U.S. Housing Authority

HMJr tells 9:30 group Maxcy has been talking to Bell about financing; Taylor adds Straus has been talking to him about their legislation 12/13/37 101: 285

a) McReynolds has discovered that "the various units are stalling, waiting for the Fed. Govt. to do it all; Straus seems to have $30- to $40 million worth of commitments where the communities are going to do 10%; if now he makes it easier for the cities to put up 10% or makes it a phony 10%, we'll be right back at the starting point"

1) HMJr asks McReynolds to clear this up with Straus

HMJr-Straus telephone conversation 12/13/37 302

a) HMJr tells Straus Treas. is not going to give requested endorsement
2 U.S. Housing Authority

b) HMJr discovers Straus has no actual commitments that communities have merely asked that funds be earmarked until they could see what could be done on raising their 10%; HMJr feels, therefore, that publicity has been definitely misleading. HMJr asks McReynolds to see Straus immediately.

12/13/37
U.S. Housing Authority

McReynolds reports on conf. with Straus to 9:30 group 12/14/37

102: 8

a) Straus abandoned first proposal with respect to "relieving those fellows of contribution if they came in this yr."

b) Straus admitted he had not one actual commitment to date; has two applications – one in N.Y. and one in St. Petersburg, Fla. – which may be able to produce the 10% by borrowing on bonds secured with a first mortgage on the projects to be developed, thus subordinating the Govt.'s 90% loan to their own 10% loan

1) McReynolds counters with proposal that Govt. lend full 100% but that the local authority be required to contribute an
2 U.S. Housing Authority

equal amount on the annual basis with the Fed. Govt.

2) Final offer by Housing Authority is that "they put up 60% instead of 20% of the Fed. loan"

a) Taylor expresses dissatisfaction - feels that McReynolds accomplished nothing; HMJr disagrees and states Treas. will send this forward to Budget with its approval although he, too, feels bill is far from ideal
