President's speech at dedication Georgia Hall--Warm Springs

Nov. 24, 1933
Most people have visions of things they would like to see accomplished; fortunate are those who with their own eyes see the accomplishment becoming a fact.

Most of you who are here tonight know the story of Warm Springs during the past nine years. You know of the hopeful handful of crippled children and adults who came seeking to walk again, and of the growth of our physical facilities and of our medical care to the point where the completion of Georgia Hall gives us a clear idea of the rounded picture of the Georgia Warm Springs of the future.

In all these years our splendid progress would have been impossible had we not had the sympathy, the understanding and the help of our neighbors; and tonight I express my appreciation and thanks, first, to you my neighbors of Warm Springs and Meriwether County, for your true friendship toward me and toward all those who have come here; and secondly, to you the people of Georgia whose welcome hospitality has culminated in this splendid gift to the Foundation and made me feel prouder than ever to call this "my other home".
It is this understanding spirit on the part of those who surround us that has contributed so greatly to what we call the "spirit of Warm Springs". No perfectly appointed hospital, no medical care of the highest skill can accomplish the best results unless at the same time we build up, as Mr. Callaway has said, confidence, self-reliance and cheerfulness on the part of the patients themselves. That is why the Warm Springs Foundation has established itself as a practical success in bringing back so many crippled children and crippled grown-ups to normal activities, and at the same time to a normal confidence in themselves.

We hear much these days of two adjectives -- "social" and "economic". Generally they are used to denote different things. Here at Warm Springs we have proved that in our work they go hand in hand. Let me give you an example: If a child is so incapacitated, because of infantile paralysis or accident or some other cause, that the child is unable to get about, take care of himself and go to school, the chances are that in most cases some grown-up person must spend a large part of the time in taking care of the child. Every social objective requires
that the child be rehabilitated to lead a normal life -- to become a useful member of society. In accomplishing this we reach at the same time the economic objective, for we restore the child and at the same time we release a member of his family from the constant supervision and care of the child, and enable that person so to be an economically useful unit in the community.

The figures show that there are well over three hundred thousand crippled children in the United States and probably at least an equal number of grown-up people. It is my belief, and I think the belief of the doctors of the United States, that the great majority of these citizens of ours can be restored to useful citizenship if we can give them the most modern, scientific, medical and educational treatment. Toward the attainment of that goal the Georgia Warm Springs Foundation seeks to play a leading part. This work at Warm Springs is not local; people come here from every state in the Union and from many foreign countries. It is true that we can take care of only a small proportion of those who need care; but at the same time the educational value of the methods and of their results is making itself widely felt in the care of the handicapped throughout the United States.
I wish much that people all over the Country could be with us here tonight to learn of the splendid effectiveness of the work we are doing; to see this beautiful building which for all time will be the center of our work, and especially to understand that thing which we call "the spirit of Warm Springs", which does so much to supplement the skill of science. The people of Georgia have given to this work a noble gift. In the name of the Trustees of the Foundation I thank them, and especially I thank the Georgia Hall Committee, who, through the untiring efforts and leadership of Mr. Cason Callaway and Mr. Cator Woolford, have made tangible the vision of many years ago.

You have contributed greatly to a great ideal of humanity; you have made me very happy and you have given at once to your country, to your state, and to your nation.
ADDRESS OF THE PRESIDENT
AT THE DEDICATION OF GEORGIA HALL
WARM SPRINGS, GEORGIA

November 24, 1933

Most people have visions of things they would like to see accomplished; fortunate are those who with their own eyes see the accomplishment becoming a fact.

Most of you who are here tonight know the story of Warm Springs during the past nine years. You know of the hopeful handful of crippled children and adults who came seeking to walk again, and of the growth of our physical facilities and of our medical care to the point where the completion of Georgia Hall gives us a clear idea of the rounded picture of the Georgia Warm Springs of the future.

In all these years our splendid progress would have been impossible had we not had the sympathy, the understanding and the help of our neighbors; and tonight I express my appreciation and thanks, first, to you my neighbors of Warm Springs and Meriwether County, for your true friendship toward me and toward all those who have come here; and secondly, to you the people of Georgia whose welcome hospitality has culminated in this splendid gift to the Foundation and made me feel prouder than ever to call this "my other home."
Most people have notions of things they would like to see accomplished. Furthermore, the phrase, "most people," means that it is the people who are able to see the accomplishment, becoming a fact.

Most of these people outline the basic items they want to see accomplished. They outline the basic items they think need to be done and outline the steps that need to be taken to accomplish these objectives. When we hear about the accomplishments of the people who outline these objectives, we tend to think in terms of the accomplishments of the people who outline the objectives and the people who accomplish those objectives.

If I were to ask you what you think are the three most important problems facing our country, you might think of the problems of war, foreign and domestic, and the problems of the economy. I think these are the three most important problems facing our country.

I want to express my appreciation and thanks, to you, for your efforts to overcome these problems and to work toward a solution of these problems. I want to express my appreciation and thanks, to you, for your efforts to overcome these problems and to work toward a solution of these problems.
It is this understanding spirit on the part of those who surround us that has contributed so greatly to what we call the "spirit of Warm Springs."

No perfectly appointed hospital, no medical care of the highest skill can accomplish the best results unless at the same time we build up, as Mr. Callaway has said, confidence, self-reliance and cheerfulness on the part of the patients themselves. That is why the Warm Springs Foundation has established itself as a practical success in bringing back so many crippled children and crippled grown-ups to normal activities, and at the same time to a normal confidence in themselves.

We hear much these days of two adjectives -- "social" and "economic." Generally they are used to denote different things. Here at Warm Springs we have proved that in our work they go hand in hand. Let me give you an example: If a child is so incapacitated, because of infantile paralysis or accident or some other cause, that the child is unable to get about, take care of himself and go to school, the chances are that in most cases some grown-up person must spend a large part of the time in taking care of the child. Every social objective requires that the child be rehabilitated to lead a normal life -- to become a useful member of society. In accomplishing this we reach at the same time the economic objective, for we restore the child and at the same time we release a member of his family.
from the constant supervision and care of the child, and enable that person so to be an economically useful unit in the community.

Figures show that there are well over three hundred thousand crippled children in the United States and probably at least an equal number of grown-up people. It is my belief, and I think the belief of the doctors of the United States, that the great majority of these citizens of ours, more than half a million of them, can be restored to useful citizenship if we can give them the most modern, scientific, medical and educational treatment. Toward the attainment of that goal the Georgia Warm Springs Foundation seeks to play a leading part. This work at Warm Springs is not local; people come here from every state in the Union and from many foreign countries. It is true that we can take care of only a small proportion of those who need care; but at the same time the educational value of the methods and of their results is making itself widely felt in the care of the handicapped throughout the United States.

I wish much that people all over the country could be with us here tonight to learn of the splendid effectiveness of the work we are doing; to see this beautiful building which for all time will be the center of our work, and especially to understand that thing which we call "the spirit of Warm Springs," which does so much to supplement
the skill of science. The people of Georgia have given to this work a noble gift. In the name of the Trustees of the Foundation I thank them, and especially I thank the Georgia Hall Committee, who under the untiring efforts and leadership of Mr. Cason Callaway and Mr. Cator Woolford, have made intangible the vision of many years ago.
Most people have visions of things they would like to see accomplished; fortunate are those who with their own eyes see the accomplishment becoming a fact.

Most of you who are here tonight know the story of Warm Springs during the past nine years. You know of the hopeful handful of crippled children and adults who came seeking to walk again, and of the growth of our physical facilities and of our medical care to the point where the completion of Georgia Hall gives us a clear idea of the rounded picture of the Georgia Warm Springs of the future.

In all these years our splendid progress would have been impossible had we not had the sympathy, the understanding and the help of our neighbors; and tonight I express my appreciation and thanks, first, to you my neighbors of Warm Springs and Stewart County, for your true friendship toward me and toward all those who have come here; and secondly, to you the people of Georgia whose welcome hospitality has culminated in this splendid gift to the Foundation and made me feel prouder than ever to call this "my other home."

It is this understanding spirit on the part of those who surround us that has contributed so greatly to what we call the "spirit of Warm Springs." No perfectly expeditious hospital, no medical care of the highest skill can accomplish the best results unless at the same time we build up, as Mr. Callaway has said, confidence, self-reliance and cheerfulness on the part of the patients themselves. That is why the Warm Springs Foundation has established itself as a practical success in bringing back so many crippled children and crippled grown-ups to normal activities, and at the same time to a normal confidence in themselves.

We hear much these days of two adjectives -- "social" and "economic." Generally they are used to denote different things. Here at Warm Springs we have proved that in our work they go hand in hand. Let me give you an example: If a child is so incapacitated, because of infantile paralysis or accident or some other cause, that the child is unable to get about, and go to school, the chances are that in most cases some grown-up person must spend a large part of the time in taking care of the child. Every social objective requires that the child be rehabilitated to lead a normal life — to become a useful member of society. In accomplishing this we reach at the same time the economic objective, for we restore the child and at the same time we release a member of his family from the constant supervision and care of the child, and enable that person so to be economically useful in the community.

Figures show that there are well over three hundred thousand crippled children in the United States and probably at least as equal number of grown-up people. It is my belief, and I think the belief of the doctors of the United States, that the great majority of these citizens of ours, more than half a million of them, can be restored to useful citizenship if we can give them the most modern, scientific, medical and educational treatment. Toward the attainment of that goal the Georgia Warm Springs Foundation seeks to play a leading part. This work at Warm Springs is not local; people come here from every state in the Union and from many foreign countries. It is true that we can take care of only a small proportion of those who need care; but at the same time the educational value of the methods and of their results is making itself widely felt in the care of the handicapped throughout the United States.
I wish much that people all over the Country could be with us here tonight to learn of the splendid effectiveness of the work we are doing; to see this beautiful building which for all time will be the center of our work, and especially to understand that thing which we call "the spirit of Warm Springs," which does so much to supplement the skill of science. The people of Georgia have given to this work a noble gift. In the name of the Trustees of the Foundation I thank them, and especially I thank the Georgia Hall Committee, who under the untiring efforts and leadership of Mr. Cason Callaway and Mr. Gctor Woolford, have made tangible the vision of many years ago.
Most people have visions of things they would like to see accomplished; fortunate are those who with their own eyes see the accomplishment becoming a fact.

Most of you who are here tonight know the story of Warm Springs during the past nine years. You know of the hopeful handful of crippled children and adults who came seeking to walk again, and of the growth of our physical facilities and of our medical care to the point where the completion of Georgia Hall gives us a clear idea of the rounded picture of the Georgia Warm Springs of the future.

In all these years our splendid progress would have been impossible had we not had the sympathy, the understanding and the help of our neighbors; and tonight I express my appreciation and thanks, first, to you my neighbors of Warm Springs and Meriwether County, for your true friendship toward me and toward all those who have come here; and secondly, to you the people of Georgia whose welcome hospitality has culminated in this splendid gift to the Foundation and made me feel prouder than ever to call this my other home.

It is this understanding spirit on the part of those who surround us that has contributed so greatly to what we call the "spirit of Warm Springs." No perfectly appointed hospital, no medical care of the highest skill can accomplish the best results unless at the same time we build up, as Mr. Callaway has said, confidence, self-reliance and cheerfulness on the part of the patients themselves. That is why the Warm Springs Foundation has established itself as a practical success in bringing
back so many crippled children and crippled grown-ups
to normal activities, and at the same time to a normal confi-
dence in themselves.

We hear much these days of the adjectives -- "social" and "economic." Generally they are used to denote different things. Here at Warm Springs we have proved that in our work they go hand in hand. Let me give you an example: If a child is so incapacitated, because of infantile paralysis or accident or some other cause, that the child is unable to get about, take care of himself and go to school, the chances are that in most cases some grown-up person must spend a large part of the time in taking care of the child. Every social
objective requires that the child be rehabilitated to lead a
normal life -- to become a useful member of society. In
accomplishing this we reach at the same time the economic ob-
jective, for we restore the child and at the same time we
release a member of his family from the constant supervision
and care of the child, and enable that person so to be an
economically useful unit in the community.

Figures show that there are well over three hundred
thousand crippled children in the United States and probably
at least an equal number of grown-up people. It is my belief,
and I think the belief of the doctors of the United States,
that the great majority of those citizens of ours, more than
half a million of them, can be restored to useful citizen-
ship if we can give them the most modern, scientific, medical
and educational treatment. Toward the attainment of that goal
the Georgia Warm Springs Foundation seeks to play a leading
part. This work at Warm Springs is not local; people come
here from every state in the Union and from many foreign
countries. It is true that we can take care of only a small
proportion of those who need care; but at the same time the
educational value of the methods and of their results is making
itself widely felt in the care of the handicapped throughout
the United States.

I wish much that people all over the country could be with
us here tonight to learn of the splendid effectiveness of the
work we are doing; to see this beautiful building which for all
time will be the center of our work, and especially to under-
stand that thing which we call "the spirit of Warm Springs,"
which does so much to supplement the skill of science. The
people of Georgia have given to this work a noble gift. In
the name of the Trustees of the Foundation I thank them, and
especially I thank the Georgia Hall Committee, and under the
unfailing efforts and leadership of Mr. Cason Callaway and Mr.
Cator Holford, have made tangible the vision of many years ago.
