FDR Speech File

1091

INFORMAL, EXTEMPORANEOUS REMARKS  
OF THE PRESIDENT  
TOLEDO, OHIO  
OCTOBER 6th, 1937.

I have had a wonderful trip all the way out to the Coast and back and I wish you could have all been with me.

I am glad to have a chance to stop in Chic. When I was out in the State of Washington, I heard a very interesting story that tells its own lesson.

The man who was building that great Grand Coulee Dam, which is about 500 feet high and the largest dam that man has ever built in all the ages, told me that a certain prominent citizen of Ohio had come out there and had said, "What good is it going to do Chic to spend fifty million dollars in Washington?"

So the man who was building the dam said, "I will tell you what I will do. I will bet you a hat that on any part of this project that you pick I can show you some material that has been manufactured in Ohio."

I think that is a pretty good lesson for us all, to show the national unity of the country and how the success of one part of the country affects the success of evry other part.

As you know, that is one of our objectives, to have a rounded prosperity, not only in the industrial centers but out in the farming areas und down in the South. That is one way that we, as a Nation, can go ahead.

We have started on the road and I think we are getting there.

It is good to see you.

Franklin D. Roosevelt Library

This is a transcript made by the White House stenographer from his shorthand notes taken at the time the speech was made. Underlining indicates words extemporaneously added to the previously prepared reading copy text. Words in parentheses are words that were omitted when the speech was delivered, though they appear in the previously prepared reading copy text.
