isn't that we haven't—somebody else keeps feeding this to them. Jesse Jones, another fellow—"Oh, they have got lots of money." Jesse Jones—"Oh, they have got lots of money."

Cochran: Don't you think he ought to include Mr. Jones in his talk?
Phillips: Very well.

H.M.Jr: Yes. "Yes, they have got lots of money." We had them all here and put it all on the blackboard. We explained it all. Yesterday, Jones, "Oh, Henry is just a softie, he is too friendly with the British."

Phillips: Well, I will get onto that immediately.

H.M.Jr: They just think you have taken me into camp instead of knowing how rough I am with you.

Phillips: Yes.

H.M.Jr: But there is the situation.

Gifford: May I make one remark, Mr. Secretary? It is a great pity you have got a Neutrality Act, that we can't borrow against that supposed credit. That would be the easiest solution.
January 10, 1941
11:37 a.m.

H.M. Jr: ..... those English people in here.

Cordell Hull: Oh, yes, that's all right. I didn't have time to wait as it happened because I wanted the President to think over it too, but I was aiming to - I called you before breakfast and you had just left. I missed you there and then called you here. I said this to the President: this thing has been moving fast because everything is moving fast - this matter over at the Capitol today - and I said it might be worth considering whether you could without using dollars and cents indicate some fairly definite limitation of this British aid that would range somewhere between $5 billion without saying so in dollars and then as we go along you wouldn't have any trouble to extend it, and that would be a real saving thing here in this present situation.

H.M. Jr: What did he say?

H: He said that he thought very well of it and would - I asked him to talk with you, that I had happened to miss you in talking and there was no time to wait. So he said he would indicate something to his press. Well I said if you could work out formula before they introduce the bill - I said, I don't know that it's possible, it's something that takes time and study, that would approximate it in some way, why you would shut off an awful lot of demagoguery and so on, and so on and would serve the same purpose anyhow by extending it in the future.

H.M. Jr: I see.

H: But anyhow, he said he thought well of it and would bring it out to the press in his statement to the press today. Now, I don't know, I just mentioned it as a matter of precaution.

H.M. Jr: O.K. Now while I have you on the wire, I suggested to Sir Frederick Phillips that
he ask for an appointment to see you, and I would appreciate it if you would see him, because I'd like him to tell you himself what their financial situation is.

Yes. Well, now, I tried to make it clear yesterday that - just as we had talked before - that the last thing I would have in mind would be to strip them to the bone, you know, and seriously impair their situation to re-build as this thing eases up. The only thing is that if we are to give them that full measure of help that they are going to need I think and do it with great speed and without opposition and so on and so on. They could indicate that they haven't quit, that they are not going to ask us for more than we would feel that was our proper position in the matter and so on and so on. You see, there is going to be an increasing demand to know just how far we are going and how we're going and how far the British are going and what part they're going to play hereafter or whether it's all going to be dumped on us. Now I don't mean that literally - we understand that we won't let them dump it all on us; that is, disproportionately, but that's what the public will think if we're not careful.

Well, I had this meeting over at my office two or three weeks ago where I explained it to Knox, Stimson, and Welles and Feis were all here and I gave them the picture as the English gave it to us and our interpretation of their financial situation, and of course - I think yesterday you used the figure $18 billions worth of securities. Well, of course, they don't have anything like that.

Well, what I mean is that they - Great Britain proper has somewhere between $15 and $18 billions of property interests of all kinds in the world outside of Great Britain and she has been getting all the way from $700 million to, a few years ago, as high as $1 billion annual income from it. That's dividends, interest, returns from one kind of property or another. Take their
rubber, their tin interests, their gold interests, their utility interests, their woolen interests, their interests in all kind of industrial establishments and property they own of one kind and another in foreign countries or in the British Empire, Crown Colonies or the Dominion. Now that's what I mean - all together. Like you say in this country it is $900 millions of properties and $600 of the other, so altogether they've got $15 or $16 billions invested abroad.

H.M.Jr:  
Well ......

H:  
That's what I meant.

H.M.Jr:  
Yeah. Well, when the question comes, I mean, for them to put up some of their security owned outside in the world as collateral, I think it is something we ought to think over very carefully because, as I say, I'm convinced that these people have been giving me the facts as to what their salable securities are.

H:  
I know, we're not asking for salable ......

H.M.Jr:  
The other thing is just a question of how far we want to make them strip themselves.

H:  
Well, I know. The only thing is you're going to see as this thing goes on - you're going to see more and more controversy about everything being dumped on us.

H.M.Jr:  
Well, I'm afraid we're going to have to do it anyway and after we've taken all their gold and a billion and a half of their securities in this country, I don't know how much the rest of the stuff is worth.

H:  
Now, by the way, I noticed a quotation from The London Economist to the effect that the British, after allowing for the gold they've got over here - two hundred odd million - that they've still got $1 billion of gold that has accumulated in Africa.
E.M. Jr.: Well, that ...

E: Did you see that?

E.M. Jr.: No, I didn't. So that's why I'd like you to see Phillips and then you can get it direct from him.

E: Yes.

E.M. Jr.: He can give it to you direct.

E: Well, then, what I'm driving at, Henry, if they can't do anything else then we ought to see how much they can do at home in production and then let the country know frankly that we've got to take on .......

E.M. Jr.: Well, I'm in favor of telling the country exactly what the situation is. It's going to be a hell of a shock.

E: Yes, that's why I say it may shock us out of the Capitol over here, that's the reason I'm feeling around this way.

E.M. Jr.: Yeah, but where I differ a little bit from you, and you're most likely right, is that if we tell on the Hill what the actual facts are and realize that these people are worrying where they're going to get the money from to pay their bills two weeks hence, that the chances of getting the thing through is better than if we let them think that there is $16 billions worth of securities around. Now that's an honest difference of opinion, but I say you're most likely right but I would like you to just think about my angle on it.

E: Well, I'm just trying to - of course, I'm sorry I was in that conference yesterday because it's new stuff and I just butted in with those statements like I did with you the day before.

E.M. Jr.: Well, what we're trying to do is to be helpful and I think your being there was most important.
E:  Well, it's all right to raise these questions anyway, I think.

E.M. Jr.:  Well, I'm raising it now with you and I say you may be right ..... 

E:  Well, no.

E.M. Jr.:  There are two definite ways to go up there: One way is to get England's permission to tell the true story of their Treasury and ......

E:  I think if you do that you're liable to cause a collapse in the whole British fighting situation.

E.M. Jr.:  Well, I'm not going to do anything without talking it over with the President and you first.

E:  Yeah. That's my - they'd say, well, the bottom is out and Canada was right that we have stepped in just in time to take on our lap a lost war.

E.M. Jr.:  Well, Cordell, before I go on ..... 

E:  I'm talking, you know, in terms of these fellows who'll be bringing out things critically.

E.M. Jr.:  Well, before I go on the Hill, I'm going to ask you to let me have a dress rehearsal with you.

E:  Well, of course, I'm at your service.

E.M. Jr.:  So I'm not going up there until I have a dress rehearsal with you and then I want your advice.

E:  All right, Henry.

E.M. Jr.:  Thank you.
January 10, 1941
12:17 p.m.

H.M. Jr: Hello.
Operator: Postmaster General.
Frank Walker: Hello, Henry.
H.M. Jr: Yes.
W: This is Frank Walker.
H.M. Jr: Good morning.
W: How are you?
H.M. Jr: I'm all right.
W: Say, Republic Aviation fellows called me to say that they have tied up $1,600,000 and that they're in hell's hole financially and need the money so I want to know if they can't get it right away.

H.M. Jr: Well, they can get it but that's one of the things that we had this thing fixed up in this Executive Order yesterday that Hull was complaining about - put it all in one place, but this fellow, Colonel Maxwell, who is under the President sent it to the President sent it over to me and now I've sent it back to the President and that's where it is.

W: Will that go out today, do you think?
H.M. Jr: I doubt it. It'll go out of here today.
W: Well, when do you think it'll get to them?
H.M. Jr: Oh, I don't know, Frank.
W: They say they're in hell's hole for money and that is a lot of money for them to carry. It'll go back to the President today, will it?
H.M. Jr: Oh, yes. I signed it. It's on the way now.
W: Uh-huh. They're keeping you pretty busy, Mr. Morgenthau.

H.M. Jr: What?

W: They're keeping you pretty busy, aren't they?

H.M. Jr: Me?

W: Yeah.

H.M. Jr: Too busy.

W: Uh-huh.

H.M. Jr: Well, I'm glad you brought it to my attention.

W: All right, Henry.

H.M. Jr: Thank you.

W: So long.
H.M.Jr: Hello.

Herbert Feis: I've just had a long and not-too-easy session.

H.M.Jr: Yeah. Would you talk a little louder?

F: Did you hear what I just said? I just had a long and not-too-easy session.

H.M.Jr: Yeah.

F: You heard the Secretary's presentation at the meeting at the White House yesterday so there is no use in my reciting that again, and he went over it with me. Now I found this most nearly expressive of both my own judgment and of the most immediately useful. I tried to convince him that the issue was financial assistance to Britain to enable them to continue the war, that that has been put before the American people in these terms, that we would become the arsenal of democracy, that the immediate task was to get for the Executive enough authority to carry out that task. Congress is being asked to give that authority, that I thought it would be extremely unwise and greatly add to the burden if our discussion of that problem with Congress was complicated by a discussion of what security, collateral or otherwise, we were going to seek from the British in return for this financial assistance.....

H.M.Jr: Yeah.

F: ..... that there were two problems connected but not necessarily connected in dealing with Congress and if the matter could be put before Congress without raising any sharp or important fashion the second question, the business of getting the legislation through, which is all important at this present time, would be much simpler. I think I made a certain impression on him along that point of view and that's the main thing I'd like to get across to you.
E.M.Jr: Yeah. Swell.

F: Now beyond that I then said as this help is extended to the British under this legislation, the Executive can discuss questions of collateral security in any form it so wishes. When that comes up perhaps you, Mr. Hull, are correct in your judgment that security of a type and amount should be had, and we can do it and perhaps should do it, but, then you'll have to reappraise your statistical material and then I went over the character of that estimate of $16 or $18 billions, the fact that it was based on par values and that it was related to a period quite far in the past, et cetera, et cetera, et cetera.

E.M.Jr: Right.

F: So that's what I've done so far.

E.M.Jr: O.K. Thank you.

F: Right. Have you got another minute or two?

F: He's going to see Phillips tomorrow and I think he's trying to wonder whether this way of proceeding that I put forward is feasible or whether we're going to rush so quickly in giving authorization to the British to place these orders that any chance to get collateral is going to be lost. Am I making myself clear?

E.M.Jr: Yeah, but nobody can answer that.

F: No. I couldn't. I didn't know.

E.M.Jr: Nobody can answer that. Is he afraid the bill is going to go through too quickly?

F: No. He's afraid that, presumably you - I take it it would be you or the President - would so quickly authorize the British to
place their whole '41 and '42 and '43 program that the possibility of seeking collateral would be lost if he follows the line of action I suggested, of leaving that out of account during the discussions down in Congress. You see?

H.M.Jr: Well, the whole idea of collateral anyway - I mean it's obnoxious unless you want to so destroy these people's morale that they're going to make peace. Now if that's what they want this is a beautiful way to do it and I don't think Congress is going to ask for it.

F: I - and I said to him - in my judgment, 80% of the American people would stand behind the passage of this bill without at the time of passing the bill raising the question of collateral.

H.M.Jr: Well, I think you're right.

F: When you once get the authority, it might well be that the President or yourself or Mr. Hull will want to sit down. For example, there is one item - I must confess it's new to me, Henry - in the Economist that asserts that Great Britain has an unrecorded stock of gold down in South Africa of 200 million pounds.

H.M.Jr: Well, it isn't true.

F: Well, I just couldn't say - I said I hadn't heard of it, but there it was.

H.M.Jr: Well, if it's there, it's either The Economist or Phillips isn't telling the truth and I'll take Phillips' word for it.

F: Well, that's what I've done so far; I'll keep working at it.

H.M.Jr: Thank you so much. I think it's very helpful.

F: Right. Good-bye.
The bill as it was discussed at the White House on January 9 with the Congressional Leaders and as it is being introduced today, January 10.

The attached bill giving effect to President Roosevelt’s lend-lease proposals will be introduced simultaneously when Congress meets at noon today by Senator Barkley and Representative McCormack, the two Majority Leaders.

The bill simply translates into legislative form the policy of making this country the arsenal for the democracies, and seeks to carry out President Roosevelt’s pledge to send to these countries, “in ever increasing numbers, ships, planes, tanks, guns.”

It follows the precedent established by Congress last June when the President was empowered to authorize the Secretaries of War and Navy to manufacture, purchase and repair war materials for the American republics. Under the present bill, this country is enabled to furnish war materials of every kind to any country whose defense the President considers to be vital to the defense of the United States. The chief provisions of this bill enable the United States—

To manufacture war defense materials for such countries as Government-owned arsenals, factories, and shipyards;

Our Government will only order for foreign governments such materials as our Army and Navy can use. This means that we shall be producing the same material for our friends as for ourselves. It should eliminate double assembly lines in our factories and should help to standardize our war materials among the democracies. The power to manufacture under this provision does not carry with it a waiver of the Wagner-Hour Act, the Walsh-Healy Act, the Wagner Act, and similar domestic legislation.

To procure or purchase any war materials from our own war airplane plants, shipyards, or other factories;

It will be for the President to decide the conditions and the manner in which foreign governments can obtain war materials under this provision.

To sell, lease, lend, or otherwise dispose of any war materials to any country whose defense is vital to the defense of the United States.
The President can, under this section, dispose of new material as well as equipment now in the hands of our Army or Navy, according to our own needs as he sees them. A sale or lease of such articles can provide for payment in kind, or for any direct or indirect benefit to the United States. A certificate from our Chief of Staff or Chief of Naval Operations will no longer be needed. A transfer of defense material can be made, in the President's discretion, without the formality of public advertisement or without the other restrictions which now apply to the disposition of Government property.

No test, repair, outfit, or otherwise to place in good working order any defense article;

This would apply equally to defense articles whether manufactured in the United States or not. It could conceivably mean, for example, that the British battle cruiser HUMANS could be repaired in the Brooklyn Navy Yard if the President considered it in the interest of our national defense to do so. The provision is broad enough to permit the use of any of our military, naval, or air bases to outfit and repair the weapons of countries whose defense is vital to the defense of the United States.

To communicate to any such government information pertaining to any defense article furnished to such government under the proposed bill;

This section gives the President the discretion to make available designs, blueprints, and other information for using particular equipment. Such information would relate only to defense articles actually supplied to foreign nations under this bill.

To release any defense article for export;

This eliminates restrictions in the Neutrality Act of 1917 and in the Neutrality Act of July 2, 1940 against the exportation of certain war materials. It does not, however, authorize the use of American vessels to deliver war materials to combat areas.

In addition, the proposed bill forbids any foreign country which obtains defense articles or defense information from the United States from transferring them to any other country without the President's consent. It also enables the United States to buy war materials in the American republics, Canada, or other countries whose defense is vital to ourselves, if such materials are not readily obtainable in this country.
While the bill contains an authorization for an appropriation, full effect cannot be given to its provisions until appropriations are actually provided by Congress.
A BILL

To further promote the defense of the United States, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "An Act to promote the Defense of the United States."

Sec. 2. As used in this Act —

(a) The term "defense article" means:

(1) Any weapon, munition, aircraft, vessel, or boat;

(2) Any machinery, facility, tool, material, or supply necessary for the manufacture, production, processing, repair, servicing, or operation of any article described in this subsection;

(3) Any component material or part of or equipment for any article described in this subsection;

(4) Any other commodity or article for defense.

Such term "defense article" includes any article described in this subsection: Manufactured or procured pursuant to section 3; or to which the United States or any foreign government has or hereafter acquires title, possession, or control.

(b) The term "defense information" means any plan, specification, design, prototype, or information pertaining to any defense article.
Sec. 3(a). Notwithstanding the provisions of any other law, the President may, from time to time, when he deems it in the interest of national defense, authorize the Secretary of War, the Secretary of the Navy, or the head of any other department or agency of the Government:

1. To manufacture in arsenals, factories, and workshops under their jurisdiction, or otherwise procure, any defense article for the government of any country whose defense the President deem vital to the defense of the United States.

2. To sell, transfer, exchange, lease, lend, or otherwise dispose of, to any such government any defense article.

3. To test, inspect, prove, repair, maintain, condition, or otherwise to place in good working order any defense article for any such government.

4. To communicate to any such government any defense information, pertaining to any defense article furnished to such government under paragraph (2) of this subsection.

5. To release for export any defense article to any such government.

6. The terms and conditions upon which any such foreign government receives any aid authorized under subsection (a) shall be those which the President deems satisfactory, and the benefits to the
United States may be payment or compensation in kind or property, or any
other direct or indirect benefit which the President deems satisfactory.

Sec. 4. All contracts or agreements made for the disposition of
any defense article or defense information pursuant to section 3 shall
contain a clause by which the foreign government undertakes that it
will not, without the consent of the President, transfer title to or
possession of such defense article or defense information by gift, sale,
or otherwise, or permit the use by anyone not an officer, employee, or
agent of such foreign government.

Sec. 5. The Secretary of War, the Secretary of the Navy, or the
head of any other department or agency of the Government involved shall,
then any such defense article or defense information is exported,
immediately inform the department or agency designated by the President
to administer section 2 of the Act of July 2, 1940 (54 Stat. 714), of the
quantities, character, value, terms of disposition, and destination
of the article and information so exported.

Sec. 5(a). There is hereby authorized to be appropriated from time
to time, out of any money in the Treasury not otherwise appropriated,
such amounts as may be necessary to carry out the provisions and
accomplish the purposes of this Act.

(b) All money and all property which is converted into money
received under section 3 from any government shall, with the approval
of the Director of the Budget, revert to the respective appropriation or
appropriations out of which fines were expended with respect to the
defense article or defense information for which such consideration is received, and shall be available for expenditure for the purpose for which such expended funds were appropriated by law, during the fiscal year in which such funds are received and the ensuing fiscal year.

Sec. 7. The Secretary of War, the Secretary of the Navy, and the head of the department or agency shall in all contracts or agreements for the disposition of any defense article or defense information fully protect the rights of all citizens of the United States who have patent rights in and to any such article or information which is hereby authorized to be disposed of and the payments collected for royalties on such patents shall be paid to the owners and holders of such patents.

Sec. 8. The Secretaries of War and of the Navy are hereby authorized to purchase or otherwise acquire arms, ammunition, and implements of war produced within the jurisdiction of any country to which section 3 is applicable, whenever the President deems such purchase or acquisition to be necessary in the interests of the defense of the United States.

Sec. 9. The President may, from time to time, promulgate such rules and regulations as may be necessary and proper to carry out any of the provisions of this Act; and he may exercise any power or authority conferred on him by this Act through such department, agency, or officer as he shall direct.
January 10, 1941

Press release prepared for Senator Barkley and also requested by Speaker Rayburn (and also furnished to him) for use at press conference today explaining the Lease-Lend Bill.
The attached bill giving effect to President Roosevelt's lend-lease proposals will be introduced simultaneously when Congress meets at noon today by Senator Barkley and Representative McCormack, the two Majority Leaders.

The bill simply translates into legislative form the policy of making this country the arsenal for the democracies, and seeks to carry out President Roosevelt's pledge to send to these countries, "in ever increasing numbers, ships, planes, tanks, guns".

It follows the precedent established by Congress last June when the President was empowered to authorize the Secretaries of War and Navy to manufacture, purchase and repair war materials for the American republics. Under the present bill, this country is enabled to furnish war materials of every kind to any country whose defense the President considers to be vital to the defense of the United States. The chief provisions of this bill enable the United States——

To manufacture war defense materials for such countries in Government-owned arsenals, factories, and shipyards;

Our Government will only order for foreign governments such materials as our Army and Navy can use. This means that we shall be producing the same material for our friends as for ourselves. It should eliminate double assembly lines in our factories and should help to standardize our war materials among the democracies. The power to manufacture under this provision does not carry with it a waiver of the Eight-Hour Act, the Walsh-Healy Act, the Wagner Act, and similar domestic legislation.

To procure or purchase any war materials from our private airplane plants, shipyards, or other factories;

It will be for the President to decide the conditions and the manner in which foreign governments can obtain war materials under this provision.

To sell, lease, lend, or otherwise dispose of any war materials to any country whose defense is vital to the defense of the United States;
The President can, under this section, dispose of new material as well as equipment now in the hands of our Army or Navy, according to our own needs as he sees them. A sale or lease of such articles can provide for payment in kind, or for any direct or indirect benefit to the United States. A certificate from our Chief of Staff or Chief of Naval Operations will no longer be needed. A transfer of defense material can be made, in the President’s discretion, without the formality of public advertisement or without the other restrictions which now apply to the disposition of Government property.

To test, repair, outfit, or otherwise to place in good working order any defense article;

This would apply equally to defense articles whether manufactured in the United States or not. It could conceivably mean, for example, that the British battle cruiser HONOLULU could be repaired in the Brooklyn Navy Yard if the President considered it in the interest of our national defense to do so. The provision is broad enough to permit the use of any of our military, naval, or air bases to outfit and repair the weapons of countries whose defense is vital to the defense of the United States.

To communicate to any such government information pertaining to any defense article furnished to such government under the proposed bill;

This section gives the President the discretion to make available designs, blueprints, and other information for using particular equipment. Such information would relate only to defense articles actually supplied to foreign nations under this bill.

To release any defense article for export;

This eliminates restrictions in the Espionage Act of 1917 and in the Embargo Act of July 2, 1910 against the exportation of certain war materials. It does not, however, authorize the use of American vessels to deliver war materials to combat areas.

In addition, the proposed bill forbids any foreign country which obtains defense articles or defense information from the United States from transferring them to any other country without the President’s consent. It also enables the United States to buy war materials in the American republics, Canada, or other countries whose defense is vital to ourselves, if such materials are not readily obtainable in this country.
While the bill contains an authorization for an appropriation, full effect cannot be given to its provisions until appropriations are actually provided by Congress.
A BILL

To further promote the defense of the United States, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "An Act to promote the Defense of the United States."

Sec. 2. As used in this Act —

(a) The term "defense article" means:

(1) Any weapon, munition, aircraft, vessel, or boat;

(2) Any machinery, facility, tool, material, or supply necessary for the manufacture, production, processing, repair, servicing, or operation of any article described in this subsection;

(3) Any component material or part of or equipment for any article described in this subsection;

(4) Any other commodity or article for defense.

Such term "defense article" includes any article described in this subsection: Manufactured or procured pursuant to section 3; or to which the United States or any foreign government has or hereafter acquires title, possession, or control.

(b) The term "defense information" means any plan, specification, design, prototype, or information pertaining to any defense article.
Sec. 3(a). Notwithstanding the provisions of any other law, the President may, from time to time, when he deems it in the interest of national defense, authorize the Secretary of War, the Secretary of the Navy, or the head of any other department or agency of the Government:

(1) To manufacture in arsenals, factories, and shipyards under their jurisdiction, or otherwise procure, any defense article for the government of any country whose defense the President deems vital to the defense of the United States.

(2) To sell, transfer, exchange, lease, lend, or otherwise dispose of, to any such government any defense article.

(3) To test, inspect, prove, repair, outfit, recondition, or otherwise to place in good working order any defense article for any such government.

(4) To communicate to any such government any defense information, pertaining to any defense article furnished to such government under paragraph (2) of this subsection.

(5) To release for export any defense article to any such government.

(b) The terms and conditions upon which any such foreign government receives any aid authorized under subsection (a) shall be those which the President deems satisfactory, and the benefit to the
United States may be payment or repayment in kind or property, or any other direct or indirect benefit which the President deems satisfactory.

Sec. 4. All contracts or agreements made for the disposition of any defense article or defense information pursuant to section 3 shall contain a clause by which the foreign government undertakes that it will not, without the consent of the President, transfer title to or possession of such defense article or defense information by gift, sale, or otherwise, or permit its use by anyone not an officer, employee, or agent of such foreign government.

Sec. 5. The Secretary of War, the Secretary of the Navy, or the head of any other department or agency of the Government involved shall, when any such defense article or defense information is exported, immediately inform the department or agency designated by the President to administer section 6 of the Act of July 2, 1940 (54 Stat. 714), of the quantities, character, value, terms of disposition, and destination of the article and information so exported.

Sec. 6(a). There is hereby authorized to be appropriated from time to time, out of any money in the Treasury not otherwise appropriated, such amounts as may be necessary to carry out the provisions and accomplish the purposes of this Act.

(b) All money and all property which is converted into money received under section 3 from any government shall, with the approval of the Director of the Budget, revert to the respective appropriation or appropriations out of which funds were expended with respect to the
defense article or defense information for which such consideration is received, and shall be available for expenditure for the purpose for which such expended funds were appropriated by law, during the fiscal year in which such funds are received and the ensuing fiscal year.

Sec. 7. The Secretary of War, the Secretary of the Navy, and the head of the department or agency shall in all contracts or agreements for the disposition of any defense article or defense information fully protect the rights of all citizens of the United States who have patent rights in and to any such article or information which is hereby authorized to be disposed of and the payments collected for royalties on such patents shall be paid to the owners and holders of such patents.

Sec. 8. The Secretaries of War and of the Navy are hereby authorized to purchase or otherwise acquire arms, ammunition, and implements of war produced within the jurisdiction of any country to which section 3 is applicable, whenever the President deems such purchase or acquisition to be necessary in the interests of the defense of the United States.

Sec. 9. The President may, from time to time, promulgate such rules and regulations as may be necessary and proper to carry out any of the provisions of this Act; and he may exercise any power or authority conferred on him by this Act through such department, agency, or officer as he shall direct.
H. R. 1776

IN THE HOUSE OF REPRESENTATIVES

January 10, 1941

Mr. McCormack introduced the following bill; which was referred to the Committee on Foreign Affairs

A BILL

Further to promote the defense of the United States, and for other purposes.

1

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

2

That this Act may be cited as "An Act to Promote the Defense of the United States".

3

Sec. 2. As used in this Act—

4

(a) The term "defense article" means—

5

(1) Any weapon, munition, aircraft, vessel, or boat;

6

(2) Any machinery, facility, tool, material, or supply necessary for the manufacture, production, proc-
(1) To manufacture in arsenals, factories, and shipyards under their jurisdiction, or otherwise procure, any defense article for the government of any country whose defense the President deems vital to the defense of the United States.

(2) To sell, transfer, exchange, lease, lend, or otherwise dispose of, to any such government any defense article.

(3) To test, inspect, prove, repair, outfit, recondition, or otherwise to place in good working order any defense article for any such government.

(4) To communicate to any such government any defense information, pertaining to any defense article furnished to such government under paragraph (2) of this subsection.

(5) To release for export any defense article to any such government.

(b) The terms and conditions upon which any such foreign government receives any aid authorized under subsection (a) shall be those which the President deems satisfactory, and the benefit to the United States may be payment or repayment in kind or property, or any other direct or indirect benefit which the President deems satisfactory.

Sec. 4. All contracts or agreements made for the disposition of any defense article or defense information pursuant to section 3 shall contain a clause by which the foreign government undertakes that it will not, without the consent of the President, transfer title to or possession of such defense article or defense information by sale, lease, or otherwise,
or permit its use by anyone not an officer, employee, or agent of such foreign government.

SEC. 5. The Secretary of War, the Secretary of the Navy, or the head of any other department or agency of the Government involved shall, when any such defense article or defense information is exported, immediately inform the department or agency designated by the President to administer section 6 of the Act of July 2, 1940 (54 Stat. 714), of the quantities, character, value, terms of disposition, and destination of the article and information so exported.

SEC. 6. (a) There is hereby authorized to be appropriated from time to time, out of any money in the Treasury not otherwise appropriated, such amounts as may be necessary to carry out the provisions and accomplish the purposes of this Act.

(b) All money and all property which is converted into money received under section 3 from any government shall, with the approval of the Director of the Budget, revert to the respective appropriation or appropriations out of which funds were expended with respect to the defense article or defense information for which such consideration is received, and shall be available for expenditure for the purpose for which such expended funds were appropriated.

SEC. 7. The Secretary of War, the Secretary of the Navy, and the head of the department or agency shall in all contracts or agreements for the disposition of any defense article or defense information fully protect the rights of all citizens of the United States who have patent rights in and to any such article or information which is hereby authorized to be disposed of and the payments collected for royalties on such patents shall be paid to the owners and holders of such patents.

SEC. 8. The Secretaries of War and of the Navy are hereby authorized to purchase or otherwise acquire arms, ammunition, and implements of war produced within the jurisdiction of any country to which section 3 is applicable, whenever the President deems such purchase or acquisition to be necessary in the interests of the defense of the United States.

SEC. 9. The President may, from time to time, promulgate such rules and regulations as may be necessary and proper to carry out any of the provisions of this Act; and he may exercise any power or authority conferred on him by this Act through such department, agency, or officer as he shall direct.
A BILL

Further to promote the defense of the United States, and for other purposes.

1. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "An Act to promote the defense of the United States".

SEC. 2. As used in this Act—

(a) The term "defense article" means—

(1) Any weapon, munition, aircraft, vessel, or boat;

(2) Any machinery, facility, tool, material, or supply necessary for the manufacture, production, proc-
essing, repair, servicing, or operation of any article described in this subsection;

(3) Any component material or part of or equipment for any article described in this subsection;

(4) Any other commodity or article for defense.

Such term "defense article" includes any article described in this subsection: Manufactured or procured pursuant to section 3, or to which the United States or any foreign government has or hereafter acquires title, possession, or control.

(b) The term "defense information" means any plan, specification, design, prototype, or information pertaining to any defense article.

Sec. 3. (a) Notwithstanding the provisions of any other law, the President may, from time to time, when he deems it in the interest of national defense, authorize the Secretary of War, the Secretary of the Navy, or the head of any other department or agency of the Government—

(1) To manufacture in arsenals, factories, and shipyards under their jurisdiction, or otherwise procure, any defense article for the government of any country whose defense the President deems vital to the defense of the United States.

(2) To sell, transfer, exchange, lease, lend, or otherwise dispose of, to any such government any defense article.

(3) To test, inspect, prove, repair, maintain, or otherwise to place in good working order any defense article for any such government.

(4) To communicate to any such government the defense information pertaining to any defense article furnished to such government under paragraph (2) of this subsection.

(5) To receive by export any defense article by any such government.

(b) The terms and conditions upon which any such foreign government receives any such defense article, shall be those which the President deems satisfactory, and the benefit to the United States shall be payment or repayment in kind of property or any other direct or indirect benefit which the President deems satisfactory.

Sec. 4. All contracts or agreements made for the disposition of any defense article or defense information pursuant to section 2 shall contain a clause by which the foreign government undertakes that it will not, without the consent of the President, transfer title to or possession of such defense article or defense information by gift, sale, or otherwise.
in this act, through such department, agency, or office as he may designate and shall be so assigned for the purposes of this act and be in proper condition and of the powers of the act and be in proper condition and of the powers of the act.

3. The President may, from time to time, appoint such officers as the President may determine and such officers as the President may determine.

4. The President may, from time to time, appoint such officers as the President may determine.

5. The President may, from time to time, appoint such officers as the President may determine.

6. The President may, from time to time, appoint such officers as the President may determine.

7. The President may, from time to time, appoint such officers as the President may determine.

8. The President may, from time to time, appoint such officers as the President may determine.

9. The President may, from time to time, appoint such officers as the President may determine.

10. The President may, from time to time, appoint such officers as the President may determine.

11. The President may, from time to time, appoint such officers as the President may determine.

12. The President may, from time to time, appoint such officers as the President may determine.

13. The President may, from time to time, appoint such officers as the President may determine.

14. The President may, from time to time, appoint such officers as the President may determine.

15. The President may, from time to time, appoint such officers as the President may determine.

16. The President may, from time to time, appoint such officers as the President may determine.

17. The President may, from time to time, appoint such officers as the President may determine.

18. The President may, from time to time, appoint such officers as the President may determine.

19. The President may, from time to time, appoint such officers as the President may determine.

20. The President may, from time to time, appoint such officers as the President may determine.

21. The President may, from time to time, appoint such officers as the President may determine.

22. The President may, from time to time, appoint such officers as the President may determine.

23. The President may, from time to time, appoint such officers as the President may determine.

24. The President may, from time to time, appoint such officers as the President may determine.

25. The President may, from time to time, appoint such officers as the President may determine.

26. The President may, from time to time, appoint such officers as the President may determine.

27. The President may, from time to time, appoint such officers as the President may determine.

28. The President may, from time to time, appoint such officers as the President may determine.

29. The President may, from time to time, appoint such officers as the President may determine.

31. The President may, from time to time, appoint such officers as the President may determine.

32. The President may, from time to time, appoint such officers as the President may determine.

33. The President may, from time to time, appoint such officers as the President may determine.

34. The President may, from time to time, appoint such officers as the President may determine.

35. The President may, from time to time, appoint such officers as the President may determine.

36. The President may, from time to time, appoint such officers as the President may determine.

37. The President may, from time to time, appoint such officers as the President may determine.

38. The President may, from time to time, appoint such officers as the President may determine.

39. The President may, from time to time, appoint such officers as the President may determine.

40. The President may, from time to time, appoint such officers as the President may determine.
H. R. 1776

IN THE HOUSE OF REPRESENTATIVES

JANUARY 10, 1941

Mr. McCormack introduced the following bill; which was referred to the Committee on Foreign Affairs

A BILL

Further to promote the defense of the United States, and for other purposes.

1. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

2. That this Act may be cited as "An Act to Promote the Defense of the United States".

3. SEC. 2. As used in this Act—

(a) The term "defense article" means—

1. Any weapon, munition, aircraft, vessel, or boat;

2. Any machinery, facility, tool, material, or supply necessary for the manufacture, production, proce-
eressing, repair, servicing, or operation of any article
described in this subsection;
(3) Any component material or part of or equipment
for any article described in this subsection;
(4) Any other commodity or article for defense.
Such term "defense article" includes any article described
in this subsection: Manufactured or procured pursuant to
section 2, or to which the United States or any foreign
government has or hereafter acquires title, possession, or
control.
(b) The term "defense information" means any plan,
specification, design, prototype, or information pertaining to
any defense article.
SEC. 3. (a) Notwithstanding the provisions of any
other law, the President may, from time to time, when he
deems it in the interest of national defense, authorize the
Secretary of War, the Secretary of the Navy, or the head
of any other department or agency of the Government—
(1) To manufacture in arsenals, factories, and ship-
yards under their jurisdiction, or otherwise procure, any
defense article for the government of any country whose
defense the President deems vital to the defense of the
United States.
(2) To sell, transfer, exchange, lease, lend, or
otherwise dispose of, to any such government any defense
article.
(3) To test, inspect, prove, repair, outfit, recondi-
tion, or otherwise to place in good working order any
defense article for any such government.
(4) To communicate to any such government any
defense information, pertaining to any defense article
furnished to such government under paragraph (2) of
this subsection.
(5) To release for export any defense article to
any such government.
(b) The terms and conditions upon which any such
foreign government receives any aid authorized under sub-
section (a) shall be those which the President deems
satisfactory, and the benefit to the United States may be
payment or repayment in kind or property, or any other
direct or indirect benefit which the President deems
satisfactory.
SEC. 4. All contracts or agreements made for the dis-
position of any defense article or defense information pur-
suant to section 3 shall contain a clause by which the foreign
government undertakes that it will not, without the consent
of the President, transfer title to or possession of such defense
article or defense information by gift, sale, or otherwise,
1 or permit its use by anyone not an officer, employee, or
2 agent of such foreign government.
3 SEC. 5. The Secretary of War, the Secretary of the
4 Navy, or the head of any other department or agency of
5 the Government involved shall, when any such defense ar-
6 ticle or defense information is exported immediately inform
7 the department or agency designated by the President to
8 administer section 6 of the Act of July 2, 1940 (54 Stat.
9 714), of the quantities, character, value, terms of disposi-
10 tion, and destination of the article and information so
11 exported.
12 SEC. 6. (a) There is hereby authorized to be appro-
13 priated from time to time, out of any money in the Treasury
14 not otherwise appropriated, such amounts as may be neces-
15 sary to carry out the provisions and accomplish the purposes
16 of this Act.
17 (b) All money and all property which is converted
18 into money received under section 3 from any government
19 shall, with the approval of the Director of the Budget,
20 revert to the respective appropriation or appropriations out
21 of which funds were expended with respect to the defense
22 article or defense information for which such consideration
23 is received, and shall be available for expenditure for the
24 purpose for which such expended funds were appropriated
25 by law, during the fiscal year in which such funds are
26 received and the ensuing fiscal year.
27 SEC. 7. The Secretary of War, the Secretary of the
28 Navy, and the head of the department or agency shall in all
29 contracts or agreements for the disposition of any defense
30 article or defense information fully protect the rights of all
31 citizens of the United States who have patent rights in and
32 to any such article or information which is hereby authorized
33 to be disposed of and the payments collected for royalties on
34 such patents shall be paid to the owners and holders of such
35 patents.
36 SEC. 8. The Secretaries of War and of the Navy are
37 hereby authorized to purchase or otherwise acquire arms,
38 ammunition, and implements of war produced within the
39 jurisdiction of any country to which section 3 is applicable,
40 whenever the President deems such purchase or acquisition
41 to be necessary in the interests of the defense of the United
42 States.
43 SEC. 9. The President may, from time to time, promul-
44 gate such rules and regulations as may be necessary and
45 proper to carry out any of the provisions of this Act: and he
46 may exercise any power or authority conferred on him by
47 this Act through such department, agency, or officer as he
48 shall direct.
A BILL

H.R.1776
Gas Bill Today
Giving Roosevelt Full Power
For All-Out Aid to Britain

Cabinet, Capital
Chiefs Agree on
Loan-Lease Method

By ERNEST MACHIELS

An extraordinary White House conference and discussion on the way the House expectations in Congress today of President Roosevelt to give the all-out America full power to provide military aid to Britain.

Mr. Roosevelt said in his budget message that we are taking all actions and other means to acquire the 75 million dollars needed to carry out the conference.

There were reports that the conference was expected to take place on Monday, but it was announced that it would be postponed.

It will be carried out by the President and senior officials.

Congress Unanimous

Details were not revealed immediately, but it was announced that the House of Commons and the conference was to be attended by the President, the Secretary of State, the Secretary of the Treasury, the Secretary of War, and the Secretary of the Navy.

The conference will be attended by representatives of the House and Senate.

There will be a discussion on the conference.

Secretary of State Cordell Hull, Secretary of the Treasury William Woodin, Secretary of War Henry L. Stimson, Secretary of the Navy Frank Knox, and Secretary of Commerce will attend.

In preparing for the conference, Mr. Roosevelt said that he was determined to see that the conference was carried out as quickly as possible.

There was no indication that the conference will last more than a few days.

Regraded Unclassified
January 10, 1941

To: Mrs. Elliott
From: Mr. Young

Attached herewith are five memoranda for the Secretary, all dated January 10th, and all for his information. There are also attached two letters attached addressed to Secretary Hull for the Secretary's signature, one concerning the National Munitions Control Board, and the other in respect to the note which you transmitted to me this morning. With respect to this letter to Secretary Hull on the 300 F-4C planes, there is attached my conference notes on that meeting in case the Secretary should like to send them along too.
January 10, 1942

To: The Secretary

From: Mr. Young

Subject: French F-40s

As a result of your conference with Sir Hugh Dowding the other day, you asked for information concerning the number of French F-40s taken over by the British.

I attach herewith a memorandum which I received from the British Purchasing Commission giving additional information.
1. We took over 315 P-40s ordered by the French and our own contracts cover 765. The French type planes were scheduled to be delivered first.

2. The French planes were being built around French type guns, radio, etc., and had to be adapted to meet British requirements, since the French had intended to install their equipment on arrival in France. It was not found possible to complete the modifications in the U.S.A. and an appreciable amount of work had to be done in England.

3. The 316th plane was shipped late in November. Allowing for shipping and re-assembly time, together with the necessity of forming a complete squadron before commencing the required intensive personnel training, it is estimated that these planes will not be in combat before late in February.

4. Approximately 500 P-40s have been shipped to England. It is believed the remainder will be shipped to the Middle East via Takoradi.

Washington, D.C.

To: The Secretary
From: Mr. Young
Subject: Priorities

This office has had no comment and received no information from Mr. Knudsen since filing 13 foreign priority requests with him last Tuesday. Seven of these requests were British, 5 were Dutch and 1 was South American (Pan American Grace Airways, Incorporated.)

We are planning to continue this procedure and file a number of additional requests by Monday.
To: The Secretary

From: Mr. Young

Subject: Availability of Unexpended Navy Appropriations.

I had a chat with Mr. Forrestal last night concerning the possibility of the Navy finding unexpended appropriations which might be used to help the British.

This morning Mr. Wise in Secretary Knox's office called to say that he had been looking into the matter and that the Navy would have some money available. I told him briefly about the memorandum I sent you yesterday with respect to the II million dollar bid which the British submitted to the Maritime Commission for twenty cargo vessels.

Mr. Wise said that he would investigate the possibility of the Navy acquiring such ships and so relieve the British from this bid.
It is my feeling that the British should not have to give up anything immediately for these planes. The original plan is that the British should give up about 60 planes, and the British will deliver these planes, as I understand it, in return for the additional 90 planes which we will get from the attached list of 90 planes. The idea is that the British will deliver these planes, and they will give up about 60 planes.

As you will note from the attached list, these planes will not be delivered until the last part of June, and the details of the transfer will be handled in order that the necessary change in the necessary letters, and so forth, will be made in the necessary letters, and so forth, will be made.

I am told that the British is that the Air Force of the British is that the Air Force of the British is that the Air Force will be delivered prior to the passage of the new legislation. If the British cannot go along, it will result in about 60 British planes.

I am told that the British is that the Air Force of the British is that the Air Force will be delivered prior to the passage of the new legislation. If the British cannot go along, it will result in about 60 British planes.
PRODUCTION SCHEDULE CONSOLIDATED B24 BOMBERS

Present estimate by our West Coast Production Manager:

First 6 by February 17th
7th by March 14th
8th by March 21st
9th by March 28th
2 per week through April
4 per week through May
Last 2, say, in first few days of June

The following two points of immediate interest can be developed from the above table:

1. Delivery of the first twenty-six (26) will be completed soon after the middle of May.

2. The last nine will probably be delivered during the last ten days of May and first few days of June.

January 7, 1942.

Co: The Secretary

From: Mr. Young

Re: Planes for China.

Several snags have come up in connection with the purchase of the 100 P-40 planes by China. I think all of these have been ironed out with the exception of one, namely, the relationship of the Inter-Continental Corporation to the Curtiss Wright Corporation. This factor has to date kept the deal from going through, so that planes have not yet been delivered to the Chinese.

Inter-Continental Corporation has a legal contract for the exclusive agency for Curtiss Wright in China, to which Curtiss Wright is legally bound. Thus, if Universal Trading purchases the 100 planes from Curtiss Wright, under the contract a commission should be paid to Inter-Continental. Inter-Continental has taken the position that it will not waive this commission fee in this instance.

I have taken the stand that as Inter-Continental is the only company which can erect, maintain, and service planes in China the payment to Inter-Continental should represent a service charge for those operations and should not include any additional fee for getting the business. If this plan is accepted, then it is only a question of determining the method of payment.

Payment could be made as part of the contract price between Universal and Curtiss, by a separate contract between Inter-Continental and the Chinese Government, or by a separate contract between Universal and Inter-Continental. The only other alternative would be for Universal to buy the planes directly from the British rather than from Curtiss Wright, thus eliminating the contract relationship between Curtiss Wright and Inter-Continental. This latter solution, however, seems to present some difficulties.
on the British side although, to be sure, it would return to the British a small amount of dollars.

I have talked with Guy Vaughan, Archie Lochhead, and Mr. Brophy, counsel for Inter-Continent. The status as of today is that Archie Lochhead is securing from Inter-Continent and Curtiss Wright a breakdown as to the price of the planes, the cost of erection, maintenance, servicing, etc. It may be that Inter-Continent will have to be told in no uncertain terms that in this instance it cannot charge any commission over and above the actual cost of erection and maintenance of the planes in China.

I might add that the Chinese have agreed to accept the British P-40's just as they are coming off the production line without a single change. I have also told Guy Vaughan and Inter-Continent that I would like to see the planes started for China regardless of whether or not satisfactory negotiations had been completed.
January 10, 1942

Dear Cordell:

At a conference held in your office on December 23rd, at which were present Secretary Stimson, Secretary Knox, and I, there was discussed the allocation of the 300 extra Curtiss P-40 pursuit planes to be produced this spring over and above those already on order.

As the United States Army Air Corps was understood not to be interested in this extra production, it was generally agreed that the bulk of these planes should go to the British—say 150 to 200. Suggested destinations for the remainder included China, Greece, and South America. However, after considerable discussion it was agreed that the allocation should be limited to China and Great Britain; that Great Britain should give up 100 planes to the Chinese out of her January, February, and March deliveries and receive in compensation 200 in May, June, and July—a net gain to her of 200 planes.

This proposal was presented to the British Government and has been agreed to by them as a basis of operations. Likewise the Chinese Government is prepared to receive its allotted number of planes in this and the next two months. In view of these decisions, none of the 300 Curtiss P-40s discussed is now available to other purchasers.

Sincerely,

(Signed) H. Hopkins Jr

The Honorable.

The Secretary of State.

By Message 3rd
The Secretary of State,

The

Enclosures:

Enclosure:

A growing number of persons in the State have adopted the practice of placing their personal effects in public places, such as parks, libraries, and schools, under the guise of advertising their availability for purchase. This practice has led to an increase in theft and property damage in public spaces. The state government has proposed a bill to increase penalties for such offenses and to implement measures to prevent these occurrences.

The bill was introduced in the state legislature in May, and it is expected to be debated in the coming months. The bill proposes a bill of $100 for the first offense, $200 for the second, and $500 for each subsequent offense.

Enclosure II (Recommendation for)

Department of State

DEPARTMENT

February 1, 1983

Dear Colleagues,

In a recent confidential briefing in the office of the Secretary of State, it was emphasized that the current administration is committed to addressing the issue of property theft and damage in public spaces.

It is proposed that the state government increase penalties for such offenses and implement measures to prevent these occurrences. The bill was introduced in the state legislature in May, and it is expected to be debated in the coming months.

Sincerely,

[Signature]

Deputy Secretary

At Cabinet, Cordell Hull made a statement about how we were going to divide up the Curtiss P-40 planes, showing how confused the matter is in his mind. Therefore, I better write him a letter telling him that we have gotten the English to give the Chinese 100 planes and they are to get the 300 later on. By advising him of this, it may clear up his mind so that he won't again make a misstatement.

Ask Philip Young prepare letter.

EMERGENCY FOR THE SECRETARY'S DIARY

At 5:00 p.m. today, Mr. Foley saw Associate Justice Frankfurter, and left with him a copy of the letter of transmittal together with a copy of the Executive Order extending freeze control and creating a Board for Economic Defense. The Justice said that he would read the Order and digest it, and then get in touch with his friend, Herbert Feis, and find out what was holding up its execution.

Mr. Foley also left with the Justice for his information a copy of the legislation to provide material aid to Great Britain together with a copy of the press release.

E.M.T.
TREASURY DEPARTMENT
INTER OFFICE COMMUNICATION

DATE January 10, 1941

CONFIDENTIAL

Secretary Morgenthau

FROM: Mr. Cochran

Registered sterling transactions of the reporting banks were as follows:

Sold to commercial concerns $64,000
Purchased from commercial concerns $10,000

Open market sterling remained at 4.03-3/4. Transactions of the reporting banks were as follows:

Sold to commercial concerns $3,000
Purchased from commercial concerns $2,000

Closing quotations for the other currencies were:

Canadian dollar 1½% discount
Swiss franc .2321
Swedish krona .2385
Reichsmark .4005
Lira .0505
Argentine peso (free) .2360
Brazilian milreis (free) .0505
Mexican peso .2066
Cuban peso 7-13/16% discount
Chinese yuan .05-5/8

There were no gold transactions consummated by us today.

The Federal Reserve Bank of New York reported that the Central Bank of El Salvador repaid $55,000 of the three-month loans previously made to it by the Federal. Upon repayment, the Federal transferred $70,714,09 worth of gold from the collateral account to the Salvadoran bank's own earmarked account. The amount of loans outstanding is now $822,000, secured by $918,335.52 in gold.

On January 4, we reported that the Commonwealth Bank of Australia had shipped $10,470,000 in gold from Australia to the Federal Reserve Bank of San Francisco, and stated that the disposition of this shipment was unknown. It was learned today that this gold will be sold to the San Francisco Mint, and that $6,324,000 of the proceeds will be credited to the Commonwealth Bank's account at the Federal Reserve Bank of New York. The remaining $4,146,000 is to be credited to the account of His Britannic Majesty's Government.

Regraded Unclassified
The New York banks were advised by cable that the Bombay bullion markets were closed today, and no gold or silver prices were received from that center.

The prices fixed in London for spot and forward silver were both 1/16d lower at 23-5/16d and 23-1/4d respectively. The dollar equivalents were 42.33¢ and 42.21¢.

Handy and Harman's settlement price for foreign silver was unchanged at 34-3/4¢. The Treasury's purchase price for foreign silver was also unchanged at 35¢.

We made two purchases of silver totaling 200,000 ounces under the Silver Purchase Act, both of which consisted of new production from foreign countries, for forward delivery.
GRAY
Santiago, Chile
Dated January 10, 1941
Rec'd 9:16 p.m.

Secretary of State,
Washington.

11, January 10, 6 p.m.

The British Government trade mission concluded on
January 8 a twelve day visit to Chile. Activities here
included meetings with Chilian Government officials, the
press, members of the Chilian and British business
communities and attendance at innumerable social functions.
The mission was received in all quarters with marked and
apparently sincere cordiality and the press gave its
movements and the utterances of its members extensive
and favorable publicity.

According to my information the mission conducted
no (repeat no) negotiations with the view to concluding
commercial agreements. The successful accomplishments
were, in my opinion, the intensification of the feeling
of goodwill toward Great Britain, the creation of a more
sympathetic understanding of her war trade problems and
the inoculation of the belief that she is sincere in her
wish to continue and expand her trade with Chile after
the
EH -2- 11, January 10, 6 p.m. from Santiago.

The war. I am told that the mission made it clear to Chilean authorities that because of the maritime transportation problem British purchases of Chilean products in the immediate future would be restricted chiefly to nitrate, iodine, hides, wool and hemp, that no Chilean mutton, meats, beans or lentils would be bought unless Chile could arrange for their transportation, that Britain could not approve of the sale of Danish vessels now tied up in Chilean ports to Chilean Government and their transfer to the Chilean flag, that she could not acquiesce to the passage through the blockade of goods still in Germany which were purchased and paid for prior to the outbreak of hostilities, that it would be recommended that the Bank of England grant a £1,000,000 overdraft to the Bank of London and South America in order that the latter institution may undertake forward exchange commitments with wool shippers in Chile during the next three to four months, apply the proceeds of these sales to the unblocking of £700,000 now owned by Chilean importers to British shippers and make the balance available for the payment of future British imports.

The mission at no time attempted to convey the impression that England was prepared to do business as usual.
EH -3- 11, January 10, 5 p.m. from Santiago.

On the contrary, in private conversations it was intimated that for the duration of the war Britain would only be in position to supply a limited number of items for export and that its purchases would be restricted to those goods most urgently needed for the prosecution of the conflict. Repeated to Lima.

FLAIN
London
Dated January 10, 1941
Rec'd 5:35 p.m.

Secretary of State,
Washington,
110, Tenth.
FOR TREASURY.

1. A definition of the responsibilities of stockbrokers having accounts in the names of non-residents is given in a letter published today from the Bank of England to the Stock Exchange, the full text of which goes forward by mail. If such accounts are in credit the permission of the Bank of England must be obtained before making the balances available in whatever manner to non-resident clients. If the accounts are in debit steps must be taken as soon as possible to obtain the repayment of the advances and the debit balances must be reported to the Bank of England forthwith. Express permission is required for the grant of any over-draft or loan facilities to non-residents. The effect of any change in a client's country of residence since September 1, 1939, must be ascertained by the stockbroker from his banker before further investments or remittances are made.

2. Both this morning's London financial papers
run an article under Washington date-line stating that a group of leading investment trusts headed by the Tri-Continental Corporation has applied for approval of a tentative plan for the joint purchase of $600,000,000 worth of British-owned American securities to be held until disposable profitably.

JOHNSON

MFL
Secretary of State,

Washington.

41, January 10, 2 p.m. (SECTION ONE)

Chinese currency stabilization at Shanghai.

It has been pointed out in reports and despatches, particularly my 85 of December 9, 1940, that the thinking people in the past decided that continued support of the Chinese National currency on the Shanghai exchange market was motivated by three principal considerations: firstly, that the expense involved should be regarded as part of the war costs; secondly, that it was highly important to protect the political prestige of the national currency in the Shanghai region; thirdly, that it was highly important to continue measures designed to prevent Japanese success in economic and definite control of this region.

The other person's opinion which opposes a continuance of exchange support at Shanghai, emphasizes the following points which elaborate further the views advanced pages 3 and 4 and pages 19, 20 and 21 (above mentioned despatch): firstly, 'free' China can no longer export through Shanghai nor obtain substantial quantities of merchandise from Shanghai due to the effective Japanese naval blockade, a situation which has created a serious shortage of consumer goods in the Chinese controlled interior and contributes to the embarrassing rising price situation there;

LOCKHART
SECONDLY, further unlimited support of the Chinese currency at Shanghai is beginning to be of increasing advantage to the Japanese and their sponsored regime, as their economic and trade control measures in the Shanghai region are now gradually achieving some success; thirdly, the contracts between the economic poverty and scarcity of goods in vast Chinese interior and the relative plenty in Shanghai makes the appropriation of further funds from exchange resources for support of the currency at Shanghai seem illogical and out of proportion, as the only purpose to be served would be to save vested interests at Shanghai which are no longer of any advantage to the economic life of territory controlled by Chiang; fourthly it is perhaps unique in world financial history for a country to maintain behind enemy lines a free exchange market such as has been done at Shanghai, and if such action can no longer serve any usefulness, purpose or advantage, China should have no more hesitancy in doing away with the free market and establishing exchange control than did Great Britain in its time of crisis; fifthly, as it appears inescapable that China's unfavorable economic and financial situation will continue to affect conditions even after the present conflict is ended, it seems inescapable to burden China with further loan obligations as advanced by friendly powers for support of the currency, when it is patent that the ultimate outcome of the sino-Japanese hostilities must be the determination of the future status of the Chinese currency; sixthly, the trading interests of the friendly powers at Shanghai can best be preserved if China wins the war. (END OF SECTION TWO).
Gray
Shanghai via N. E.
Dated January 10, 1941
Enc'd. 9:10 a. m., 11th

Secretary of State,
Washington

41, January III, 2 p. m. (Sedition three). 

Hence, costly palliatives cannot serve certain fundamental standards, and
China's resources should be conserved to make prolonged resistance possible and
to make post war rehabilitation easier; secondly, the financial and economic
welfare of China in the Shanghai region is indeed important, but the welfare
of the Chinese in free China is more important; furthermore, the fate of the
Chinese people in the Japanese occupied regions depends upon the outcome of
the conflict and upon nothing else; eighthly, licensing and allotment systems
for exchange are satisfactory, because there are bound to be loopholes, as
conceded by foreign monetary experts, not to mention China's experience in
1938 in releasing in the aggregate United States dollars 30 million in allot-
tments at Shanghai for import necessities; furthermore, the introduction of an
allotment system for imports at a fixed rate would prevent the development of
an unofficial market at lower rates; ninthly, there is no certainty that the
maintenance of the importing exchange market at Shanghai will be less costly
than in the past, despite the temporary favorable technical position of the
Shanghai market as present. Inform Commerce. Sent to the Department, to
Chungking, air mail to Peking and Tokyo. (End of Message).

SECRET COMMUNICATION

UNITED STATES OF AMERICA

THE WHITE HOUSE

No. 34

Regraded Unclassified
Hungary, the firm presumably represents German interests. The letter states in part that: “Different importers and factories in Hungary intend to buy and ship through Russia raw leather, raw gossi, raw cotton, raw jute, tin and lead,” and that “there is a regular traffic from Harbin through Russia and Germany on the Trans-Siberian railroad, and to our information considerable transports were coming already on this route.” Otherwise, the letter states that large quantities of the articles named are needed, asks the bank to recommend reliable firms, and proposes to pay in the Bank American Dollars for release to the shipper upon presentation to the bank of proper evidence that an order has been dispatched.

The letter may be a bona fide attempt to do business or may possibly have been sent out as a form of indirect propaganda to impress Americans with the extent of shipments via Siberia. Either interpretation of the letter is interesting, but, regardless of the motive of the writer of this particular letter, this Consulate General is inclined to believe that shipments via Siberia have been, and are, larger than generally anticipated (at least in Harbin circles) a year ago.

Aside from the letter described above, which was received by this office today and was not answered by the bank, various stories have been heard since the time of the despatch under reference regarding shipments both to and from Germany via Siberia.

As indicated in the Consulate General’s political report for November, reliable and well-informed persons in Harbin have begun to think that earlier estimates of the amount of soy beans shipped to Germany during 1943 were too low and that 100,000 tons have been sent by way of Manchuria. In addition, one person to whom this office has confidence believes that it is not at all improbable that a similar quantity has gone by river to the sea and thence to Germany via Vladivostok. He says that the small amount of beans which have

**Harbin’s Political Report for November 1943, page 9.**
appeared in normal channels from the Sunwar River Basin lends credibility to reports of that nature which have come to him.

The same informant states that he knows that the German firm of Kunst and Albers has bought up a large stock of oil drums for use in transporting soy bean oil. He also mentioned that soy bean oil can now be made into a solid form**, which will make shipment easier. Newspaper reports to the effect that Harbin and Harbin mills would be furnished 450,000 tons of beans this year and that these cities would replace Harbin as the center of the industry were discussed with him. He has no information to confirm these reports, despite his intimate knowledge of the business, but points out that if large amounts of oil are to go to Germany, such a development would be logical because shipping costs would be reduced. Deliveries to date of beans to Harbin mills have, however, been far below those required to fulfill such a willing program.***

There are many allegations current about the quantity of soy beans leaving Manchouli for Germany during the past month or two. Various well informed persons have given estimates running from two to as many as five trains a day. Even the minimum estimate would give a daily total of some 1,500 tons. There seems to be ample ground for believing that the minimum figure at least is by no means an exaggeration, since there are also reliable reports of considerable movements of beans from Harbin toward Manchouli.

Regarding shipments arriving from Germany, the Consulate General's informants are less specific, but most think that a good deal is coming in. According to an item in the November 1, 1940 issue of the MANCHURIA DAILY NEWS,

---

** Reported also in Harren's despatch of December 17, 1940 to Tokyo, entitled "Special Aspects of the Soybean Situation in Manchuria."

*** These press reports have been touched on in Harren's Trade Conditions-North Manchuria for November 1940 and in Harren's despatch to Tokyo mentioned in the footnote above.

Telegram: PARIS.

Your Ref:

Our Ref: No. 272/911.

Messrs

National City Bank of New York,

Harbin,

Indorers:

Gentlemen:

We are constantly working with your oversea-brokers and we call your attention to the following matters:

Different importers and factories in Hungary intend to buy and ship through Russia raw leather, raw gauze, raw cotton, raw jute, then metals, like copper lead and tin.

You know the market there very well naturally, therefore we beg you to recommend to reliable firms, which are willing and are able to furnish us with considerable big amounts of above mentioned materials.

We imagine the effecting of these business so that there is a regular traffic from Harbin through Russia and Germany on the Transsiberic railroad, and to our informations considerable transports were moving already on this route. The paying of the goods would be done naturally in USA Dollars that is to say the Hungarian importers would credit the goods at your House so that if the firm in question certifies, that the ordered goods are mailed in Harbin at the railway company as per our instructions, the credited amount would be paid out to this firm. Naturally it would be necessary to have a go between third hand, because of the terrific distance and the high value of the goods in question, which third hand would control the quality of the goods. We beg you therefore to recommend to such a person or firm, and inform us in the same time the tariff of such a firm as to the controlling of the qualities of the ordered goods, and what are the guarantees of same.

To avoid your re. kind reply very urgently, and therefore please give us your answer via air mail either through America or through Russia, the expenses of which we cover naturally ourselves.

Thanking you for your kindness in advance, we sign Gentlemen, hoping a prompt answer from your part.

Very truly yours,

Fulper, Léto, Peketo

Weekly Average of Total Debits Since Outbreak of War (Canada alone) Through Dec. 31

$6.8 million
January 9, 1941,

CONFIDENTIAL

Dear Mr. Secretary: Attention: Mr. H. Merle Cochran

I am enclosing herewith our compilation for the
week ended December 31, 1940, showing dollar disbursements
out of the British Empire and French accounts at this bank
and the means by which these expenditures were financed.

Faithfully yours,

/s/ L.W. Knorr,
Vice President.

Honorable Henry Morgenthau, Jr.,
Secretary of the Treasury,
Washington, D. C.

**Regraded Unclassified**
(a) Includes payments for account of British Purchasing Commission, British Air Ministry, British Supply Board, Ministry of Supply Timber Control, and Ministry of Shipping.

(b) Through June 19, these figures represent total sales of American securities in Second District reported for account of the United Kingdom. (Proceeds of these sales, however, may not have been credited to the Bank of England’s account in all cases.) Beginning with the week ended June 26, the figures represent transfers from the Bank of Montreal, New York Agency, which is custodian for requisitioned American securities held in this country. The transfers apparently reflect proceeds of official security sales, including those handled through private deals.

From June 19 to July 19, transactions in securities payable in specified foreign currencies, including dollars, by United Kingdom residents were prohibited.

(c) Includes payments for account of French Air Commission and French Purchasing Commission.

(d) Includes adjustment for (b) above.

(e) About 20 million transferred from accounts of British authorized banks with New York banks.  
(f) About 111 million transferred from accounts of British authorized banks with New York banks.  
(g) About 10 million transferred from accounts of British authorized banks with New York banks.  
(h) About 10 million transferred from accounts of British authorized banks with New York banks.  
(i) Adjusted to eliminate the effect of $20 million paid out on June 26 and returned the following day.  
(j) About 20 million transferred from accounts of British authorized banks with New York banks.  
(k) About 10 million transferred from accounts of British authorized banks with New York banks.  
(l) About 14 million transferred from accounts of British authorized banks with New York banks.

(m) About 20 million transferred from accounts of British authorized banks with New York banks.  
(n) About 122 million transferred from accounts of British authorized banks with New York banks.  
(o) About 111.3 million transferred from accounts of British authorized banks with New York banks.

**Weekly Average of Total Debits Since Outbreak of War (Canada alone)**

Through Dec. 31 $6.5 million

Regarded Unclassified
TO: Secretary Morgenthau

FROM: Mr. Cochran

Mrs. Arthur Wood, Hobart 3014, telephoned me this morning. She said that her
sister, Miss Anne Morgan, was just back from Europe and would like very much to bring
to Secretary Morgenthau's attention her first-hand information with respect to the
situation in France, as well as certain recommendations toward a more liberal policy
in the Treasury's control of funds for certain residents of France.

I promised Mrs. Wood that I would learn whether the Secretary preferred that
Mr. Fehle or a group from our Control Committee receive Miss Morgan and submit her ob-
servations with such recommendations as we might see fit to make, or whether the
Secretary might himself care to receive her. Miss Morgan is now endeavoring through
Mr. Dunn to have an early appointment with Secretary of State Hull.

Will the Secretary tell me what answer I should give Mrs. Wood?
January 10, 1941

Last night I called up Herbert Feis, and asked him whether he wouldn't please try to halt or correct Cordell Hull's misinformation. Twice yesterday he said that the English have $18,000,000,000 worth of securities. Therefore, there was no reason why they couldn't put up two or three billion dollars' worth of collateral.

Feis said he wanted me to know that there is an author of a book on English securities of about ten years ago, and he is the greatest living authority on English securities. It was he who had given Hull his information; in fact, he had given him quite contrary information. Feis said that he was opposed to having the English put up any collateral.

He promised me that he would get in touch with Merle Cochran today to bring himself up to date, although he didn't use exactly that language, and then he would tell Mr. Hull how much securities the English really have. Feis is to call me back and tell me the results of his conference with Hull.
TREASURY DEPARTMENT
INTER OFFICE COMMUNICATION

DATE January 10, 1941

TO Secretary Morgenthau

FROM Mr. Cochran

STRICTLY CONFIDENTIAL

At 11:45 Dr. Feis telephoned me. He mentioned his talk with you last night. He asked me for information to help refute Secretary Hull's understanding that the British have $18,000,000,000 of assets which could be liquidated or pledged. I told him that the British had met with us this morning and that Sir Frederick Phillips was going to request an appointment with Secretary Hull for this very purpose of explaining the true British situation. I added that he would probably endeavor to see two or three of the other Cabinet members. Feis was happy that Phillips was coming to the State Department and promised to do what he could to assist in reaching a correct understanding of the real position. I confirmed one or two figures that Feis had and corrected him on one other.

Feis was inclined to doubt the wisdom of this matter of international finances, which is shortly to come before Congress, being discussed by Phillips in departments other than Treasury and State. Feis was afraid of leaks. I told him that the Treasury felt it urgent that Phillips back up Secretary Morgenthau's arguments with some of his Cabinet colleagues if the Cabinet, and Congress in turn, are to be convinced of the British need for assistance. Feis was still worried about the risks involved through Phillips visiting the other departments.
Dear Cochran,

You will recollect that at the meeting this morning the question was raised whether some financial relief could be secured through immediate payment for goods on the sterling area to be acquired by the U.S. Departments.

The following instances occur to us:

1) **WOOL**. Purchase by U.S. Government of 250,000,000 lbs. Australian wool to be stored in the United States under the Storage Agreement signed in London on December 9th 1940. Possible purchase by U.S. Government is provided for in this agreement.

According to our information, the value of this wool would be between $130 to $150 millions. The loading of the wool for shipment to the United States has recently commenced in Australia. As you know, the British Government has purchased the entire Australian wool clip until after the war.

2) **RUBBER**. Rubber Reserve Company agreed to purchase 150,000 tons on June 29th, for shipment prior to December 31st, but we understand that shipment has not yet been completed. The Company agreed to purchase a further stock of 180,000 tons for shipment during 1941, none of which has presumably yet been shipped. The value of the first lot at the contract price was about $67 millions, and that of the second lot $81 millions.

3) **TIN**. Metals Reserve Company agreed in July 1940 to purchase 75,000 tons of tin at 50$ lb. C.I.F. U.S. Ports, total value being about $84 millions.
I understand delivery was expected to be completed towards the end of 1941, so that some substantial part of this yet remains to be delivered.

We are sure that these items include the best chances for an immediate application of the new idea in time to be of use in meeting the financial needs of the interim period. I have cabled to London to enquire whether there is a prospect of fixing up a contract for a further 50,000 tons of tin and generally whether any other articles occur to them. In particular we know that all the following articles are in oversupply in the sterling area and that we can meet any orders which U.S. Departments are likely to place for them. We do not, however, know how far they are regarded as strategic materials under the Act of June 25th 1940.

Burlap
Cocoa
Copra
Long staple Egyptian Cotton
Jute
Kapoc
Animal, vegetable and fish oils,
Shellac
Skins
Tea.

I need not remind you that rubber and tin come only in part from British sources and that we can only count on receiving a corresponding part of the proceeds. It seems to me that wool offers the best immediate possibilities from every point of view.

Yours sincerely,

[Signature]

January 10, 1942

Present: Mr. White  
Mrs. Klots  

W. H. Jr.: Mr. Higford stopped behind it over to me, "I don't know whether Mr. Frank told you the story."

As a matter of fact, he told me part of it. He may have told it all to you. My memory isn't clear. But he said, "I know that you always felt that we shouldn't have worked with Morgans." He said, "I attended a dinner at Lothian's," and he said, "I sat next to Butterworth and Butterworth said to me, on his own initiative, he says, 'You know we all take it for granted that you are going to get your advice at 14 Wall Street,' and then he said, 'At the other side of the table, your Undersecretary, Mr. Jones, was sitting next to Viprian, and he said to Viprian, 'You know, Mr. Viprian, we expect you to go to J. C. Morgan for your advice,' and he said, 'After all, you can't base me if here your financial representative of the Embassy in London, and your Undersecretary voluntarily tells us to go to J. C. Morgan. How should we know that that isn't what the Administration wanted?"

Klots: Somebody tells this story before.

W. H. Jr.: I think it is in the record, but I want to make it again.

Klots: I know it.
"You don't know this story?"

No. This is the first I have heard of this story. It is curious he didn't defend himself when you were criticizing him for that. He probably didn't think it was the appropriate time.

He says, "If I would have known that the administration didn't want us to take the advice of J. P. Morgan, I would have brought half a dozen people over here from England and set up my own office."

But you told him right here.

Well, I don't know, but subsequently he must have got it from Bames and Butterworth. Anyway, we took Bames' and Butterworth's word as against mine.

I remember that meeting here very well.

Then I asked him what advice Kennedy had given him. He said when they got over here, also in December, they got a cable from Treasury in London not to do anything until Kennedy arrived. Kennedy was strongly against their vesting any securities. He said, "The market couldn't take it."

In the most, they should only vest 15 or 20. He was very nervous about the whole thing, and it got everybody in the British Treasury very nervous.

I then asked if he could let me have a report of his conversation, and he said it was all covered in a cable that he sent back to England, and he said he would hand me a copy the next time he comes down.
FLOTS: You told him the story about the school children's attitude toward J. P. Morgan the day he was here.

E.W. Jr.: I gave that.

WHITE: He is a very slippery chap, Gifford, very shrewd, but still the rest of the story may be true and they gladly seized upon the excuse which they wanted to in the first place, but it gave him an additional - but it is amazing that Butterworth should have had the - should have said that.

FLOTS: Butterworth was, I think, very close to Kennedy and he knew what Kennedy would want.

WHITE: I mean with Eanes it was - he was high enough to shape his own policy, but Butterworth is acting under instructions. It is of quite a different character. With Kennedy, of course, the Lord knows if everything that Kennedy said and did would come out, it would make a very interesting picture.

FLOTS: I believe so.

E.W. Jr.: Now, did you (White) want to see me or did I want to see you?

WHITE: You said you wanted to see me.

E.W. Jr.: Well, I have had that pleasure.
January 16, 1942

Dear Jerome:

Thank you for your courtesy in sending me a copy of your proposed letter to the President on the attitude of the investment bankers of New York in connection with the sale of British securities.

It is entirely agreeable to me to have you send the letter to the President.

Yours sincerely,

Henry

Hon. Jerome Frank,
Chairman, Securities and Exchange Commission,
Washington, D. C.
January 10, 1941

Dear Jerome:

Thank you for your courtesy in sending me a copy of your proposed letter to the President on the attitude of the investment bankers of New York in connection with the sale of British securities.

It is entirely agreeable to me to have you send the letter to the President.

Yours sincerely,

Confidential

The Honorable
Henry Morgenthau, Jr.
The Secretary of the Treasury

Dear Henry:

I am enclosing a copy of a memorandum which I would like to send to the President if you have no objection. My purpose in sending it is to acquaint him with the attitudes of the investment bankers, and not to inform him about the British arrangements which, of course, are your province.

Sincerely yours,

Jerome F. Frank
Chairman

Enclosure

C.K. Let the letter go. Your.
January 8, 1941

CONFIDENTIAL

MEMORANDUM FOR THE PRESIDENT:

I think you will be interested in the following in its bearing not only on our national problems but in its relation to the attitude of the investment bankers:

Secretary Morgenthau, as a result of his conversations with the British, wanted to demonstrate to them that it is possible for them to sell their nonlisted securities, in wholly owned American corporations, in an orderly way without unnecessary sacrifice. To that end he conferred with Mr. Cyril Quinn, one of the principal officers of Tri-Continental, an investment trust affiliated with Saligman. He then invited us to a conference for the sole purpose of asking us to see to it that, if the investment trust industry were to offer to buy such securities, all the investment trusts would get their retable share, if they so desired. We agreed to perform that limited task.

Mr. Schenker, head of our Investment Company Division, accordingly went to New York to confer with the heads of the various investment trusts. He learned that, with the exception of the three investment trusts controlled by investment
bankers, (Lehman Corporation; U. S. and Foreign, a Dillon affiliate; and American General, a Lazard Freres affiliate) all the investment companies which had been contacted by Mr. Quinn were ready to go along. Mr. Schenker conferred with Robert Lehman and John Hancock of Lehman Bros., and Arthur Bunker of Lehman Corp. They expressed an unwillingness to participate primarily on the alleged grounds, first, that they had information to the effect that the British did not want to sell such securities and that the plan would put pressure upon the British to sell (which they thought undesirable) and second, that the particular mechanism set up would stifle competition in bidding for those securities. (This second ground is amusing inasmuch as the same investment bankers are vigorously protesting against a contemplated SEC rule to require competitive bidding for utilities.)

As above noted, the three recalcitrant investment companies are those which are dominated by investment bankers. It seems fairly obvious that their true basic objection is their fear that there will develop through the investment trust something highly desirable, namely, true underwriting, i.e., underwriting in which the underwriters, having sufficient capital, are able to buy, without the necessity of any immediate or even ultimate sale to the public. The fact
is that our investment bankers, when they act as so-called
underwriters, do not do the job that is done frequently in
England but merely act as salesmen who get more than a sale-
man's commission on the theory that they are true underwriters
when, in fact, they do not so function. They wish to main-
tain that position and in effect continue to get something
for nothing; this vice of the existing underwriting arrange-
ments was forcibly commented on by former Chairman Douglas
several years ago to the great disgust of the investment
bankers.

What makes the matter even more amusing is this fact:
The position taken is based on the alleged desire to maintain
competition between investment bankers. Our own studies, and
the evidence introduced before the T.N.E.C., show that today
there is no such thing among the leading investment bankers,
for when one investment banker gets a piece of business all
others by tacit consent lay off and do not compete. The
development of true underwriting by the investment trusts
(something contemplated by the Investment Company Act of 1940)
will create competition for the investment bankers; that is
what they dislike and, in this instance, are resisting.

In spite of that resistance, I think that within a very
short period the investment trusts (either with or without

Regraded Unclassified
cooperation on the part of the recalcitrants) will be in a position to make an offer for the British securities. From there on the job will be Henry Morgenthau's.
TREASURY DEPARTMENT
INTER OFFICE COMMUNICATION

STRICTLY CONFIDENTIAL

TO
Secretary Morgenthau

FROM
Mr. Klaus

FBI reports:

January 8. The Yokohama Specie Bank in Honolulu has been preparing to transfer to its parent in Japan the customers' collateral and other assets and to turn its required government bond reserve into cash; a legal opinion advising the Bank of its power to do this but of the possibility of a receivership by the Territorial Bank Examiner on the ground of this conduct amounting to a bad banking practice has been circulated to the Yokohama Specie branches in the United States. The Territorial Bank Examiner has declined to accede to the request that he permit the conversion of the 2½ million dollars of United States government bond reserve into a cash deposit with the Bishop National Bank and the Bank of Hawaii.
TREASURY DEPARTMENT
INTER OFFICE COMMUNICATION

DATE JAN 10 1941

TO Secretary Morgenthau

FROM Mr. Foley

In accordance with the request contained in Mr. Thompson's memorandum of December 26, 1939, there is attached a summary report of studies or projects carried on in the Office of the General Counsel for the month of December, 1940.

Attachment
The following matters received attention in the Office of the Chief Counsel for the Bureau of Internal Revenue:

1. **Bill (H.R. 10558) to Liberalize Tax Provisions of Merchant Marine Act of 1936.** By virtue of existing provisions of the Merchant Marine Act of 1936, a shipowner qualifying as a "subsidized operator" in foreign commerce is permitted to build up a reserve for use in the expansion or replacement of its shipping facilities and to avoid income taxes with respect to the earnings from operations deposited in such reserve. Earnings so deposited and used are wholly exempt from tax. By virtue of a recent amendment to the Act, the reserve privilege has been expanded. All shipowners, subsidized and unsubsidized alike, are now permitted to include in a tax-exempt reserve the proceeds of a sale or other disposition of existing vessels. In such case the amount of the unrecognized gain represented in the proceeds of sale is applied in reduction of the cost basis of the new vessel. There is now pending in Congress a new bill, H.R. 10558, by virtue of the enactment of which the privilege of building up the tax-exempt reserve out of operating profits, originally restricted to subsidized operators, would be extended to the unsubsidized operator in foreign commerce. It should be noted that while the recently enacted amendment results merely in tax postponement because of the fact that basis is reduced by the unrecognized gain, the earlier provisions of the 1936 Act and the pending legislation result in
complete tax exemption because no provision is made for a reduction of basis by the amount of the untaxed earnings.

2. Tax Liens on Real Property in State of Michigan. In United States of America v. Thomas Maniaci and Hiram T. Shafer, decided November 8, 1940, the United States Circuit Court of Appeals for the Sixth Circuit in affirming the decision of the lower court held that where the notice of the Federal tax lien imposed by section 3186, Revised Statutes, as amended, failed to contain a description of the land upon which the lien was claimed, as required by the laws of the State of Michigan, the lien was invalid as against a bona fide purchaser of real estate situated in Michigan, who took title subsequent to the filing of the notice of the lien in the proper registry. A memorandum has been prepared proposing legislation to clarify the section of law here involved (section 3672, I.R.C.), to state more clearly that the authority granted to the states is merely to designate the office for the filing of notice of Federal tax liens and not to provide that there must be a full description of the land upon which the lien is claimed.

The above matters were handled under the supervision of G. E. Adams, Associate, Legislation and Regulations Division.

The following work was done under the supervision of Assistant General Counsel Cairns:

3. Proposed Order of the Secretary, Authorizing the Chairman of the Processing Tax Board of Review to Designate an Acting Chairman. The
opinion on this question was prepared by Mr. Kalis and was signed on December 16, 1940. The conclusion is that the power of appointment or designation vested in the Secretary cannot be delegated to the Chairman. It is pointed out that an Assistant to the Secretary, under T.S.R. title 5, sec. 246a, could designate an alternate Chairman.

The following was the subject of special study:

4. Foreign Confinement Decrees. This study was prepared by Messrs. Kaufman and Berk. It considered the effect which American courts may be expected to give to decrees of foreign governments confiscating or requisitioning property, real or personal, situated in this country and owned by nationals or corporations of the foreign country. Only tentative predictions can be made on the basis of the judicial authorities. (1) Confinatory or requisitioning decrees of unrecognised foreign governments will not be extraterritorially applied to affect property that has a legal situs in the United States; (2) such decrees of recognised foreign governments will probably not be given effect to the extent of impairing the rights of domestic claimants, and perhaps simple creditors; (3) where domestic claimants have been protected, it cannot with assurance be foreseen whether or not the courts will give effect to such decrees with respect to property in the United States; it may be relevant whether the decrees make provision for compensation; (4) where there is an international
agreement such as the Litvinoff Agreement, the courts will
probably give some effect to the foreign decree; (5) in the event
that the individual property owners themselves convey the property,
pursuant to the decree, American courts may give effect to the
transfer in the United States.

5. Silver Fox Fur Agreement. In order to insure the administra-
tive feasibility thereof from the point of view of the Customs Ser-
dvice, Messrs. Dean and Smith of the Customs legal staff cooperated
with the various interested agencies in the drafting of a new sup-
plementary trade agreement with Canada for the governance of impor-
tations of silver or black foxes and furs and articles made from
such furs. The agreement was proclaimed by the President on December
18 and became provisionally effective on December 20, 1940. Also
prepared was a Treasury Decision containing instructions for the ad-
ministration of the quota provisions of the proclaimed agreement.

6. British Purchase Tax. Mr. Dean, Chief Counsel, Customs, reviewed
and approved a letter prepared in the Bureau of Customs for the sig-
nature of the Secretary and reporting on H.R. 10705, a bill to amend
section 402 of the Tariff Act of 1930 so that sales or purchase taxes
of an exporting country should not be included in the foreign market
value used by customs authorities in assessing and collecting customs
duties when such taxes are not applicable to exported merchandise.
The following matters received attention in the Legislative Section under the direction of Assistant General Counsel Bernard:

**CONTINUATION OF PROJECTS**

7. **Bill to Relieve the Hospitals from Double Taxation Under Harrison Narcotic Act** (for description see original report, item 9). This bill, prepared by Miss McDuff, together with subsequent material submitted in support of particular phases of the bill, is still receiving consideration by the Bureau of the Budget.

8. **Fidelity Bond Bill** (formerly identified as "Bond Survey") (for description see original report, item 10). Due to the interest of about ten other agencies in this bill, the Bureau of the Budget has not yet been able to give it the usual clearance.

9. **Compilation of Money Statutes** (for description see original report, item 11). Work on this project has been temporarily discontinued.

10. **Codification of Anti-counterfeiting and Related Laws** (for description see original report, item 7). Work on this project has been discontinued for the time being.

11. **Federal Depository System** (for description see original report, item 6). Mr. Reeves is continuing his work on this bill. It is anticipated that the bill will be transmitted to the Congress shortly after the beginning of its next session.

12. **Acting Administrators Bill** (for description see June report, item 33). Miss McDuff is continuing her study of the necessity and
feasibility of general legislation to provide for acting bureau or division chiefs in the absence of a chief.

13. Law Committee of Defense Communications Board (for description see November report, item 23). Mr. Spingarn is continuing his work with the Law Committee, as the Treasury representative, on drafts of legislation to authorize complete control by the Government of radio and wire communication facilities in time of war or impending war.

NEW STUDIES

14. Codification of Public Debt Laws. Mr. Koken is preparing a bill to codify the public debt laws authorizing the borrowing of money and the issuance of obligations therefor. Mr. Broughton prepared the first draft of such a bill.

The following matter received attention under the supervision of Mr. O'Connell, Special Assistant to the General Counsel:

15. Bank Holding Companies. We have been assisting in studying the bank holding company problem and in preparing a draft of legislation dealing with the matter. Mr. Sherbomiy has been conferring with lawyers in the office of the Comptroller of the Currency relative to changes in our draft of the proposed bill.

The following matters were handled under the direction of Assistant General Counsel Bernstein:

16. Foreign Funds Control. A number of conferences have been held with the operating division of the Foreign Funds Control, together
with representatives of the Office of Monetary Research, at which conferences the proposed Order in case of the extension of freezing control has been discussed, and attention has been focused upon the problems that will arise in the administration of an extended freezing control and some of the possible avenues of approach to be pursued from the policy point of view. The object of such conferences has been to familiarize the various groups as to the types of problems and possible solutions thereof which will be presented under an extended control.

Considerable work has been done on the revision of General Licenses 32 and 33 relating to the remittance of small sums for living expenses to nationals in the occupied area, including American citizens. The object of such revision will be to liberalize the sums which may be remitted, together with the formulation of a method by which the blocked funds of such nationals may be remitted to them without permitting the dollars involved to be released from the control. The entire staff worked on the foregoing matters.

17. Executive Order re Economic Defense. This office participated in the drafting of the proposed Executive Order consolidating the various economic defense measures under the Economic Defense Board with administration thereof vested in the Secretary of the Treasury. It also participated in the drafting of a memorandum and letter to the Secretary of State describing the proposal and cleared the matter with Justice. Messrs. Bernstein and Laxford worked on this.
18. **Danish Ships.** This office participated in conferences relative to action to be taken in connection with the ships of the Maersk-Moller Line located in this country. Mr. Bernstein and Mr. Friedman worked on this matter.

19. **German Re-Immigration Marks.** This office studied the possible violation of the Johnson Act and the Neutrality Act involved in the sale of these marks in this country and discussed the matter with representatives of the Department of Justice. Messrs. Bernstein, Friedman and Luxford worked on this.

20. **Foreign Exchange Provision in Trade Agreements.** This office participated in departmental conferences relative to the foreign exchange clause to be used in trade agreements entered into by this government with foreign countries.

21. **Argentine and Chinese Stabilization Agreements.** We participated in the conferences leading to the Secretary's appearance before the joint congressional committee, worked on the statement read before the committee, drafted the Agreements, participated in the negotiations and conferences with the interested governmental agencies and foreign representatives, and prepared legal opinions on certain questions. Mr. Bernstein and Mr. Friedman worked on this matter.

22. **Black Tom Cases.** We discussed with Justice the brief filed in this case and attended the argument before the Supreme Court. Mr. Bernstein and Miss Hodel handled this case.
23. Spanish Silver Cases. The time to appeal to the Supreme Court from the decision of the Circuit Court which had been favorable to the Government has expired and the remaining law suits are being dismissed. Messrs. Bernstein and Friedman worked on this matter.

24. Norwegian and Swedish Accounts at the Federal Reserve Bank of New York. We have discussed with the foreign representatives and with the Federal Reserve Bank of New York and the State Department documents and letters to be furnished in connection with transferring control over the Norwegian Central Bank assets at New York to the Norwegian Government and giving the Swedish diplomatic officials in Washington control over certain accounts of the Swedish Central Bank.

Mr. Bernstein handled this matter.

25. Stamp Taxes. This office participated in the problem of the applicability of stamp taxes to the sale or transfer of the securities requisitioned by the British Government and worked on the Treasury Decision issued in connection therewith. Mr. Bernstein handled this.

26. Proposed Bill to Authorize Establishment of New Coinage Mint. This office participated in the preparation of a Bill and letters of transmittal which would authorize the establishment of a new coinage mint at some point in the Middle West to be selected by the Secretary of the Treasury. Mr. Bernstein and Miss Hodel worked on this matter.

27. Contributions to the British. The New York Federal has received numerous checks made payable to the order of the British Government.
by persons desiring to contribute to the British war effort. This office, after consulting with the British, State Department, and Mr. D. W. Bell, advised the New York Federal to return the checks to their senders with reference to the appropriate provision of the Neutrality Act. Mr. Bernstein and Mr. Groman worked on this matter.
Mr. Preston Delano  
Secretary Morgenthau  

I wish you would begin to prepare arguments why Senator Glass’ bank holding company bill should go through. One of the suggestions I would like to make is for you to go back five years or ten years in each community where bank holding company banks operate, and find out just how many banks are in each community. My impression is that where the bank holding company banks operate there are less banks serving the community than there would be if there were not bank holding companies.

I would like you to make this study just as soon as possible, and see whether the argument will or will not hold water.
Mr. White

Secretary Morgenthau

January 10, 1941

I think you better prepare a letter for me, letting the President know just what the exact financial situation of the English is today. I learned from my conversation with him yesterday that he doesn't seem to comprehend what the situation is. I think it important that I make a record of it by writing him a letter.
Ferdinand Kuhn
Secretary Morgenthau

You can tell Edgar Mowrer that I release him and he can write anything that he wants to on frozen funds.

For your own background, the situation is now definitely blocked in the State Department, and I have grave doubts that I will be able to get it out of there.
By dear Mr. Secretary:

Thank you for your letter of December 16th, concerning the National Munitions Control Board regulations with respect to the exportation of tin-plate scrap.

In view of the information which you set forth and the recommendations of the Advisory Commission to the Council of National Defense, may I state that I concur with your views on this subject.

Sincerely,

The Honorable,

The Secretary of State.

FTrpf

\[\text{By Messenger 3 10}\]
Department of State
Washington

In reply refer to
Co

December 16, 1940

Confidential

My dear Mr. Secretary:

Reference is made to the minutes of the meeting of
the National Munitions Control Board which was held on
November 22, 1939. A copy of these minutes was enclosed
with the letter which I addressed to you under date of
November 30, 1939.

The regulations which I prescribed on December 7, 1936,
in virtue of the authority vested in me by Executive order
No. 7297 of February 15, 1936, to govern the exportation
of tin-plate scrap under the provisions of the act of Con-
gress approved February 15, 1936, provide under para-
graph (3) that the Secretary of State will issue export
licenses to authorize the exportation of tin-plate scrap
when, in the opinion of the National Munitions Control
Board, the issuance of such licenses may be consistent
with

The Honorable

Henry Morgenthau, Jr.,
Secretary of the Treasury.
with the purposes of the act. The purposes of the act are embodied in the preamble thereof in which it is stated that, "in the interest of national defense, it is hereby declared to be the policy of Congress and the purpose and intent of this Act to protect, preserve, and develop domestic sources of tin, to restrain the depletion of domestic reserves of tin-bearing materials, and to lessen the present costly and dangerously dependent position of the United States with respect to resources of tin."

It has been customary for the Board to meet each year for the purpose of giving consideration to the adoption of rules of procedure to govern the issuance of licenses for the exportation of tin-plate scrap for the ensuing calendar year. It is my understanding that the Advisory Commission to the Council of National Defense is of the opinion that the interests of the national defense require that the exportation of tin-plate scrap should not be permitted. In view of this fact and in view of the stated purposes of the act, it is my feeling that no action should be taken at this time to make any provision for the issuance of licenses during the calendar year 1941. It would seem pertinent to mention at this point that, since the existing legislation has been in effect, all of the tin-plate scrap exported from this country has gone to Japan. The Department has never received a single application for license to export tin-plate scrap to any country other than Japan.
You will recall that the Board, at its meeting on November 28, 1939, authorized me to assign allotments for the exportation of tin-plate scrap during the calendar year 1940 to a total of not to exceed 15,000 long tons in accordance with the rules of procedure adopted at that meeting. Requests for allotments totalling 15,181 long tons have been received up to the present time. The allotments assigned thus far during the present calendar year total 8,363 long tons. Licenses have been issued since January 1, 1940, authorizing the exportation of a total of 4,269 long tons. Actual exports of tin-plate scrap between January 1 and October 31, 1940, inclusive, as shown by the Department of Commerce statistics, totalled 2,841 long tons, all to Japan. It appears, therefore, that, of the total quantity of 15,000 long tons which the Board authorized to be exported during 1940, a total of but 4,269 long tons has been licensed for export, and a total quantity of but 2,841 long tons has actually been exported. I may state, for your information in this connection, that under existing circumstances I have not availed myself of the authorization granted to me by the Board at its meeting of November 28, 1939, to assign additional allotments for the last six months of the present calendar year.
In view of the considerations mentioned above, I do not believe that it will be necessary for the Board to meet for the purpose of considering this subject. Accordingly, unless you or some other member of the Board disagrees, I do not propose to call a meeting of the Board at this time. On January 1, 1941, the situation would then be that no provision would have been made for the issuance of allotments or the granting of licenses for the exportation of tin-plate scrap to any country, and any person who should make inquiry in regard thereto would be so informed. The effect of this proposed action would be that the exportation of tin-plate scrap from this country would not be authorized until such time in the future as the Board may meet and take action to reinstate the licensing procedure heretofore in effect.

I should appreciate it if you would communicate to me, as soon as practicable, your views on this subject.

Similar letters have been addressed to the other members of the National Munitions Control Board.

Sincerely yours,

[Signature]

Telegram from London dated January 9th.

1. **Naval.**
   
   On the 8th one aircraft attacked without success merchant vessel of 3,500 tons in Bjorne Fjord.

2. **Night of 8th/9th**
   
   Strong force of heavy bombers attacked Tirpitz and ship building yards at Wilhelmshaven and docks at Emden preliminary report of results good. All returned safely - weather conditions perfect.

3. **Night of 6th/7th.**
   
   Aircraft bombed submarine base at Massawa, bombs fell near moorings but searchlight glare prevented observation of damage.

4. **Royal Air Force.**
   
   Italy on night of 8th/9th January. Naples. 10 Wellingtons were sent to attack targets at Naples.

5. **German Air Force.**
   
   Night of 8th/9th January. Nothing to report.

6. **Aircraft casualties in operations over and from the British Isles** - none to report.

7. **Secret. Home Security.**
   
   On the afternoon of January 8th an enemy machine, while dropping bombs on Coventry, hit a balloon barrage cable and broke it, but managed to get away.
This military situation report is issued by the Military Intelligence Division, General Staff. In view of the occasional inclusion of political information and of opinion it is classified as Restricted.

I. Western Theater of War.

Last night the German Air Force, operating in normal strength, varied its technique and made widespread attacks on at least fifteen cities, including Liverpool and Manchester, in the northwest industrial area.

The R.A.F. last night attacked the Ruhr industrial area, concentrating on oil targets, and bombed docks along the French coast and oil targets at Rotterdam.

II. Greek Theater of War.

The Greeks claim the capture of Kismira, dominating the main interior road north to Berat, Elbasan, and Tirana.

Minor air activity.

III. Mediterranean and African Theaters of War.

British mechanized forces are operating west of Tobruk and preparations for its capture are proceeding.

In East Africa, an Italian outpost northeast of Kassala on the Sudan frontier, has been occupied by the British.

In Ethiopia, rebellious natives have forced the Italians to evacuate the post of Qubba.

The R.A.F. continues to support the British advance into Libya.

The British attacked Messina, Sicily, using incendiaries.
IV. Far East.

Thai-Indo Chinese hostilities have been intensified, with the Thais on the offensive.
London, filed 1400, January 30, 1941.

1. On Thursday, January 30, railway installations in Boulogne were attacked by planes of the British Coastal Command. During the preceding night planes from the bomber Command successfully attacked Douvres, Trepits (?), and Wilhelmshaven and dropped propaganda leaflets. They also planted mines along the north coast of Germany.

2. During daylight hours of January 3 German aircraft engaged in only two widely scattered attacks. One was along the eastern coast of Britain and the other was over the Thames Estuary. That night German planes severely attacked Northampton, Liverpool, Rugby and Birmingham. Fairly heavy secondary raids were carried out against London, Sheffield, Portsmouth, Bristol and Southampton. Two German bombers ran into a balloon cable but the cable broke and the planes got away safely. The damage caused by these raids and the number of German planes used in them is not known. Neither in the number of German aircraft casualties known. Also there is no information as to whether or not British night fighters intercepted the attackers.

3. British airplanes continue to carry out successful attacks in Libya and areas in the Sudan. The submarine base and the power plant at Merssa were severely beached during the night of January 7-8.

4. It is thought that a direct hit was made on an Italian battleship during the night of January 8-9 in a severe attack on
Replies by British planes from Malta. Hits on other targets caused explosions and started fires. A ship and a dock were hit by British bombs at Palermo.

5. There is now the equivalent of two and one-half armored divisions under General Hewell's command. The 2d Armored Division, which was sent to Egypt, arrived there on December 26. The two divisions whose movement to the Middle Eastern theater was mentioned in our column of January 3 are Infantry divisions.

6. Captured Italian weapons are being shipped to Greece and up to now a total of 20,000 captured Italians have been sent to India.

7. The island of Malta is being prepared as a base for destroyers. The island is strongly held and at present has supplies sufficient for a 6-month period. Under cover of fleet raids and diversions supplementary supplies are arriving each month.

8. Two new ports on the northwest coast of Scotland are being rapidly built by the British. Since these ports will be able to care for three cargo vessels each, the time consumed by turning around will be lessened and the likelihood of damage to merchant vessels from air bombing will be reduced. It is estimated that they will be completed in six months.

9. On January 6 some of the fires started by the German raid on Bristol of January 5-6 were still smoldering. This raid lasted 12 hours. During the first two or one-half hours the Germans used incendiary bombs exclusively and started many fires. For the next four hours high explosive bombs were used principally but some
Incendiaries were used. This was followed by a 30-minute pause.
At regular intervals during the next five hours high explosive
bombs were used.
Bucharest, filed January 10, 1941.

Including one Panzer division, the German units in
Rumania now consist of six or seven divisions. The number in-
cluding air force and corps troops is about 140,000. Additional
troops continue to arrive.

The chief of operations of the German Armed Forces,
General Von Greifenberg, is in Rumania temporarily. This officer
was at Leavenworth 1922-1923.

Cairo, filed 10:00, January 9, 1941.
From Colonel G. E. Brown, A. C., Air Observer in Egypt.

EXTRACT

1. I witnessed both the ground and the air operations at Bardia. Major Fellows is continuing this observation up to and including the occupation of Tobruk.

2. The British Eastern Desert Force, which is now called the 15th Corps, is composed of the 7th Armoured Division, the 16th Infantry Brigade, the 6th Australian Division and corps troops.

3. The Italian forces at Bardia proved to be half again as large as was expected and included the 50th Frontier Guards, the 1st and 2nd Corps Headquarters, the 1st and 2nd Blackshirt Militia and the 1st and 2nd Divisions.

4. Although Italian Infantry showed feeble resistance and gave up readily, the artillery held on. The artillery proved to be accurate and prolonged the second phase of the attack approximately 18 hours beyond that had been planned.

5. It is now believed that the only Italian forces at Tobruk are Frontier Guards, corps and army troops, and the 6th Division. Tobruk’s position is not as strong as was that of Bardia.

6. As soon as a system of supply can be organized an attempt to advance in the direction of Benghazi will probably be made. Unless the resistance of the Italians should collapse completely, the advance will probably be halted at the mountainous area between Ruha and Benghazi for a month or more. Numerous Italian airplanes have been withdrawn to

CONFIDENTIAL
this area. An estimated 220 Italian planes in this theater are believed to be serviceable and operating, while 280 additional planes are unserviceable at the present time.

7. Before the attack the British No. 503 (General Reconnaissance) Squadron bombed the harbor at Bardia heavily at night and the following night Tobruk was the object of the attack. Each day reconnaissance was carried out at high altitudes with one plane usually following the road along the coast line as far as Bengazi.

8. On January 5 the northern section of the Bardia area was bombed by two Blenheim bomber squadrons. These squadrons, acting in conjunction with shelling from the fleet, carried out the attack at 800, 1,200 and 1,600 feet. On January 3 and 4 single Blenheim bombers flying at high altitudes raided night occupied airstreems with small bombs. These planes kept the Italian fighter planes to the rear. However on January 6 one Blenheim bomber was lost. Tobruk was bombed on January 5 by three Blenheim bomber squadrons which carried out operations from 20,000 feet in the face of heavy anti-aircraft fire. Eight Italian airplanes, either on the ground or just taking off, were destroyed by four Hurricane fighter planes attacking each of two airstreems. Continuous fighter patrols were maintained each day west of the battle area. Single Hurricane fighters were sent forward every ten minutes to advanced fields, after which each would make a 12-hour patrol at altitudes between 12,000 and 20,000 feet. Each available plane made two such flights daily. On January 6 a Hurricane fighter plane was lost.

CONFIDENTIAL
9. Continuous tactical reconnaissance was carried out over the pedal area by the British No. 100 (Army Cooperation) Squadron, while Lysander observation planes carried out intermittent artillery observation. Hurricane planes of this squadron reconnoitered to Tobruk. The Tobruk and Bardia defenses were mapped by Hurricane planes on photo-reconnaissance missions. Gladiator bi-plane fighters of the Australian No. 3 squadron, which is also under the control of the Army, carried out patrols at low altitudes over Italian troops west of the Bardia area.

10. The British had to send about half of the supplies for their whole force by water through the port of Selma. Selma was farther forward than most of the force, and despite its vulnerability to bombing and shelling, it was not heavily attacked by the Italians until January 5. On that date numerous Italian attempts in the Selma and Bardia areas were repulsed with probable losses of more than 20 Italian planes.

11. According to reports of Italian prisoners, the main stores of food in Bardia were destroyed shortly after Christmas by British bombing.

12. The heavy fire from 15-inch naval guns was feared although many of them boused off the hard rock desert and did not explode. Bombs and small shells merely caused annoyance in that they required the seeking of shelter.

13. It is my plan to go back to the Bardia area about January 14 in order to carry out observation of the operation of the recently organized fighter wing. Later in the month I plan to proceed to Selma.

London, filed 1400, January 12, 1943.

1. On Friday, January 10, British fighter planes escorted planes of the Bomber Command on heavy daylight attacks all along the French Channel coast and penetrated a distance of 85 miles inland. No British planes were lost, but other results are unknown. During the night before Bomber Command planes continued to plant mines along the northern coast of Germany and boomed docks on inland waterways and railroads. The main Bomber Command objectives that night, 64 oil refineries in Rotterdam and others in Zeeuwshaven, were successfully attacked by 236 heavy and medium bombers. On the same night a naval unit in a French port was successfully bombed by planes of the Coastal Command. On January 9, Coastal Command planes made raids on shipping in Denmark and made two hits on a cruiser of the Hipper class at Taranto.

2. On January 10, German planes engaged in minor patrols over the Thames Estuary and the English Channel. Single planes made occasional inland penetrations. During the night before 330 German planes were plotted over England. During the night of January 10-11, 25 German planes were noticed over Liverpool Bay and the Irish Sea, and 76 were plotted in the Portsmouth area.

3. It has now been determined that in the British raid on Naples on January 8-9, one hit was scored on a battleship of the Littorio class, and cargo ships, destroyers and gunboats were damaged. During daylight hours of January 9 six British fighter
CONFIDENTIAL

Planes intercepted 12 Italian planes attacking Malta and destroyed five of the Italian planes without losing a single ship. The railroad yards and harbor at Messina, Sicily, were successfully attacked during the night of January 9-10, by Malta-based bombers.

4. Planes of the Royal Air Force were very active on January 9 and 10 over all theaters in the Middle East. The harbor and airfield at Bengasi and the airfield at Benina in Libya were bombed with great success.

5. The intention of the British to wage a more aggressive air war, which we mentioned in earlier reports, is believed to have begun to take shape with the heavy daylight raid on January 10 reported in paragraph 1, above.

6. Imports totalling 636,000 tons, made up principally of munitions, machine tools and airplanes from the United States and Canada, arrived in Britain during the week of December 29 to January 4.

Received at the War Department
at 12:53 P.M., January 11, 1941

Athens, filed January 9, 1941.

Your attention is invited, with regard to the situation in Athens, to cabledgrams numbers four and six from the legation. The practical end of Greek advances seems to be caused by Greek failure to prevent re-enforcement; by Italian superiority in the air; by the complexity of the terrain and the weather conditions; by stubborn resistance in Italian prepared positions; and by equipment shortage, especially in trucks. This last has added to trouble in communications and supply. A general pessimistic note, recently developed among the military authorities in Athens, has been increased by stories that German intervention impending. Italian strength is now estimated at about 350,000 in Albania. The immediate objectives and the strength of the Greeks is not materially different from what it was. Troop morale is high as ever. The line now runs approximately Pogradets-Bratilo-Yserovonko-Klisoura (exclusive) - Topoleni (exclusive) ending on the coast some three miles above Himara.

I. Western Theater of War.

There was little German offensive air activity during daylight of the 10th. Last night the Luftwaffe apparently operated normally, concentrating on Portsmouth.

During daylight of the 10th the R.A.F. made raids, heavily escorted by pursuit, on German airfields and ports in France. Success of this new procedure and losses incurred are not yet determined. Last night Brest and Le Havre were again raided.

II. Greek Theater of War.

Greek headquarters officially announce the occupation of Elisura.

Limited air activity.

III. Mediterranean and African Theaters of War.

1. The British are concentrating forces around Tobruk. The Italians report 100 British mechanized vehicles heading toward Akruma, which is about 20 miles southeast of Tobruk.

It is reported that the British have retaken Buna in Northeast Kenya, and that El Wak near the Kenya-Italian Somaliland border has been abandoned by the Italians.

2. German air units are now operating from southern Italy and perhaps in Albania. Air attacks are claimed on British naval units in the straits of Sicily. Malta was bombed on the night of the 10th.

The R.A.F. is continuing its attacks in Libya. Palermo, Sicily, was bombed on the night of the 10th.
To: Secretary Morgenthau  
From: Mr. Foley

There was a meeting in the Attorney General's office on January 11, 1941 attended by the following: Attorney General Jackson, Assistant Attorney General Arnold, Assistant Attorney General Shea, L. M. C. Smith of Justice, Mr. Berle of the State Department, Leon Henderson, Mr. Foley and Mr. Bernstein for the Treasury.

Jackson stated that he had been designated by the President to head a committee to work out a program of economic defense. Jackson said he thought we ought first to try to do what we could under existing legislation and then consider new legislation.

A discussion developed of the problems that needed handling. The point was particularly made that the Army and Navy and the Defense Commission group were seeking to get control of economic defense problems, that this was entirely undesirable from the point of view of progressive and liberal treatment of economic and non-military problems, and that in order to forestall this possibility it was necessary for other agencies of the Government to cooperate in a program to be presented to the President.

A discussion arose as to the Executive Order which had been submitted by the Treasury. Mr. Henderson felt quite troubled at the proposed membership of the Economic Defense Board, particularly the presence of the Army and Navy and Office of Production Management thereon. He made some suggestions as to an organizational set-up for handling economic problems. Berle emphasized that the State Department was essentially only a policy making organization and would not wish to handle the administrative aspects of such an economic defense but urged that others should not seek to grab power for themselves. Jackson also stated he wished to keep Justice a law department and not burden it with administrative problems. Mr. Foley indicated that the Treasury was an organization set up to administer such problems and would be glad to serve in any such capacity as was desired. He also pointed out some of the aspects of the Executive Order and how the Department would function as an administrative body subject to the policies formulated by the Economic Defense Board.

It was agreed to have a further meeting on Monday, January 13, 1941, at 2:30 p.m., at which time each person would come prepared to discuss what should be included or excluded from the Treasury's proposed Executive Order and what kind of organization should handle the policy and administrative problems. Copies of the Executive Order and memorandum from this Department to the President, explaining the Order, were distributed to the people attending the meeting.
Registered sterling transactions of the reporting banks were as follows:

Sold to commercial concerns $29,000
Purchased from commercial concerns $6,000

The Federal Reserve Bank of New York purchased $1,800 in registered sterling from a non-reporting bank.

Open market sterling was steady at 4.03-1/4. Transactions of the reporting banks were:

Sold to commercial concerns $2,000
Purchased from commercial concerns -0-

The Cuban peso, which improved to 7-11/16% discount during the first part of this week, weakened today to close at a discount of 8-1/16%.

Closing quotations for the other currencies were:

- Canadian dollar 14% discount
- Swiss franc .2321
- Swedish krona .2385
- Reichsmark .4005
- Lira .0505
- Argentine peso (free) .2360
- Brazilian milreis (free) .0505
- Mexican peso .2066
- Chinese yuan .05-5/8

There were no gold transactions consummated by us today.

Under licenses previously issued, the Federal Reserve Bank of New York transferred from the account of the Central Bank of El Salvador gold valued at approximately $196,950 to account No. 6 of the B.I.S. This transfer raises the amount of gold in B.I.S. account No. 6 to approximately $647,750; gold in this account is owned by the Central Bank of El Salvador and is pledged to secure repayment of credits granted that Bank by the B.I.S.
The Federal Reserve Bank of New York reported that the Central Bank of El Salvador repaid $50,000 of the three-month loans previously made to it by the Federal. Upon repayment, the Federal transferred $544,290.50 worth of gold from the collateral account to the Salvadoran bank's own earmarked account. The amount of loans outstanding is now $772,000, secured by $863,515.02 in gold.

The Federal Reserve Bank of New York reported that the Bank of Mexico shipped \(447,000\) in gold from Mexico to the Federal. The disposition of this shipment is unknown at the present time.

Today's Bombay gold price was equivalent to \(33.31\), a decline of \(5\) from Wednesday's level. Silver was priced at the equivalent of \(44.05\), up \(1/16\).

Rec'd 11:42 p.m.

Secretary of State,
Washington.

26, Eleventh.

1941 ordinary session of Rikstagh opened today. In speech from throne King made traditional statement that Sweden's relations with foreign powers were friendly and expressed hope that with support of united and determined people he would still be able to preserve peace and freedom. Purpose of country's economic policy was not only to satisfy needs of day but also safeguard sustenance of people in days to come by adjusting production and regulating consumption of raw material resources and other essentials.

Measures had been planned to counteract unemployment. King forecast bills for provisional extension to full year of initial training period for conscripts pending plans for reorganization of entire defense system. Needs of national defense would continue to place heavy burdens on public in form of taxes and loans.

National budget proposed by government for coming fiscal year lists current revenues at 2,062,000,000 crowns and current expenditures at 1,889,000,000 leaving nominal surplus of 193,000,000. This does not include extraordinary expenditures anticipated to combat unemployment which will be listed under two supplementary budgets to be laid before Rikstagh later in session and which
will turn nominal surplus into heavy deficit. Minister of Finance estimates that defense appropriations alone for coming fiscal year will amount to not less than 1,300,000,000 and no more than 1,600,000,000 crowns while ordinary operating budget in this field for 1961-62 calls for 500,000,000 only. Actual deficit for coming fiscal year estimated at between 500,000,000 and 1,000,000,000. Corresponding deficit for current fiscal year ending June 30, 1941 estimated at 1,700,000,000. Total defense expenditure for this year now estimated at 2,400,000,000.

Please telegraph the value of gold involved.

LANE
Secretary of State,
Washington.

39, January 11, 10 a.m. (SECTION ONE).

FOR TREASURY FROM HEATH.

The issuance of the mint statement for the end of December 1940 makes possible an estimate of the present circulation of cash money in Germany. The December Rentenbank statement is not yet available but since no new notes had been issued since June it can probably be assumed that none were issued in December. On this basis the net cash money circulation (gross coin and note circulation less Reichsbank holdings) was 16,694,000,000 marks on December 31, 1940 compared with 15,541,000,000 marks on September 30, 1940 and 14,502,000,000 marks on December 31, 1939. The individual items in million marks stood as follows: on December 31, 1940 (compared with September 30, 1940 and December 31, 1939): Reichsbank notes 14,053 (12,847; 11,798); Rentenbank notes 1,053 (1,056; 957); coins 1,726 gross 1,608 net (September 1,805 gross...
It will be noted that there was a decrease of approximately 80,000,000 marks in gross coin circulation from September to December 1940. This was due to the demonetization of nickel 50 pfennig pieces of which 107,000,000 marks were still in circulation on September 30. Nickel one mark pieces of which 419,000,000 marks had been in circulation on June 30, 1940 were withdrawn from circulation in the period between the June and September quarterly statements.

It is not possible, however, to make a complete survey of Germany's present monetary position without information as to the volume of demand deposits in German banks, the monthly report of which ceased with the outbreak of war. However, sight deposits in the Reichsbank, a very important form of bank money, have shown a substantial increase during the year standing at 2,561,000,000 marks on December 31, 1940 compared with 2,012,000,000 marks a year earlier. Adding this to the above figures total cash and bank money circulation (without commercial bank demand deposits) stood at 19,255,000,000 marks on December 31, 1940 compared with 16,520,000,000 marks on December 31, 1939. Undoubtedly, commercial bank deposits have also increased greatly during the war. Compared with a year ago there has also been a considerable increase in the velocity of the Reichsbank's sight deposits.

MORRIS

NPL
Secretary of State,
Washington.

99, (SECTION TWO)

Total clearings (in payments plus out-payments) of the Reichsbank giro system were 141 billion marks in September, 150 billion marks in October and 162 billion marks in November, 1940 (the latest figure available) compared with 116, 116 and 128 billion marks in the corresponding months of 1939. There had been some increase in sight deposits in the Reichsbank but allowing for this total clearings were 88 times as great as the average of the sight deposits in the four weekly statements of the months in September, 1940, 90 times as great in October 1940 and 95 in November 1940, as compared with 76, 83, and 86 in the corresponding months of 1939. It should be noted, however, that there had been a considerable decrease in velocity during the first months of the war since sight deposits had shown a greater relative increase than clearings. No information is available concerning the volume of clearings in the clearing systems of the commercial and savings banks.
banks. Since the Reichsbank giro system is used chiefly for payments between banks, large firms, government agencies, et cetera, the increase in its clearings probably reflects chiefly an increase in turnover in the financial sector. It has frequently been pointed out in the press that the velocity of cash money has probably decreased since the beginning of the war.

Although there has thus been a considerable currency expansion in 1940 this can undoubtedly to a fairly considerable extent be attributed to territorial expansion. The most important annexations occurred before 1940 but undoubtedly there have been substantial increases during 1940 in the currency circulation of Poland the Sudetenland, Danzig, Memel, et cetera, as well as in the territories annexed in 1940 which would partially account for the considerable expansion in currency circulation in the Reich. However, there has undoubtedly been a mild inflationary movement in prices as well (see my air mail memorandum of January 7) since even the official but doctored cost of living index rose by 3.5% from December 1939 to December 1940 and this takes no account of quality declines, et cetera. END MESSAGE.
Secretary of State,

Washington.

120, January 11, 3 p.m.
My 4941, December 7, 10 a.m.

FOR TREASURY FROM SEAT.

According to the statement of the Reich’s short term debt at the end of October which has just been published the Reich increased its short term borrowing during October by 1,360,000,000 marks to a total of 35,859,000,000 marks. Treasury bills and certificates issued increased by 1,758,000,000 marks to 27,913,000,000 marks, other short term loans (including the loan of the Reichskreditkassen system to the Reich) increased by 202,000,000 marks to 1,715,000,000 marks, the Reich’s operating credit from the Reichsbank increased by 4,000,000 to 650,000,000 marks and the amount of tax certificates outstanding decreased by 3,000,000 to 3,555,000,000 marks.

The increase in short term debt in October was more than twice as great as in September when it was only 842,000,000.
EH -2- 120, January 11, 3 p.m. from Berlin.

842,000,000 marks but less than that of the peak months of short term May, July and August. In September the increase in long term debt at 2,337,000,000 marks was very large but in all probability long term borrowing continued on a fairly large scale during October. In a speech recently made by Director of the Reichsbank Puhl, he stated that close to 8,000,000,000 4% treasury bonds were issued during 1940 which means that almost 3,000,000,000 marks were issued during the last three months of the year months of the year. The savings banks and insurance institutions in all probability also bought as usual a considerable amount of li-loans during October. The total increase in debt during October was therefore probably not under the monthly average of 3,200,000 marks borrowed during the preceding five months.

NK

MORRIS
PARAPHRASE OF TELEGRAM DATED JANUARY 11, 4 P. M. FROM RANDOC.

At Chungking next week a conference is to be held at which Chinese and British officials will attend. Burma will be represented by the Minister of Commerce and Secretary, the Chief of Public Works in the Shan States, and the Counselor to the Governor. The Minister of Commerce is the only Burmese included. Also participating in the conference will be the British Ambassador to China. One of the important matters to be discussed will be the Yunnan-Burma railway, China pressing again for the construction of the Burma link. The Burma-Chinese boundary question will also come up for discussion, together with various communication and trade questions, including traffic control on the Burma road and the construction of new highways and the improvement of others.

As a consequence of damage done by the Japanese bombing of the old suspension bridge across the Mekong river on the Burma road on January 3, 5 and 6 transshipment by raft is necessary. The new structure over the stream was also extensively damaged.

CONFIDENTIAL. 15,534 tons of Government supplies were shipped by the Southwest Company from Lashio into China during the last two and one-half months of 1940.
PERSONAL AND SECRET.

11th January, 1941.

Dear Mr. Secretary,

I enclose herein for your personal and secret information a copy of the latest report received from London on the military situation.

Believe me,

Dear Mr. Secretary,

Very sincerely yours,

[Signature]

The Honourable
Henry Morgenthau, Jr.,
United States Treasury,
Washington, D.C.
Telegram from London dated
10th January, 1941.

Naval.

British destroyers on December 26th sank one, on December 29th captured another, and on December 31st, captured two more motor schooners being employed by Italians running through to Bardia from Tobruk by night.

2. Enemy formation of bombers made several unsuccessful attacks on British units at Gallura at dusk and dawn during operations. One torpedo-bomber believed shot down.

3. Position of our own troops precluded further bombardment of Bardia after 15.30 January 3rd.

4. Coastal Command attacked Hipper Class cruiser in Brest evening of January 9th made two hits on her, and two on adjacent docks and the Hule.

5. During the week ending January 4th, 656,981 tons of imports arrived in convoy in United Kingdom, including large quantities of aeroplanes, machine tools and munitions from Canada and United States and nearly 8,000 tons of eggs.

6. During the month of December 2,683 tons cargo destined for enemy were seized in prize.

Right of January 5/6th. Attack on Naples was successful. A stuck of bombs dropped across the stern of Littorio class battleship was followed by dull red glow. Hits were registered on quay, in dry dock area.
and amongst merchant vessels. Many bombs fell near the railway station and a gasometer was set on fire.

8. Night of January 9th/10th. Two hundred bombers were sent out, of which 156 heavy and medium were to attack oil plants at Delsenkirchen. Petroleum depot at Rotterdam also attacked.

9. Libya

January 9th. 3 Blenheims and several Hurricanes attacked a transport convoy near Girabub and caused considerable damage. Armoured car patrols are expected to have captured the remainder of the convoy. Hurricanes also machine-gunned landing grounds where two Italian bombers were destroyed and eleven others damaged. Tukruk was attacked by Blenheims. Details not yet available.

10. German Air Force

January 9th. Our fighter command carried out exclusive offensive operations over the Straits, some squadrons penetrated the French Coast at Boulogne without encountering enemy aircraft.

Night of January 9th/10th. Enemy activity was on a large scale, about 310 aircraft being plotted all over the country and it is difficult to assess the main objectives - numerous fires were started but they were all quickly under control and no serious military damage was reported.
Belgrade, filed 15:30, January 12, 1941.

I have been informed that transit through Hungary to Rumania for 1500 troop trains has been requested by Germany. This information obtained from Bulgarian military attaché who received it from German military attaché who returned from Berlin a short time ago. The Yugoslav 6-2 has raised his estimate to 150,000 of German troops in Rumania.

London, filed 14:35, January 12, 1941.

1. On Friday, January 10, and during the following night planes of the British Coastal Command attacked cargo boats and naval units in port. Results are unknown. During the night of January 10-11 occupied ports along the northwest coast of France were bombed with unserved results by planes of the Bomber Command. As yet there is no official information concerning the damage done by the heavy British attack during daylight hours of January 10.

2. There was no reported damage from the minor German raids against Britain on January 11. In the early evening of January 11-12 London was severely attacked by 114 German bombers. There were some casualties and considerable damage from high explosive bombs in the residential district in the West End of London. Several severe fires were started in the business district. Buildings where fire watchers were on duty over the week-end were hit by incendiary bombs but suffered no damage from fires. These buildings which had been practically deserted for the week-end and in which no fire watchers were on duty were the ones which were burned. This was equally true in connection with the German incendiary attack on London during the night of December 29-30. The habit of leaving the central city deserted over the week-ends is becoming a costly luxury, and the Government will probably take some action with regard to it.

3. In the Middle Eastern theater British airplanes engaged
